

We serve the people of Kansas...

UTILITIES & COMMON CARRIERS
REPORT | 2017

The mission of the Kansas Corporation Commission is to serve the people of Kansas by regulating the State's energy infrastructure, oil and gas production, and commercial trucking to ensure public safety.

Our vision is a Kansas served by safe, reliable, environmentally responsible, diverse energy supplied at the lowest cost and for safe travel for the motoring public.

About the KCC

Established in 1883 to regulate railroad activity, the Kansas Corporation Commission (KCC) was one of the first state regulatory bodies in the nation. In 1911, the Kansas Legislature created a three member Public Utilities Commission to regulate telegraph and telephone companies, pipeline companies, common carriers, water, electric, gas, and all power companies with the exception of those owned by municipalities.

The present regulatory body was established by the Legislature in 1933. Over the years, its jurisdiction was extended to include motor carriers, gas conservation, and supervision of plugging abandoned wells to protect fresh and useable water from pollution.

Today, the KCC regulates five cornerstone industries in the Kansas economy. The Commission has the responsibility of ensuring that natural gas, electricity, telephone, and transportation vendors provide safe, adequate, and reliable services at reasonable rates. The Commission also has the mandate of assuring that oil and gas producers protect correlative rights and environmental resources. The authority of the Kansas Corporation Commission is derived from KSA 74-601 to 74-631.

The Commission is comprised of three members who are appointed by the Governor and confirmed by the Senate. Members serve staggered four-year terms. Law provides that no more than

two of the three commissioners may belong to the same political party. Commissioners elect one of their colleagues as Chair. The work of the Commission is supported by the KCC Administrative Division, Public Affairs and Consumer Protection, Utilities, Conservation, Transportation, and Energy.

The KCC does not regulate most electric cooperatives, water cooperatives, municipalities, wireless telephone, long distance service, cable companies, or the internet.

Current KCC Leadership

Jay Scott Emler
Chairman

Jay Scott Emler was appointed to the KCC by Governor Brownback on January 8, 2014, to fill an unexpired term ending March 2015. He was confirmed by the Kansas Senate on January 16, 2014. On May 21, 2015, Emler was confirmed for a four year term, which expires on March 15, 2019. He was elected Chairman on January 14, 2016.

Emler previously served in the Kansas Senate where he was elected Senate Majority Leader. He represented the 35th District in central Kansas for 13 years. Emler also served as Chairman of both Ways and Means and Utilities committees. Prior to the Senate, he was Vice President and General Counsel for Kansas Cellular.

He is the past national Chairman of the Council on State Governments. He also served on Governor Brownback's transition team.

Emler is a graduate of Bethany College, Lindsborg, where he earned a bachelor's degree and teaching certificate. He earned his law degree from the University of Denver, College of Law. In addition, Emler holds a master's degree in security studies from the Naval Postgraduate School in Monterey, California.

Emler and his wife Lorraine live in McPherson County, where they operate a small family farm and belong to Bethany Lutheran Church.

Shari Feist Albrecht
Commissioner

Shari Feist Albrecht was appointed to the KCC by Governor Brownback on June 25, 2012. She served as Chair from January 9, 2014, to January 14, 2016. Albrecht was reappointed to a second four year term, which expires on March 15, 2020.

Albrecht served at the Kansas Department of Health and Environment from 1993 to 2012. Previously at the KCC, Albrecht held the positions of Director and Deputy Director of the Conservation Division, chairing numerous committees, including the Oil and Gas Advisory Committee. She also served as Acting General Counsel, Assistant General Counsel, and staff attorney for the Transportation Division.

Albrecht is Vice President of the Regional State Committee of the Southwest Power Pool and serves on the Advisory Board of the Financial Resources Institute. She is a member of NARUC, serving on the Gas Committee, Subcommittee on Pipeline Safety, and the Washington Action Committee. She is also a member of the Advisory Council of the New Mexico State University Center for Public Utilities and of the Energy Bar Association.

Albrecht earned a bachelor of arts degree in Spanish literature from KU in 1982. She graduated from WU School of Law in 1984 and is licensed in Kansas, the U.S. District Court for Kansas, and the U.S. Supreme Court. Albrecht and her husband live in Topeka and attend Faith Lutheran Church.

Pat Apple
Commissioner

Commissioner Pat Apple was appointed to the KCC by Governor Brownback on March 24, 2014 and confirmed by the Kansas Senate on April 6, 2014. His term expires on March 15, 2018.

Commissioner Apple served in the Kansas Senate from 2005 to 2014, where he provided leadership in many capacities including Chairman and Vice-Chairman of the Utilities Committee. He also served on the Assessment and Taxation Committee, Commerce Committee, Confirmation Oversight Committee, Vice-Chair of Kansas Electric Transmission Authority, 911 Coordinating Council, and Chair of Telecommunications Study Committee. Commissioner Apple currently serves as the Kansas representative for the Interstate Oil and Gas Compact Commission.

Commissioner Apple's prior public service includes Miami County Commission 2003-2005 and USD 416, Louisburg Board of Education 1991-2003.

Utilities Overview

The Utilities Division is responsible for administering the laws and regulations applicable to jurisdictional electric, natural gas, telephone, and water utilities. The Utilities Division staff is comprised of four sections that are responsible for providing recommendations and advice to the Commission to promote and ensure sufficient, efficient, and safe utility services at reasonable and non-discriminatory rates to consumers.

The four sections within the Utilities Division are Accounting and Financial Analysis, Economics and Rates, Energy Operations and Pipeline Safety, and Telecommunications. These sections are responsible for the following:

1. The Accounting and Financial Analysis section is responsible for investigating, analyzing and making recommendations to the Commission on accounting and financial issues relating to the electric, natural gas, telecommunication, and water industries. These issues include the development of a revenue requirement for rate cases and KUSF audits as well as yearly surcharge filings. The section is also involved in Federal Energy Regulatory Commission (FERC) cases and participating in Southwest Power Pool workgroups.
2. The Economic Policy and Rates section is responsible for investigating and making recommendations on economic issues relating to the natural gas, electric, and telecommunications industries to the Commission as well as the Kansas Legislature and other state agencies. In rate cases, this section is

also responsible for evaluating the cost of service and developing a rate design.

3. The Energy Operations and Pipeline Safety section provides technical expertise relating to electric utility operation, reliability, safety, electric transmission siting, and electric and gas consumer service as well as analyzing requested changes to natural gas and electric certificates. The section has primary responsibility to ensure safe operation of all gas utilities through enforcement of federal and state pipeline safety regulations. The section also has the responsibility to ensure the safe operation of electric utilities under the provisions of K.S.A. 66-101h.
4. The Telecommunications section is responsible for researching, investigating, analyzing, and making recommendations on courses of action for all telecommunications matters that come before the Commission. This section is also involved in Federal Communications Commission cases and participating on NARUC subcommittees and Federal-State Joint Boards.

Major Issues for FY 2016

ENVIRONMENTAL PROTECTION AGENCY

- In early 2013, President Obama issued a memorandum directing the EPA to re-propose carbon pollution guidelines for new and existing power plants. In September 2013, EPA announced proposed standards for new sources, and in June 2014, the EPA announced its proposed standards for existing sources (the Clean Power Plan). The EPA's rule proposed the use of four building blocks that required the re-dispatch of Kansas' affected coal electrical generating units (EGU's) to natural gas combined cycle, renewable generation, and demand-side management and energy efficiency. KDHE and the KCC discussed the proposed plan, and mutually agreed that each agency would file separate comments focused on the respective expertise of each agency. As a result, the KCC Staff filed comments on our concerns regarding jurisdictional authority, cost, and reliability on October 29, 2014.

- HB 2233 (amending K.S.A. 65-3031) became law on May 28, 2015, and required KDHE and KCC to enter into a memorandum of understanding (MOU) regarding the implementation of the requirements and responsibilities under the Kansas Air Quality Act. KDHE and KCC completed and signed the MOU on July 14, 2015. In addition, HB 2233 requires the KCC to submit the following information to the clean power plan implementation study committee: each utility's re-dispatch options along with the cost of each option; the lowest possible cost re-dispatch options on a state-wide basis; and the impact of each re-dispatch option on the reliability of Kansas' integrated electric system.

- On August 3, 2015, EPA issued final emission guideline rules for existing electrical generating units, final CO2 performance standards for new, modified and reconstructed EGUs, and a proposed federal plan and model rule for existing EGUs. In order to fully evaluate the re-dispatch options available to Kansas and determine the impact of each re-dispatch option, Staff issued a Request for Proposal (RFP) to engage a consulting firm with the necessary experience and modeling programs to run re-dispatch and power flow models. The RFP closed on September 22, 2015, and Staff retained a consultant based on the RFP process.

- On February 9, 2016, the United States Supreme Court stayed the EPA's proposed Clean Power Plan. With a stay in place, the legislature modified K.S.A. 65-3031 via SB 318, which became effective May 19, 2016. The modification requires all state agency activities, studies and investigations in furtherance of the preparation of an initial submittal, or any evaluation of options for the submission of a final state plan be suspended until the stay is lifted.

- The Clean Power Plan has been appealed to the U.S. Court of Appeals for the District of Columbia Circuit. Oral arguments were held on September 27, 2016, and an order is expected the first or

second quarter of 2017.

- Pursuant to SB 318, KCC Staff is monitoring the progress of the appeal, but neither Staff nor our consultant is performing any activities in furtherance of a preliminary or final plan during the stay.

SIGNIFICANT INCREASES IN CAPITAL INVESTMENT

- Electric utilities have effectively completed large-scale environmental retrofit projects on coal-fired generation assets. However, the Clean Power Plan has the potential to require significant investments in new generation and transmission assets. In addition, the Southwest Power Pool continues to approve new transmission facilities to enhance reliability of the transmission system. Both the potential new generation assets and new transmission assets are extremely capital intensive and will continue to place upward pressure on utility rates. Moreover, the trend of increases in transmission investment related to current congestion issues is far from over, and we expect these investments to continue to put upward pressure on utility rates for several years to come.

- Investor-owned natural gas distribution utilities in Kansas are facing aging infrastructure, some of which is constructed of materials that are considered to be obsolete or that present a safety risk. This has led to these gas utilities placing an increased emphasis on accelerating the rate of replacement of aging infrastructure. This effort has also increased capital expenditures levels, and led to more frequent general rate cases. In March 2015, the Commission opened a general investigation to explore whether the use of alternative ratemaking mechanisms, instead of general rate cases, to accelerate of the rate of replacement of natural gas infrastructure is in the public interest. The general investigation continued throughout 2015 and 2016. The Commission has taken testimony from investor-owned natural gas distribution companies, Commission

Staff, and CURB. Additionally, a hearing was held on March 30-31, 2016. The Commission continues to investigate whether it is appropriate to utilize an alternative ratemaking mechanism to accelerate the pace of obsolete infrastructure replacement in Kansas.

