

## **JOSEPH E. KING, AIA**

Joe King is an architect whose work has long focused on energy performance, resources, policy, and technology with renewable energy at the core. He has served as director of the Kansas Energy Office, worked for a large Alexandria, Virginia, based energy consulting firm, and now maintains his own firm, **Coriolis**, in Lawrence.

He developed the first Kansas Wind Energy Resource Map, and conceived and implemented the Kansas Tall Tower Wind Resource Assessment project that provided the first extensive look at wind resources at modern turbine heights.

He consults to renewable energy developers and engineering firms on a wide range of renewable energy development issues.

Joe is a native Kansan and a graduate of the University of Kansas.