- Telecommunications companies are continuing to invest in new technologies, primarily to enhance broadband services. The investment in broadband services is generally driven by the FCC's National Broadband Plan, which has a goal of supporting the provision of broadband communications in areas that would be unserved or underserved without such support. However, the continued investment in new technologies should not increase the size of the KUSF. HB 2201, which was passed during the 2013 legislative session, caps the KUSF fund at \$30 million for rate of return regulated carriers, caps support for price cap regulated carriers, eliminates KUSF support for electing carriers, and caps and phases out KUSF support for competitive eligible telecommunications carriers.

IMPLEMENTATION OF SPP'S DAY 2 MARKET (THE INTEGRATED MARKETPLACE)

On March 1, 2014, the SPP's Integrated Marketplace (IM) went live. The IM is a centrally dispatched, financially binding, day-ahead market. This means that Kansas utilities that are members of SPP sell all of their available energy to SPP and buy all of their energy needs from SPP. To the extent that a utility is running its own power plants, the two transactions net out and the end result is that the customer pays the cost of fuel for company-owned generation assets, plus any unhedged congestion costs on the transmission system. The IM also contains a real-time balancing market which replaces the EIS (Energy Imbalance Services) market and price-based markets form four operating reserve products. Additionally, SPP now acts as the single balancing authority for the entire SPP footprint, replacing the

16 separate balancing authorities that existed previously. A single balancing authority allows greater load and resource diversity, which should allow for more efficient dispatch, less excess committed capacity, and cost savings. Since the IM was launched in 2014, SPP reports \$1 billion in net savings to market participants across the SPP footprint due to these efficiencies. The KCC is monitoring on a monthly basis how jurisdictional utilities are faring in the IM.

Electric

OVERVIEW

The KCC regulates nine large (annual operating revenue greater than \$10 million) electric utilities. A list of the large electric utilities and a brief overview of the major activities for FY 2016 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other electric dockets. Also included in this narrative section is a discussion of the Federal, transmission, and wind issues that the Utilities Division Staff spent a significant amount of time on during FY 2016.

LARGE ELECTRIC UTILITY COMPANIES

(Annual operating revenue greater than \$10M)

Empire District Electric Company

ITC Great Plains, LLC (Transmission Only)

Kansas City Power & Light Company

Mid-Kansas Electric Company (Limited per K.S.A. 66-104d)

Midwest Energy, Inc. (Limited per K.S.A. 66-104d)

Prairie Wind Transmission, LLC (Transmission Only)

Southern Pioneer Electric Company

Sunflower Electric Power Corporation (Limited per K.S.A. 66-104d)

Westar Energy, Inc.

Wheatland Electric Cooperative, Inc.

Four major electric utility companies filed applications to increase rates during FY 2016, Wheatland Electric, Inc., Southern Pioneer, Mid-Kansas Electric, and Midwest Energy, Inc.

Wheatland Electric filed Docket No. 16-WHLE-305-RTS requesting an increase in local access charge (LAC) rates used to charge wholesale customers taking transmission service over Wheatland's 34.5kV sub-transmission assets. Additionally, Wheatland asked to consolidate the rate it currently charges customers taking service over the 34.5 kV lines in its Western Division with the LAC rate currently being charged to customers taking LAC service in the Eastern Division. This docket was contested by the customers that would pay the LAC rates, and ultimately ended up in a unanimous settlement without consolidating the LAC rates.

Southern Pioneer filed Docket No. 16-SPEE-497-RTS requesting its third annual Formula Based Rate (FBR) update to increase its retail rates to meet pre-determined debt service coverage ratios approved by the Commission in a Debt Service Coverage FBR pilot program approved in FY 2013. This rate filing resulted in an increase of the non-profit utility's retail rates of \$849,135.

Mid-Kansas Electric Company filed Docket No. 16-MKEE-023-TAR requesting an FBR to allow for the annual update of its members' LAC rates for use in billing wholesale customers taking transmission services over the cooperatives' 34.5kV sub-transmission facilities. This docket was contested by the wholesale and retail customers that believed they would pay these LAC rates. Ultimately, the docket resulted in a unanimous settlement agreement being filed which was approved by the Commission. Also during 2016, these cooperatives filed the first annual LAC rate update based on these Commission-approved FBRs.

Midwest Energy, Inc. filed Docket No. 16-MDWE-324-TFR requesting an updated Transmission Formula Rate (TFR) template and protocols. Midwest's TFR and protocol revisions were primarily aimed at revising its Annual Transmission Revenue Requirement (ATRR) to account for the collection of certain transmission projects across the SPP region, instead of its zonal transmission rates. In addition, changes were made to update the methodology for calculating depreciation expense, construction work in progress, and revenue credits. Lastly, Midwest corrected its template to include the 50-basis point adder for Regional Transmission Organization membership allowed by Federal Energy Regulatory Commission transmission ratemaking policy. Certain transmission customers protested this filing, and Commission Staff suggested several revisions and corrections to Midwest's filing. Ultimately, the parties were able to settle their differences, and the Commission approved the revised TFR template and protocols.

In addition to these four electric company rate filings, three major investor-owned utilities filed merger applications with the Commission in FY2016. Empire District Electric Company filed a request to be acquired by Liberty Utilities Company, an indirect subsidiary of Algonquin Power and Utilities Corp in Docket No. 16-EPDE-410-ACQ. Additionally, ITC Great Plains, LLC. (ITC) filed a request to be acquired by Fortis, Inc. in Docket No. 16-ITCE-512-ACQ. Lastly, Great Plains Energy and Kansas City Power and Light Company filed a request to Acquire Westar Energy in a \$12.2 billion cash and stock deal in Docket No. 16-KCPE-593-ACQ.

Of the three merger requests, Fortis' acquisition of ITC consumed the fewest Commission resources because the Commission's jurisdiction over ITC is limited to certificate of service issues by ITC's nature as a transmission-only utility with no retail customers or rate

regulation before the KCC. ITC's merger request was approved by the Commission with conditions on October 11, 2016. The Commission approved the unanimous settlement agreement reached by all parties in the Empire merger request on December 22, 2016. The Westar merger request is scheduled to be decided in early 2017. Both the Empire and Westar merger cases have been extremely resource intensive endeavors requiring significant Commission Staff time and attention as well as the use of external technical consulting resources.

FEDERAL ISSUES

The KCC intervened in several matters at FERC during FY 2016. Due to the proliferation of regional transmission organizations (RTOs) like SPP and the associated increase in transmission infrastructure, the KCC's involvement in FERC electric matters has continued to increase significantly. Additionally, after the implementation of SPP's competitive bid solicitation process for new transmission projects, as required by FERC's Order 1000, there have been numerous new Transmission Formula Rate (TFR) filings at FERC. These new TFR filings are being driven by the following factors: 1) the desire of new entities to calculate and report costs on an incremental cost basis for each new project, and 2) the desire of new entities for a flexible TFR template that allows for the recognition of any concessions that may be made in the competitive bidding process. FERC transmission formula rate dockets that the KCC has intervened in as a result of FERC Order 1000 are Transource Kansas (ER15-958), Kanstar (ER15-2237), Heartland (ER15-1777), Basin (ER15-1775), South Central MCN (ER15-2594), and NextEra Energy (ER16-2720). The KCC has also intervened and filed comments in response to FERC's technical conference on Order 1000 (AD-16-18).

In docket EC16-146, the KCC intervened for the purpose of monitoring the Great Plains/Westar merger proceedings at FERC.

In docket numbers ER14-2850/2851, ER15-1775, and ER15-1777, the KCC protested the expansion of SPP to include the integrated system of the Western Area Power Authority, Basin Electric, and Heartland Electric. The KCC's primary protest is based on the fact that the new entities joining SPP do not have to pay for socialized transmission costs within the pre-existing SPP footprint that were incurred prior to the effective date of joining SPP. FERC issued an order on October 15, 2015 denying the KCC's protest. On December 14, 2015, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit. That appeal is still pending. This issue is also discussed in the Southwest Power Pool section.

In docket numbers ER15-958 and ER15-2237, the KCC protested the transmission formula rates of Transource Kansas and Kanstar on the grounds that the requested returns on equity were too high and a request that future – yet to be created affiliates – of Transource Kansas and Kanstar would be permitted to automatically utilize the capital structure and return on equity approved by FERC in ER15-958 and ER15-2237. The KCC negotiated a settlement with Transource Kansas and Kanstar respectively on the issue of what the appropriate return of equity should be, however, FERC ruled that future Transource Kansas and Kanstar affiliates would be permitted to automatically adopt the return on equity and capital structure of their parents without an additional filing. On March 8, 2016, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit in the Transource case. On June 2, 2016, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit in the Kanstar case. Those two appeals have been consolidated and are still pending.

SOUTHWEST POWER POOL

The Southwest Power Pool (SPP) is mandated by the Federal Energy Regulatory Commission (FERC) to ensure reliable supplies of power,

adequate transmission infrastructure, and competitive wholesale pricing of electricity. SPP was approved as a Regional Transmission Organization (RTO) by FERC in 2004 and is a non-profit corporation organized under the laws of the State of Arkansas. SPP is a regulated public utility in Kansas, having obtained a limited certificate of convenience and authority to manage and coordinate use of certain transmission facilities and to develop an energy imbalance market. Simultaneously, the existing electric public utilities in Kansas were authorized to transfer functional control of transmission facilities to and participate in an SPP energy imbalance market. SPP is a non-profit corporation and not a regulatory or quasi-regulatory entity and is regulated by FERC.

When SPP became an RTO, it had 131 employees and 48 members including 28 (58% of membership) investor-owned utilities, municipal systems, generation and transmission cooperatives, and state authorities who served retail loads in parts of eight states (Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, and Texas). Three Nebraska public power utilities became members of SPP in 2008. Most recently, on October 1, 2015, SPP membership expanded to include the Integrated Transmission System consisting of a portion of the Western Area Power Administration, Basin Electric Cooperative, and the Heartland Consumers Power District. This integration, while contested by the KCC at FERC because of cost allocation concerns, added 5,000 MW of peak demand and 7,600 MW of generating capacity to SPP's system. Today, SPP has around 600 employees and 95 members, with 59 (62% of membership) members directly or indirectly responsible for serving retail loads in the 14-state region.

Commission interaction with the SPP and participation in RTO matters is authorized by K.S.A. 74-633 and K.S.A. 66-106. The SPP organization has created approximately thirty primary

working groups/committees as well as multiple subordinate task forces. The Commission is represented by one KCC Commissioner on the Regional State Committee (RSC), which consists of one regulator or other state representative from each of the states in the SPP.

The Cost Allocation Working Group reports to the RSC and is composed of one voting Staff member from each of the states along with other state Staff participants. The RSC fulfills an advisory role in SPP and does not “approve” any transmission projects. Its participation in the SPP process is mostly limited to providing collective state regulatory agency input and participation, as stated in the RSC Bylaws. However, the RSC does have specific authority over cost allocation methodologies. For example, the RSC designed the original cost allocation methodology for committing retail ratepayer funds for construction of new transmission projects and has revised the methodology from time-to-time. The RSC has no responsibility in approving transmission projects or their associated costs. Approval of specific transmission projects and their associated costs are ultimately approved for construction by the SPP Board of Directors. Thus, the KCC has no direct oversight through its SPP involvement over the amount of spending for Kansas-specific or regional transmission projects, which makes it imperative that the Commission be represented in a liaison capacity on multiple SPP stakeholder committees and task forces.

TRANSMISSION PLANNING AND CONSTRUCTION

Since its inception as an RTO, the SPP has added \$5.9 billion in new zonal and regional transmission projects that are in-service. According to the SPP Fourth Quarter Project Tracking Report (October 2016), an additional 543 projects have been approved by the SPP Board of Directors for construction with a total estimated cost of \$5 billion. The approved projects in the report are not yet in-service and generally not in rates

unless Construction Work In Progress (CWIP) is authorized. Depending on the operating voltages of a project, the costs are regionally or zonally recovered from ratepayers inside the SPP Region.

The total ATRR for region-wide transmission projects is \$470.6 million as of September 2016. This represents annual capital cost recovery, operation and maintenance (O&M), and other transmission related expenses for regional projects that are in-service or under construction as of September 2016. These revenue requirements are recovered through FERC-approved TFRs, FERC-approved stated rates, or, in some cases, state approved TFRs. The current annual cost to Kansas ratepayers is approximately 17% of the annual transmission revenue requirement for the region, or \$79.6 million. This amount is expected to grow significantly in the next few years as the remaining \$5 billion in new projects mentioned in the previous paragraph come into service.

Grain Belt Express

Clean Line Energy Partners (Clean Line) was certificated as a public utility by the Commission in December 2011. Clean Line subsequently filed a line siting application for the Grain Belt Express Clean Line Project and this project was approved by the Commission on November 7, 2013. Clean Line is presently seeking similar approvals in Missouri and Illinois. The proposed line is a ±600 kilo-volt (kV), high voltage direct current (HVDC) transmission line along with associated facilities capable of delivering 4,000 megawatts (MW) of power from Kansas to load centers east of Kansas. The project will originate in western Kansas near Sunflower’s Spearville substation and traverse east across the state (approximately 370 miles) into Missouri where it will interconnect in the MISO RTO market at the St. Francois substation in southeastern Missouri. From there, the line will continue into Indiana where it will interconnect with the PJM RTO market at the Sullivan substation. The Project has

been estimated to cost \$2.2 billion. This project will be funded through the sales of transmission capacity to wholesale customers (referred to as merchant transmission) and, therefore, will not be funded by Kansas retail ratepayers. The project was approved by Indiana, Illinois, and Kansas. Clean Line was denied a Certification of Public Convenience and Necessity in 2015 in Missouri, but Clean Line has a new application pending before the Missouri Public Service Commission.

Summit to Elm Creek

ITC and Mid-Kansas Electric Company have entered an agreement to jointly build with Westar a 345 kV line from Westar’s Summit substation near Salina, Kansas, to ITC’s Elm Creek substation near the Cloud County wind farm. The Commission approved line siting applications for this 52 mile project on August 27 and August 29, 2013. ITC/Mid-Kansas and Westar expect to have their respective portions of the line completed by late 2016.

FERC Order 1000

The Commission Staff continues to monitor the effects of FERC Order 1000, which was issued in July 2011. This landmark Order affects the transmission planning process as it eliminated the right of first refusal to incumbent transmission owners for any projects receiving regional funding. The Order also requires RTOs to: 1) coordinate and share information in a transparent manner with neighboring RTOs; 2) establish cooperative procedures by which interregional projects might be addressed; and 3) develop a cost allocation methodology for those interregional projects. SPP’s implementation of a competitive bid solicitation process for transmission projects with a region-wide funding component has led to a flood of new transmission companies filing for TFRs at FERC. This process may also lead to the KCC certifying new utilities in the State if the successful bidder for a new

regional transmission project in Kansas is not a current Kansas utility.

WIND GENERATION AND THE RENEWABLE PORTFOLIO/ENERGY STANDARD (RPS/RES)

The Renewable Energy Standards Act (RESA), part of Kansas House Bill 2369 which became law on May 22, 2009, established a required renewable energy standard for the state. In addition, RESA authorized and required the KCC to formulate rules and regulations in regards to the established renewable energy standard. In October 2010, the KCC finalized K.A.R. 82-16-1 through 82-16-6, establishing these rules and regulations.

Kansas Senate Bill No. 91 (SB 91), which was signed into law May 28, 2015, repealed and amended sections of RESA, which, in turn, affected the KCC's rules and regulations that were authorized and required by RESA. Notably, the renewable energy standard for the state is now a voluntary goal that nameplate capacity from renewable energy generation resources be 20% of a utility's peak load demand by 2020. The KCC is currently in the process of revising K.A.R. 82-16-1 through 82-16-6 to align with the changes to RESA brought about by SB 91.

Natural Gas

OVERVIEW

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities. A list of the large gas distribution utilities and a brief overview of the major activities for FY 2016 are noted below. A summary of each major docket associated with the companies follow this narrative section along with a listing of all other natural gas dockets. In addition, included in this narrative section is a discussion of the Federal issues that the Utilities Division Staff spent a significant amount of time on during FY 2016.

LARGE GAS UTILITY COMPANIES

ATMOS Energy Corporation

Black Hills/Kansas Gas Utility Co.

Kansas Gas Service, a Division of ONE Gas, Inc.

During FY 2016 there were two major gas rate case proceedings decided by the Commission. Atmos Energy filed Docket No. 16-ATMG-079-RTS on August 13, 2015. This application requested a \$6.6 million increase in base rates, and three new alternative ratemaking mechanisms. One for aging infrastructure replacement entitled the System Integrity Plan (SIP), one to reset the entirety of the cost of service on an annual basis with the primary goal being avoiding base rate case filings entitled the Annual Review Mechanism (ARM), and a temporary surcharge to recover the expense associated with filing this base rate case filing. The case resulted in a unanimous settlement agreement calling for \$2.2 million increase in base rates, and the implementation of the SIP, and the rejection of the ARM and rate case expense surcharge. An evidentiary hearing was held on the settlement on February 2, 2016, and the Commission issued an Order on the settlement approving in part and denying in part on March 17, 2016.

On May 2, 2016, Kansas Gas Service, a division of ONE Gas, Inc. filed an application to increase its natural gas rates by \$27.9 million, after accounting for the impacts of rebasing the Gas System Reliability Surcharge (GSRS). KGS also requested an annual ratemaking mechanism entitled the Cost of Service Adjustment (COSA) that would take the place of filing traditional rate cases. Staff, CURB, and CenterPoint Energy Services filed testimony and participated in settlement discussions with KGS. This case resulted in a unanimous settlement agreement resulting in an increase to rates of \$15.5 million and led to KGS dropping its request for the COSA alternative ratemaking mechanism.

FEDERAL ISSUES

The Commission Staff monitors the

rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users. Chief among these is Southern Star Central, which transports 50% to 70% of all natural gas consumed in Kansas. Other interstate gas pipelines such as Kansas Pipeline Company, Cheyenne Plains Gas Transmission, Tallgrass Interstate Gas Pipeline, and Northern Natural Gas are also monitored.

In gas storage matters, the KCC continues to monitor Docket CP11-481 Alden Storage Field, CP13-76 Alden Storage Field, and CP13-531 Elk City Storage Field. These dockets are all related to Southern Stars continued efforts to maintain storage containment in its natural gas storage fields. Continued monitoring of these dockets is important as the process of stemming the loss of storage gas can take several years to fully vet.

In other storage matters, the KCC continues to monitor the activities of Northern Natural Gas in Docket CP09-465. In this case, Northern Natural has requested an enlargement of its certificated storage boundaries at its Cunningham storage field in an attempt to contain migrating storage gas. Northern is required to make quarterly compliance filings at FERC regarding its efforts and the KCC receives and reviews these filings.

The KCC intervened in Tallgrass Interstate pipeline Section 4 rate case at FERC in Docket RP16-137. The pipelines request supported a cost of service of \$122 million based on a return on equity of 13.89%. After several months of discovery by FERC Staff and intervenors, a settlement conference was held in April, 2016. The KCC was an active party at the settlement negotiations, which ultimately resulted in a settlement cost of service of \$96 million based upon a return on equity of 10.65%. In addition to the reduction in the cost of service, several other areas of the cost of service were settled in favor

of customers, including a three-year moratorium. While the KCC actively participated in negotiations, it signed on to the settlement as “non-opposing” due to the settled return on equity being out of a range that we could actively support.

The KCC also intervened and protested the annual fuel and lost and unaccounted for recovery filings at FERC filed by Southern Star Central and Kansas Pipeline Company (KPC) in Dockets RP16-626 and RP16-777 respectively. In the Southern Star docket, the KCC argued against including gas lost to system breach as Unaccounted For gas. In its final order in the matter, FERC agreed with the KCC and did not allow the gas lost to system breach to be included in rates. In KPC’s previous fuel and lost and unaccounted for docket in 2015, the KCC protested KPC’s lack of sufficient data and information. The FERC agreed and required KPC to make a compliance filing with the required data and computational processes. The KCC intervened in KPC’s 2016 fuel and loss filing, Docket RP16-777 to ensure that KPC’s continues with the FERC’s instructions to them to make the data changes required in the FERC Order from the previous docket.

Natural Gas Pipeline Safety

OVERVIEW

Pipeline safety personnel continue to conduct onsite inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator’s management of the integrity of the pipeline delivery system including such topics as review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements. In addition, engineers and pipeline safety inspectors investigate any incident suspected of being caused by natural gas and

report these to the Commission. Any recommendations of Staff regarding prevention of potential incidents are included in the report and considered by the Commission. Statistics that provide a snapshot of the pipeline safety personnel’s inspection activity as well as an overview of the regulated gas infrastructure in Kansas can be found in the pipeline safety section of this report.

Pipeline safety personnel also investigate violations of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Investigators work with excavators and utility operators to assure compliance with provisions of the act such as requesting locates prior to digging, and locating facilities within 48 hours of being notified of pending excavation work. To enhance our KUUDPA enforcement efforts, KCC receives two federal grants that provide funding for two inspector positions for the calendar year. From July 1, 2015, to June 30, 2016, the Commission acted upon 21 filings in which fines were levied to five excavators for failure to notify utilities prior to excavating over buried facilities and to 16 utility operators for failure to provide timely or accurate locates. For the 21 cases, a total of \$59,000 in fines was levied.

Kansas experienced no natural gas incidents in FY 2016.

Aging infrastructure remains a top concern with Kansas natural gas operators. In 2006, the state legislature passed the Gas Safety Reliability Surcharge (GSRS) which allows for alternative recovery of investments for pipe replacement investments. This program has been very successful in accelerating the replacement of aging pipelines. The replacement of distribution piping continues at a rate of approximately 124 miles of bare steel main, 16 miles of cast iron main and 56 miles of bare steel service lines in CY 2015. In March of 2015, the Commission opened a general investigation into the need to accelerate the replacement of obsolete natural gas infrastructure and

to consider the necessity of additional alternative rate treatment for pipe replacement programs. This investigation is ongoing.

Liquid Pipeline Common Carriers

OVERVIEW

Although there are relatively few intrastate pipeline common carriers in Kansas, the Commission is responsible for the economic regulation of this sector. The majority of Staff’s work in this area is the review of tariff and rate filings in an effort to ensure efficiency, public interest, and balanced benefit to Kansas common carriers and shippers. Staff is responsible for the economic regulation, including but not limited to: processing tariff and rate filings; analyzing tariffs for compliance; monitoring complaints; processing and monitoring certificate filings due to sales, purchases, mergers and acquisitions, divestitures, service cessations and abandonment; and monitoring operations for unforeseeable events and capacity constraints. Additionally, Staff tracks all intrastate revenue reported from each pipeline company. Staff processed 13 intrastate pipeline common carrier dockets during FY 2016. The intrastate liquids pipeline companies regulated by the KCC are noted below. A summary of each major docket follows this narrative section along with a listing of all other liquid pipeline dockets.

LARGE LIQUID PIPELINE UTILITIES (*\$10M or more in annual intrastate revenues*)

Jayhawk Pipeline (owned by NCRA)

Magellan Pipeline Company, LP

Mid-America Pipeline Company, a subsidiary of Enterprise Products Partners, LP

ONEOK North Systems

SMALL LIQUID PIPELINE UTILITIES (*\$10M or less in annual intrastate revenues*)

Freedom Pipeline, LLC
 Kaw Pipeline Company
 NGL Pipeline LLC
 Nustar Pipeline Operating Partnership, LP
 ONEOK NGL Pipeline LLC
 Plains Pipeline, LP

Telecommunications

OVERVIEW

The KCC regulates four primary types of telecommunications carriers with varying degrees of regulation: Incumbent Local Exchange Carriers (ILECs); Electing Carriers; Competitive Local Exchange Carriers (CLECs); and Interexchange Carriers (IXCs) (also known as long distance carriers). These telecommunications carriers serve a customer base ranging from as few as one customer to over 300,000 customers. The large telecommunications carriers regulated by the KCC are noted below. A summary of each major docket associated with the telecommunications carriers follows this narrative section along with a listing of all other telecommunications dockets.

LARGE TELECOMMUNICATIONS CARRIERS

Consolidated Communications Enterprise Services, Inc.

Cox Kansas Telecom, LLC

Rural Telephone Service Co., Inc.

SBC Long Distance, Inc.

Southwestern Bell Telephone Company d/b/a AT&T Kansas

Time Warner Cable Information Services, LLC

United Telephone Company of Kansas, Inc. d/b/a Century Link

In addition to the seven large telecommunications utilities listed above, the Commission has certificated 34 incumbent local exchange carriers

(ILECs), 122 competitive local exchange carriers (CLECs), and 236 interexchange carriers (IXCs).

The KCC continues its effort in fulfilling its obligation to protect the rights and privileges of Kansas consumers in balance with the interests of the telecommunication carriers. The evolution of competition in providing local and long distance telecommunications has, in some instances, resulted in greater choice of available services at a variety of rates with a wider array of providers, packages, and bundles from which to choose. Technology developments have also continued to play a key role in the evolution of the telecommunications industry.

The KCC Staff is responsible for the economic regulation, including but not limited to: processing incumbent local exchange carrier tariff filings and switched access rate filings; analyzing tariffs for compliance with KCC rules and regulations; administering consumer and carrier complaints; processing certificate filings, service cessations, and name changes; reviewing carrier-to-carrier interconnection agreements and providing mediation when necessary; ensuring quality services of the incumbent local exchange carriers; overseeing the Kansas Universal Service Fund (KUSF); auditing rate-of-return regulated ILECs; processing video service applications; and processing eligible telecommunications carriers filings.

KANSAS UNIVERSAL SERVICE FUND

The KUSF was established by the Commission in 1996, as required by the Kansas Telecommunications Act. The KUSF is in its twentieth year of providing support to local telephone service providers to assist in making universal service available in high-cost areas of the state, to provide dual-party relay service and telecommunications equipment for persons with disabilities, and to provide assistance to those with

lower incomes through the Lifeline program. Effective March 1, 2016, the annual KUSF funding requirement is approximately \$47.5 million and the carrier assessment rate is 6.53%. The KUSF provides approximately \$44.7 million in high-cost support, \$1.5 million for low-income subscribers, \$574,000 for telecommunications relay service, \$274,000 for the telecommunications equipment program, and \$530,000 for the fund administration and carrier audits.

The Commission began audits of all ILECs receiving KUSF support in 2000. The Commission has completed the initial audits for all ILECs and continues to monitor and initiate new audits when warranted based on an annual review of financial metrics. All of the rural LECs have elected rate-of-return regulation; therefore, the audits provide an opportunity for the Commission to determine whether or not the KUSF support is cost-based for each rural ILEC.

FEDERAL ISSUES

On March 16, 2010, the FCC delivered to Congress a National Broadband Plan (NBP) recommending that the FCC adopt cost-cutting measures for existing voice support and create a Connect America Fund (CAF), without increasing the overall size of the fund. The broad goal of the NBP is to support the provision of broadband communications in areas that would be unserved without such support or that depend on universal service support for the maintenance of existing broadband service. The FCC has initiated numerous proceedings aimed at implementing the NBP in order to attain the goals outlined in the NBP.

The FCC has issued multiple orders and has various proceedings underway to:

- Create the Connect America Fund (CAF) to support broadband;
- Convert the “legacy” high-cost component of the Federal Universal Service Fund (USF) to the CAF;
- Create a Mobility Fund to support 3G (or

better) wireless coverage;

- Expand the Lifeline (low-income) program to allow subsidies to be provided for broadband;
- Broaden the USF contribution base to ensure sustainability; and
- Transition intercarrier compensation to a bill-and-keep regime.

Most recently, the FCC offered model-based CAF support of over \$1.675 billion annually to price cap carriers nationwide for six calendar years (2015-2020). The support is designated to fund the deployment of voice and broadband capable services of at least 10 megabits per second (Mbps) downstream and 1 Mbps upstream in eligible areas. CenturyLink accepted \$16.5 million to provide 10 Mbps downstream/1 Mbps upstream broadband to 29,018 eligible households in Kansas, and AT&T accepted \$18.9 million to provide 10 Mbps/1Mbps broadband to 35,375 eligible households in Kansas. Carriers are required to meet specific deployment milestones required by the FCC.

Taking further steps to expand rural broadband deployment, in March of 2016 the FCC approved modernization and reform of its universal service program supporting the nation's rate-of-return carriers. Providing approximately \$20 billion in support over the next 10 years, modernizations of the universal service program for rate-of-return areas include enabling rate-of-return providers to meet consumer demand for stand-alone

broadband by providing support for stand-alone broadband. Reforms also include better targeting of support to communities that need it the most. The FCC is further allowing carriers to voluntarily transition from legacy rate-of-return support to model-based support, similar to CAF Phase II. Carriers electing to voluntarily transition to model-based support must deploy service providing 10 Mbps/1 Mbps to all funded locations, with faster 25 Mbps/3 Mbps service required in areas of higher population density. Carriers are required to meet specific deployment milestones required by the FCC. Support amounts were announced in July 2016 and carriers had until November 1, 2016, to indicate, on a state-by-state basis, whether they elect to receive model-based support.

The KCC continues to implement the FCC reforms and determine how the reforms will affect Kansas, Kansas carriers, and the KUSF.

Water

OVERVIEW

The Kansas Corporation Commission (KCC) regulates five water companies, none of which fall into the large utility category. These water companies serve a customer base ranging from as few as 60 to as many as 1,500, with little to no potential of increasing their customer base. Customers served by these companies typically live in a suburban area approximately two to ten miles outside the city. The water supplied

varies from city water supplied by a nearby town to ground water supplied by the company's own water wells. The water companies regulated by the KCC are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other water dockets.

WATER COMPANIES

Barton Hills Water District

Green Acres Mobile Home Park, LLC

Howison Heights, Inc.

Suburban Water, Inc.

Wheatland Water Plant, A Division of Wheatland Electric Cooperative, Inc.

During FY 2016, the Commission continued its general investigation into Howison Heights' ability to provide efficient and sufficient service given the company's documented financial distress and numerous customer complaints. Although the number of complaints from Howison customers has remained low in 2016, Staff has continued to identify deficiencies in the business and operations practices of Howison and continues to be involved in the monitoring and investigation of this utility. Howison is in the process of transferring its assets to Ottawa County RWD2. Staff continues to facilitate this transaction and coordinate with Howison, its creditors, RWD2, and KDHE. The transaction is expected to be completed in January of 2017.

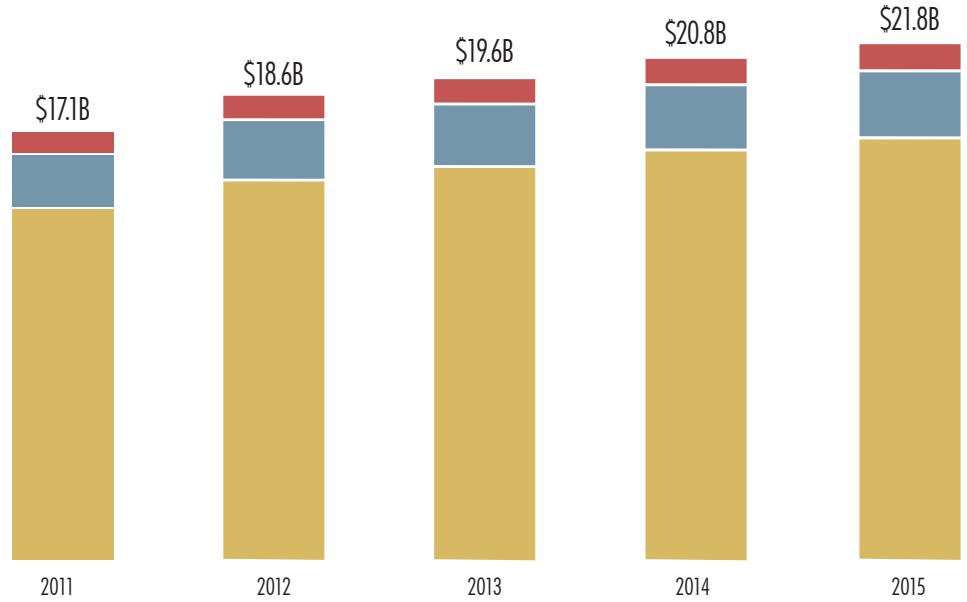

Financial Information and Other Metrics

OVERVIEW

The KCC sets rates for electric, natural gas, telecommunications, and water utilities on a rate base/rate of return basis for public or private utilities or a Times Interest Earned (TIER)/Debt Service Coverage Ratio (DSC) basis for cooperatives. For the electric, natural gas, and rural local exchange companies, the amount of capital investment, fuel and purchased power expense, total revenues, and total expenses are measured in billions of dollars. Following this overview section, more details are provided regarding financial information and other metrics for all the KCC jurisdictional utility industries on a consolidated and individual industry basis.

15-WSEE-115-RTS	1,172	In the Matter of the Application of Westar Energy, Inc. and Kansas Gas and Electric Company to Make Certain Changes in Their Charges for Electric Service.
16-ATMG-079-RTS	16	In the Matter of the Application of Atmos Energy Corporation for Adjustment of its Natural Gas Rates in the State of Kansas.

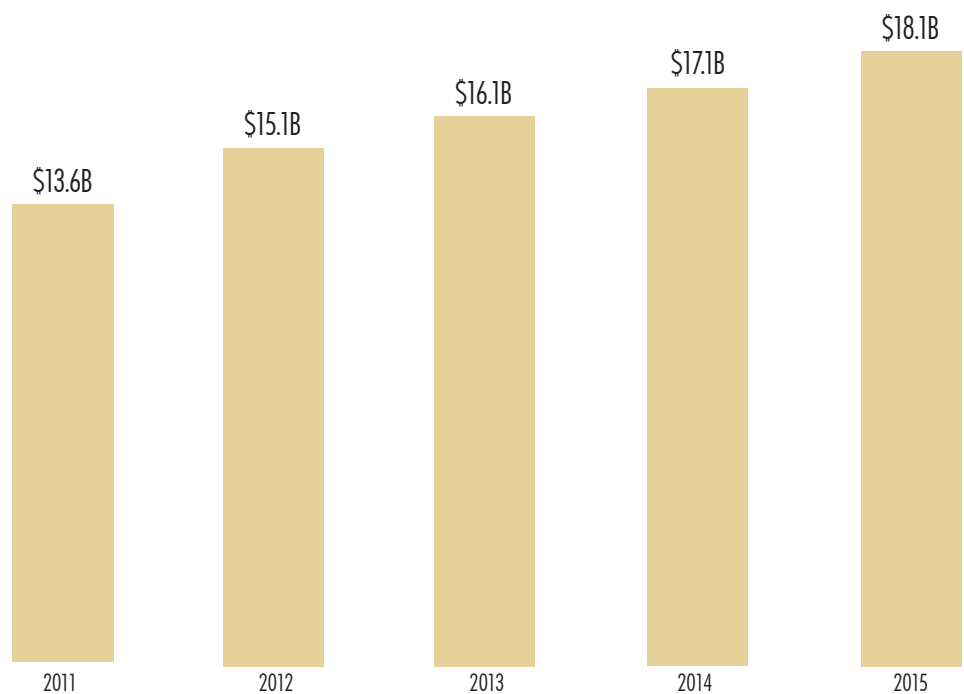

Electric Utilities

Financials

The following are selected Rate Base, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis. Empire District Electric and Kansas City Power & Light have operations in multiple states. The values represented in the following charts relate only to the Kansas operations of those two entities.

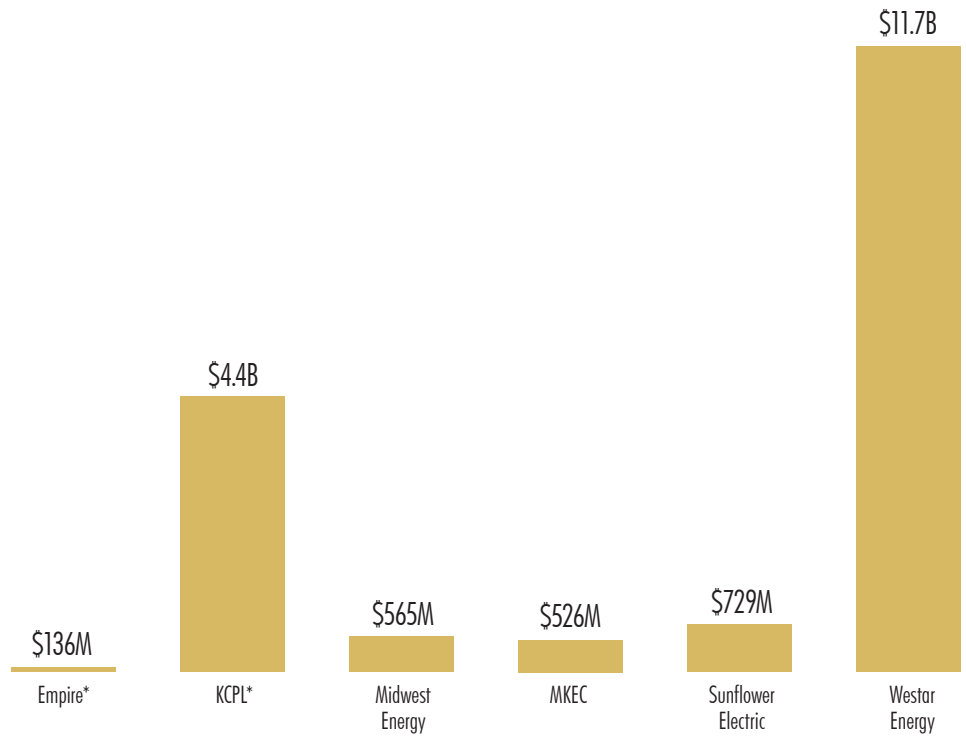

ELECTRIC COMPANIES STATEWIDE RATE BASE | 2011–2015

Rate Base is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total rate base of all regulated public utilities in Kansas for the past five years.

ELECTRIC COMPANIES RATE BASE, BY COMPANY | 2015

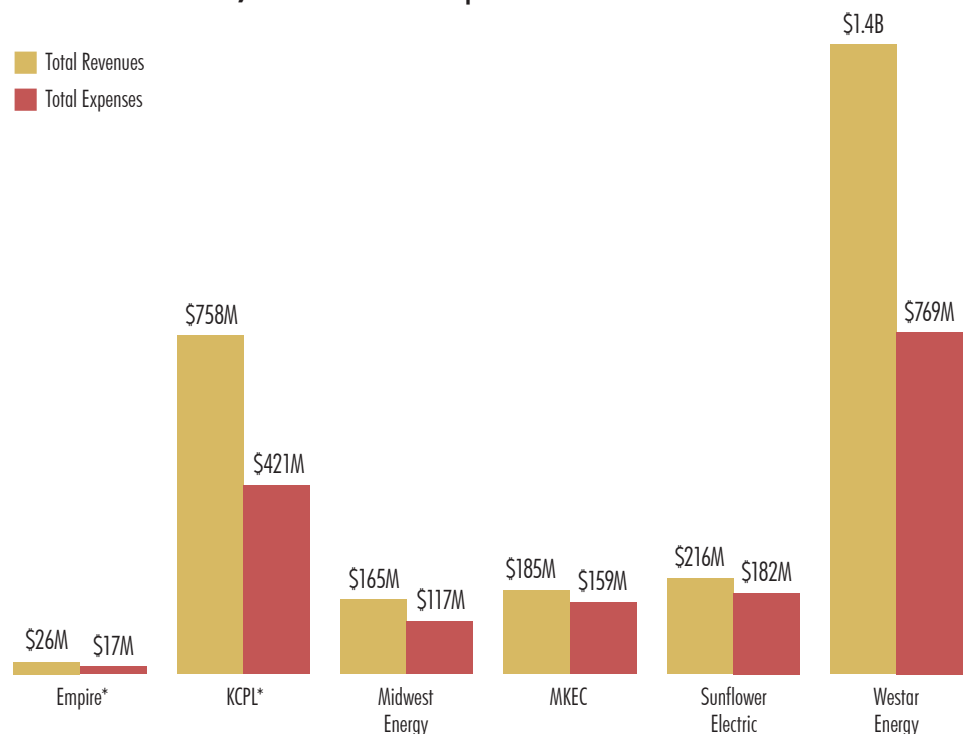

This chart takes the statewide aggregate rate base figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, two entities encompass a vast majority of utility rate base across Kansas.

*All figures for Kansas operations only.

ELECTRIC COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2015

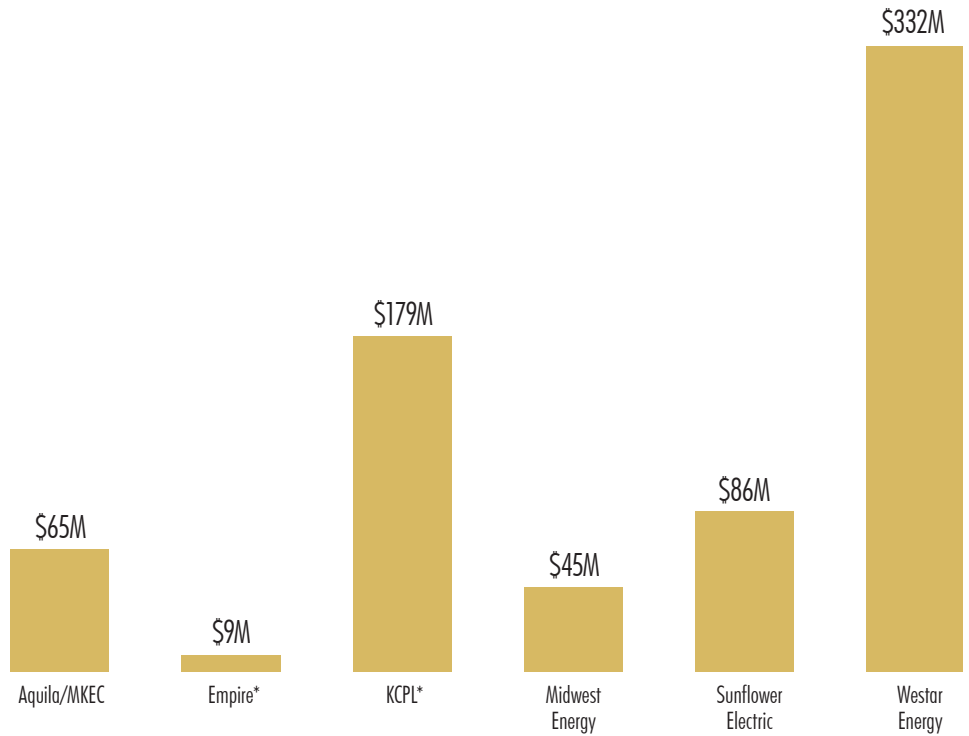

This chart compares each utility's annualized revenues and expenses. The difference between the two represents the gross margin of each company. Worth noting is the difference in gross margins between the investor-owned utilities and the cooperatives. Embedded in that difference is the dividend cost that rewards and helps ensure continued shareholder investment.

*All figures for Kansas operations only.

ELECTRIC COMPANIES GENERATING AND PURCHASED POWER COSTS, BY COMPANY | 2015

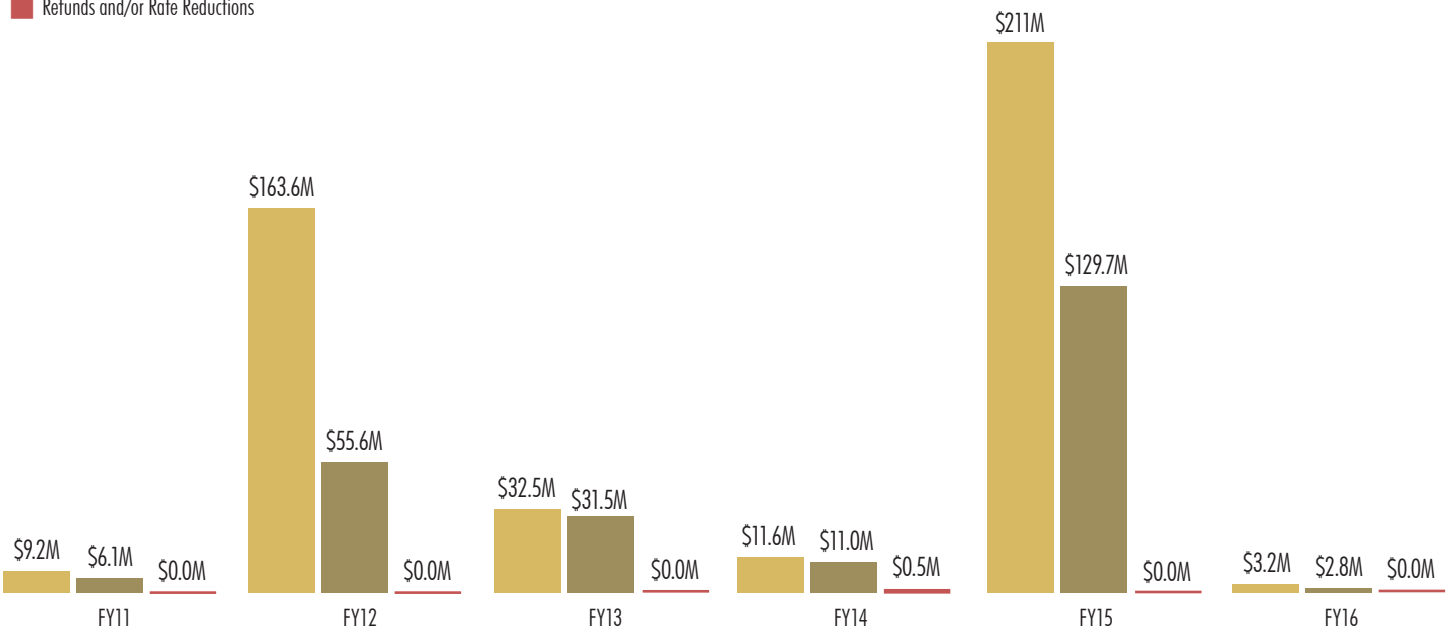

This chart takes the expense portion from each utility on the previous table and carves out the cost of generation and purchased power. As can be seen by comparing the two tables, generation and purchased power represent only about half the total cost of providing safe, reliable, and efficient electric service.

*All figures for Kansas operations only.

ELECTRIC COMPANIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY11–FY16

■ Requested

Generation Planning Survey

The Commission continues to monitor the generation capacity and reliability of Kansas electric utilities. Staff members annually review generation and load forecasts of Kansas electric utilities to ascertain whether there is adequate electric supply to meet the needs of Kansas electric consumers. The findings of that survey can be

seen below. Based on its review, staff determined that, at this time, forecasted electric generation capacity and planning to meet future changes in system load in the State of Kansas appears sufficient given current load and generation forecasts planned. Although utilities in the chart do indicate deficiencies in the future,

planned generation capacity additions can be made that will satisfy future planning responsibility. The chart on this page describes the generation capacity situation major utilities in Kansas face going forward.

Large Electric Rate Cases

WHEATLAND ELECTRIC COOPERATIVE, INC.

<i>Docket number</i>	16-WHLE-305-RTS
<i>Docket type</i>	Electric
<i>Date filed</i>	22 Dec 2015
<i>Action date</i>	13 Sept 2016
<i>Commission action</i>	Approved

In the Matter of the Application of Wheatland Electric Cooperative, Inc. for Approval to Make Certain Changes in Charges for Electric Service.

On December 22, 2015, Wheatland Electric Cooperative, Inc. (Wheatland) filed its Application requesting approval of a system-wide local access charge (LAC) tariff that would allow for the recovery of costs related to the provision of services to local access wholesale customers utilizing Wheatland's 34.5 kV sub-transmission facilities. The proposed tariff would consolidate the LAC rates between Wheatland's Eastern and Western divisions. Wheatland requested a system-wide LAC rate of \$1.66 per kilowatt-month (kW-month). On March 10, 2016, Wheatland filed a revised system-wide LAC rate of \$1.46 per kW-month. Wheatland then revised the LAC rate once more to \$1.34 per kW-month in response to one of the Commission Staff's Data Requests. Additionally, Wheatland requested that its LAC rate be billed on a Non-Coincident Peak basis. The Kansas Power Pool, the City of Garden City, Kansas (Garden City), the Kansas Electric Power Cooperative, Inc. (KEPCo), and the Kansas Municipal Energy Association were granted intervention in this docket by the Commission. On June 24, 2016, Commission Staff, Garden City, and KEPCo filed direct testimony. Staff recommended separate LAC rates for the Eastern and Western divisions: \$1.99 per kW-month for the Eastern division and \$0.78 per kW-month for the Western division. Additionally, Staff recommended that the LAC rate for the Western division be billed on a Non-Coincident Peak basis and the Eastern division LAC rate be billed on a Coincident Peak basis. Garden City opposed the consolidation of Wheatland's Eastern and Western division LAC rates and proposed a system-wide LAC rate of \$0.655 per kW-month for the Western division to be billed on a Non-Coincident

Peak basis. KEPCo recommended that the Eastern and Western LAC rates be consolidated and proposed a system-wide LAC rate of \$1.29 per kW-month to be billed on a Non-Coincident Peak basis. On July 14, 2016, the parties met to discuss the possible settlement of issues in this matter. The parties were able to reach a unanimous settlement agreement and on July 22, 2016, the Joint Motion for Approval of Unanimous Settlement Agreement was filed establishing separate LAC rates for Wheatland's Eastern and Western divisions: \$0.82 per kW-month for the Western division billed on a Non-Coincident Peak basis and \$1.99 per kW-month for the Eastern division billed on a Coincident Peak basis. On September 13, 2016, the Commission issued an Order Approving Settlement approving the LAC rates proposed in the Unanimous Settlement Agreement.

MID-KANSAS ELECTRIC COMPANY, LLC

<i>Docket number</i>	16-MKEE-023-TAR
<i>Docket type</i>	Electric
<i>Date filed</i>	16 Jul 2015
<i>Action date</i>	10 Mar 2016
<i>Commission action</i>	Approved

In the Matter of the Joint Application of Mid-Kansas Electric Company, LLC, Prairie Land Electric Cooperative, Inc., Southern Pioneer Electric Company, The Victory Electric Cooperative Association, Inc., and Western Cooperative Electric Association, Inc., for Approval of Individual 34.5kV Formula-Based Rates.

On July 16 2015, the Joint Applicants filed their Joint Application for approval of an alternative ratemaking proposal of four individual Formula-Based Rate (FBR) Plans that would allow the Joint Applicants to make annual adjustments to Local Access Delivery Service rates for the use of their 34.5 kV sub-transmission assets. Kansas Electric Power Cooperative (KEPCO), Western Kansas Industrial Electric Consumers (WKIEC) and Kansas Power Pool (KPP) filed for intervention in the Docket. On September 15, 2015, KEPCO was granted intervention. On October 27, 2015, WKIEC and KPP were granted intervention in the Docket. On November 17, 2015, Staff and the Intervening Parties filed direct testimony each advocating for various modifications to the 34.5 kV FBR Plan filed in the Application. On December

11, 2015, the parties met collectively to discuss the possible settlement of issues in this matter. The parties filed a Unanimous Settlement Agreement with supporting testimony on December 30, 2015. The Settlement Agreement included a bifurcated plan, which aligned Southern Pioneer's 34.5 kV FBR Plan with Southern Pioneer's current Debt Service Coverage – FBR Plan approved by the Commission in Docket No. 13-MKEE-452-MIS and adopted a single uniform 34.5kV FBR Plan with identical Protocols and rate templates for the other parties in the Docket. On March 10, 2016, the Commission issued an Order approving the 34.5kV FBR Plans and Protocols as stated in the Settlement Agreement.

SOUTHERN PIONEER ELECTRIC COMPANY

<i>Docket number</i>	16-SPEE-497-RTS
<i>Docket type</i>	Electric
<i>Date filed</i>	02 May 2016
<i>Action date</i>	02 Aug 2016
<i>Commission action</i>	Approved

In the Matter of the Annual Filing of Southern Pioneer Electric Company for Approval to Make Certain Changes to Its Charges for Electric Services, Pursuant to the Debt Service Coverage Formula Based Ratemaking Plan Approved in Docket No. 13-MKEE-452-MIS.

On May 2, 2016, Southern Pioneer Electric Company (Southern Pioneer) filed its third Application under its five-year Debt Service Coverage Formula Based Ratemaking (DSC-FBR) Pilot Program approved in Docket No. 13-MKEE-452-MIS. In its Application, Southern Pioneer was seeking a rate increase of \$679,308 or 1.2%. On May 3, 2016, the Citizens' Utility Ratepayer Board (CURB) filed a Petition to Intervene. On May 10, 2016, the Commission granted CURB's intervention. On June 30, 2016, Staff filed direct testimony in the docket, and the CURB filed direct testimony on July 1, 2016. Staff recommended several adjustments to Southern Pioneer's Application which included disallowing various advertising, dues, and donations expenses, correcting the revenue annualization adjustment, and recognizing a one-time payment related to a billing error connected to Southern Pioneer's 34.5 kV transmission system. After incorporating the adjustments into the DSC-FBR template, Staff recommended

an adjustment of \$113,218 to the revenue requirement for a total increase of \$849,135 or 1.47%. Additionally, Staff proposed incorporating future annual filings of the DSC-FBR Ratemaking Plan with the 34.5 kV FBR in Docket No.16-SPEE-501-TAR into a single docket due to the interrelated nature of the filings. CURB recommended making the same adjustments in the Docket. On July 18, 2016, Southern Pioneer filed rebuttal testimony stating that Southern Pioneer agreed with Staff's recommendations. On August 2, 2016, the Commission issued its Order approving Staff's recommendations.

On June 17, 2016, Midwest filed rebuttal testimony to Staff's recommendations. After negotiations, the parties reached a settlement accepting most of Staff's recommendations. On August 25, 2016, the Commission issued an Order approving the Unanimous Settlement Agreement.

MIDWEST ENERGY

<i>Docket number</i>	<i>16-MDWE-324-TFR</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>31 Dec 2015</i>
<i>Action date</i>	<i>25 Aug 2016</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Application of Midwest Energy, Inc. Seeking Commission Approval to Update Attachment H of its Open Access Transmission Tariff.

On December 31, 2015, Midwest Energy, Inc. (Midwest) filed an Application seeking approval of updates to Attachment H of its Open Access Transmission Tariff (OATT). Specifically, Midwest requested to make changes to its Transmission Formula Rate (TFR) template and Protocols. On April 6, 2016, Midwest supplemented the exhibits populated with 2014 test year data attached to its original filing with updated 2015 data. Staff filed direct testimony on May 27, 2016, and while it agreed with the modifications requested in Midwest's Application, Staff also recommended additional changes. The recommended changes to the TFR template included the removal of generation-related construction work in progress that was included the filing in error, several adjustments to exclude various administrative and general expenses, reclassification of certain facilities, adjustments to reflect additional revenue credits, various modifications of footnotes, and elimination of lines in the cost support worksheets not used in the calculation of the revenue requirement. Staff also recommended several enhancements to the review procedures called for in the Protocols that govern implementation and the annual updating of the TFR. On June 2, 2016, Kansas Electric Power Cooperative, Inc. also filed testimony accepting Staff's position with two minor modifications.

Major Dockets | ELECTRIC UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Electric Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.” That year runs from July 1, 2015 through June 30, 2016.

EMPIRE DISTRICT ELECTRIC COMPANY

<i>Docket number</i>	<i>16-EPDE-410-ACQ</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>16 Mar 2016</i>
<i>Action date</i>	<i>22 Dec 2016</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Joint Application of The Empire District Electric Company, Liberty Sub Corp. and Liberty Utilities (Central) Co. for Approval of an Agreement and Plan of Merger and for Other Related Relief.

On March 16, 2016, The Empire District Electric Company (Empire), Liberty Sub Corp. (LSC), and Liberty Utilities (Central) Co. (LU Central), a subsidiary of Algonquin Power & Utilities Corp. (Algonquin), filed a Joint Application for approval of an Agreement and Plan of Merger (Merger Agreement). Under the Merger Agreement, Algonquin will acquire, indirectly through its subsidiary LU Central, all of the capital stock of Empire (Transaction). LSC, an entity owned by LU Central, will be merged with and into Empire, with Empire emerging as the surviving entity. Immediately following the merger LSC will cease to exist. Algonquin is offering to pay \$34 per share in cash, or approximately \$1.5 billion, for all of the outstanding common stock of Empire, and will assume \$0.9 billion of existing Empire indebtedness. This equates to a total enterprise value of approximately \$2.4 billion for Empire’s assets. At the closing of the Transaction, Empire will become a wholly-owned subsidiary of LU Central and will cease to be a publicly held corporation. On October 6, 2016, the parties filed direct testimony and testimony in support of Unanimous Settlement Agreement (Settlement). In its testimony Staff and CURB recommended approval of the Transaction with the modifications and conditions contained within the Settlement because it promotes the public interest as determined by an application of the Commission’s Merger Standards. As part

of the Settlement, Empire will withdraw its current rate increase request pending before the Commission, and current rates will remain in effect until at least January 1, 2019. Additionally, LU Central and Empire have agreed to maintain or improve Empire’s current quality of service using benchmarks established for customer service from 2013 to 2015 and agree to pay a refund to its Kansas customers for any year the annual statistics in the Kansas service area decrease in reliability. An Order approving the Joint Motion for Commission Approval of Unanimous Settlement Agreement was filed on October 6, 2016. The Commission approved the agreement on December 22, 2016.

KANSAS CITY POWER & LIGHT COMPANY

<i>Docket number</i>	<i>16-KCPE-593-ACQ</i>
<i>Docket type</i>	<i>Electric</i>
<i>Date filed</i>	<i>28 Jun 2016</i>
<i>Action date</i>	<i>N/A</i>
<i>Commission action</i>	<i>Not Final</i>

In the Matter of the Joint Application of Great Plains Energy Incorporated, Kansas City Power & Light Company and Westar Energy, Inc. for Approval of the Acquisition of Westar Energy, Inc. by Great Plains Energy Incorporated.

On June 28, 2016, Kansas City Power & Light Company (KCP&L) and Westar Energy, Inc. and Kansas Gas and Electric Company (Westar) filed a Joint Application seeking approval for the acquisition of Westar by Great Plains Energy, the parent company of KCP&L. Great Plains Energy agreed to acquire 100 percent of the stock of Westar in a transaction then valued at approximately \$12.2 billion, including assumed debt. Upon closing, Kansas’ two largest jurisdictional utilities will be owned by Great Plains Energy, with Westar becoming a wholly-owned subsidiary of Great Plains Energy. On August 9, 2016, the Commission issued its Order on

Merger Standards, reaffirming the merger standards as modified in Docket No. 97-WSRE-676-MER, to ensure consistent approaches in the three pending merger dockets. Since the Joint Applicants in this docket filed their Joint Application prior to the issuance of the Order on Merger Standards, the Commission directed the Joint Applicants to file any modifications to their Joint Application with supporting testimony within 21 days. On August 30, 2016, the Joint Applicants filed their Verified Response to Commission’s Order on Merger Standards expressing their understanding of the Commission’s merger standards and agreeing those standards will be used to evaluate the Joint Application but did not believe that any changes to the Joint Application was necessary. On September 9, 2016, Staff filed its Reply to Joint Applicants’ Verified Response to Commission’s Order on Merger Standards, claiming the Joint Applicants altered the merger standard to ease their burden and requested the Commission direct the Joint Applicants to amend their Joint Application to allow the other parties to fully investigate and analyze the Application, or alternatively dismiss the Joint Application without prejudice. On September 12, 2016, CURB filed its Response to Staff’s Reply, agreeing with Staff that the Joint Application is deficient and parrots Staff’s request that the Commission direct the Joint Applicants to amend their Joint Application to conform to the merger standards or dismiss the Joint Application without prejudice. On September 19, 2016, the Joint Applicants filed their Response to Staff’s and CURB’s Reply, arguing the Order on Merger Standards did not provide for replies to the Joint Applicants’ responses, and thus requested both Staff’s Reply and CURB’s Response be stricken or ignored. On October 18, 2016, the Commission issued an Order Addressing Joint Applicants’ Verified Responses on

the Commission's Merger Standards taking no formal action at this time on Staff's Reply or CURB's Response. Furthermore, discovery is ongoing and may provide the parties with sufficient information to evaluate the Joint Applications. If the parties continue to believe the Joint Application does not adequately address the merger standards, they may file for the appropriate relief.

ITC GREAT PLAINS, LLC

Docket number 16-ITCE-512-ACQ
Docket type Electric
Date filed 10 May 2016
Action date 11 Oct 2016
Commission action Approved

In the Matter of the Joint Application of ITC Great Plains, LLC, and its Parent Company, ITC Holdings Corp., Together with Fortis Inc., Fortis US Inc., ITC Investment Holdings Inc. and Element Acquisition Sub, Inc. for Order Approving the Acquisition by Fortis Inc. of the Majority of All Classes of the Stock of ITC Holdings Corp., and its Subsidiary Companies, Including ITC Great Plains, LLC.

On May 10, 2016, ITC Great Plains, LLC (ITC Great Plains), on behalf of itself and its parent company ITC Holdings Corp., together with Fortis Inc. and its subsidiaries, including FortisUS Inc., ITC Investment Holdings Inc., and Element Acquisition Sub Inc. (collectively, Fortis) filed a Joint Application requesting approval of Fortis' acquisition of ITC Holdings (Transaction). The Transaction is valued at \$11.3 billion, with \$6.9 billion in consideration and the assumption of \$4.4 billion in ITC consolidated debt. On August 2, 2016, Sunflower Electric Power Corporation (Sunflower) and Mid-Kansas Electric Company, LLC (Mid-Kansas) were granted intervention. On September 2, 2016, Staff filed its Report and Recommendation concluding Fortis possessed the financial, managerial, and technical experience to provide sufficient and efficient service in the State of Kansas. Staff presented Merger Conditions for approval of the Transaction to satisfy the Commission's merger standards and also indicated the Joint Applicants' and Sunflower/Mid-Kansas' acceptance of the Merger Conditions be a prerequisite to approving the Transaction. On September 29, 2016, the Commission held an evidentiary hearing and all

parties' testimony supported approval of the Transaction subject to the Merger Conditions. On October 11, 2016, the Commission approved an Order Approving the Transaction with Conditions.

SOUTHWESTERN PUBLIC SERVICE COMPANY

Docket number 16-SWPE-209-COC
Docket type Electric
Date filed 30 Oct 2016
Action date 21 Jun 2016
Commission action Withdrawn

In the Matter of the Joint Application of Southerwestern Public Service Company and Xcel Energy Southwest Transmission, LLC for an Order Approving: (1) the Transfer of Transmission Lines and Appurtenances; and (2) the Issuance of Certificate of Convenience and Authority to Transact the Business of an Electric Utility in the State of Kansas in the Counties of Stevens, Grant, Finney, Kearny, and Hamilton.

On October 30, 2015, Southwestern Public Service Company (SPS) and Xcel Energy Southwest Transmission, LLC (XEST) filed a Joint Application with the Commission requesting authorization to transfer certain public utility assets and certificates from SPS to XEST. On May 25, 2016, Staff filed its Report and Recommendation analyzing the Joint Application, recommending approval subject to certain conditions. On June 3, 2016, the Joint Applicants filed a Motion for Withdrawal of Joint Application stating they would not be proceeding with the proposed transfer at this time. On June 21, 2016, the Commission approved an Order Granting Motion to Withdraw Application.

SOUTH CENTRAL MCN LLC

Docket number 16-SCME-227-COC
Docket type Electric
Date filed 02 Nov 2015
Action date 17 Mar 2016
Commission action Withdrawn

In the Matter of the Application of South Central MCN LLC for a Certificate of Public Convenience and Necessity.

On November 11, 2015, South Central MCN LLC (SCMCN) filed an Application for a Certificate of Public Convenience and Necessity limited to transmission rights only. On February 17, 2016, Staff filed its Report and Recommendation recommending that the Commission deny SCMCN's general certificate request. No party opposed

Staff's recommendation. On March 15, 2016 SCMCN filed a Motion to Withdraw Application stating the acquisition of the assets will take longer than it originally anticipated. On March 17, 2016, the Commission approved an Order Granting Motion to Withdraw.

KANSAS CITY POWER & LIGHT COMPANY

Docket number 16-KCPE-446-TAR
Docket type Tariff
Date filed 06 Apr 2016
Action date N/A
Commission action Not Final

In the Matter of the Application of Kansas City Power & Light Company For Approval of Its Demand-Side Management Portfolio Pursuant to the Kansas Energy Efficiency Investment Act ("KEEIA"), K.S.A. 66-1283.

On April 6, 2016, KCP&L filed an Application requesting approval of a suite of energy efficiency programs with an expected cost of \$29.6 million and also requesting recovery through its proposed Demand-Side Investment Mechanism Rider. On August 8, 2016, Staff, CURB, Westar, Climate and Energy Project, National Housing Trust, Atmos Energy, Black Hills Energy, Kansas Gas Service, and Brightergy filed direct testimony. On August 15, 2016, CURB and Staff filed cross-answering testimony. KCP&L filed rebuttal testimony on August 22, 2016. KCP&L filed Testimony in Support of Settlement of Non-Unanimous Stipulation and Agreement on August 31, 2016, and on September 12, 2016, filed corrections to its KEAA report.

Dockets

LARGE ELECTRIC UTILITIES (revenues of more than \$10M)

The Commission acted upon the following dockets filed by Large Electric Utilities from July 1, 2015 to June 30, 2016. These filings involved companies with operating revenues of more than \$10,000,000.

Natural Gas Utilities

Financials

The following are selected Rate Base, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis.

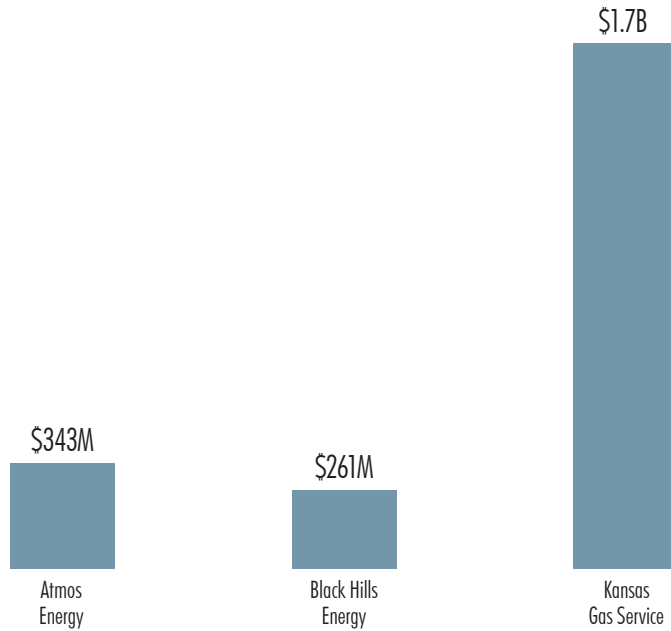

GAS COMPANIES STATEWIDE RATE BASE | 2011–2015

Rate Base is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total rate base of all regulated public utilities in Kansas for the past five years.

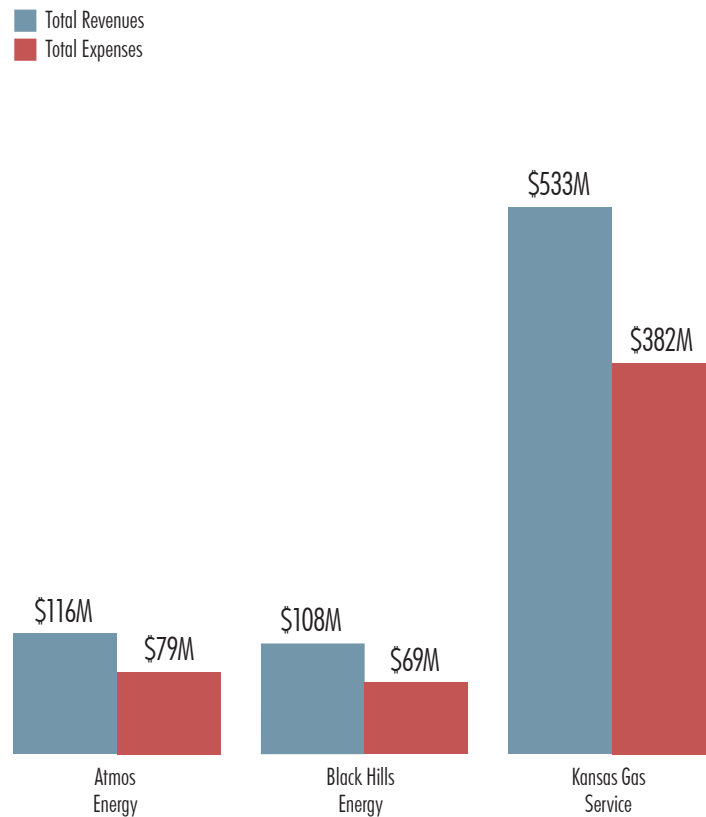

GAS COMPANIES RATE BASE, BY COMPANY | 2015

This chart takes the statewide aggregate rate base figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, one entity encompasses a vast majority of utility rate base across Kansas.

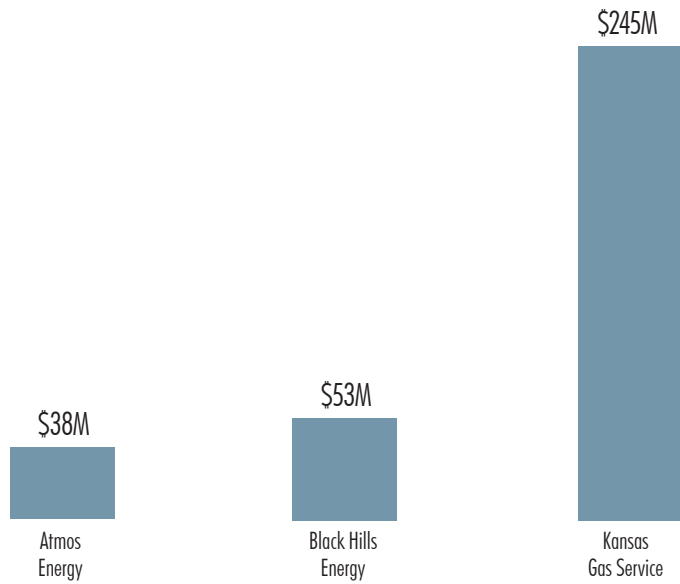

GAS COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2015

This chart compares each utility's annualized revenues and expenses and the difference between the two represents the gross margin of each company.

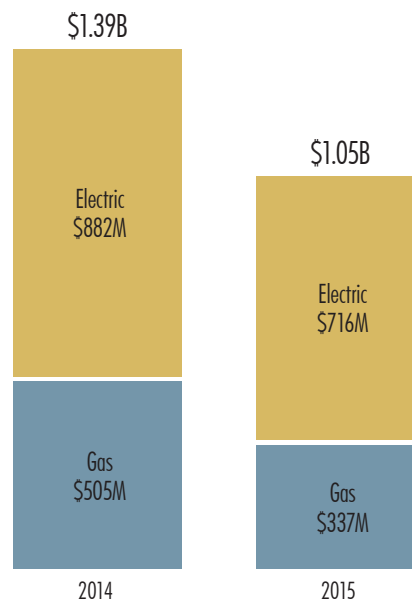

GAS COMPANIES PURCHASED GAS COSTS, BY COMPANY | 2015

This chart takes the expense portion from each utility on the previous table and carves out the cost of purchased gas.

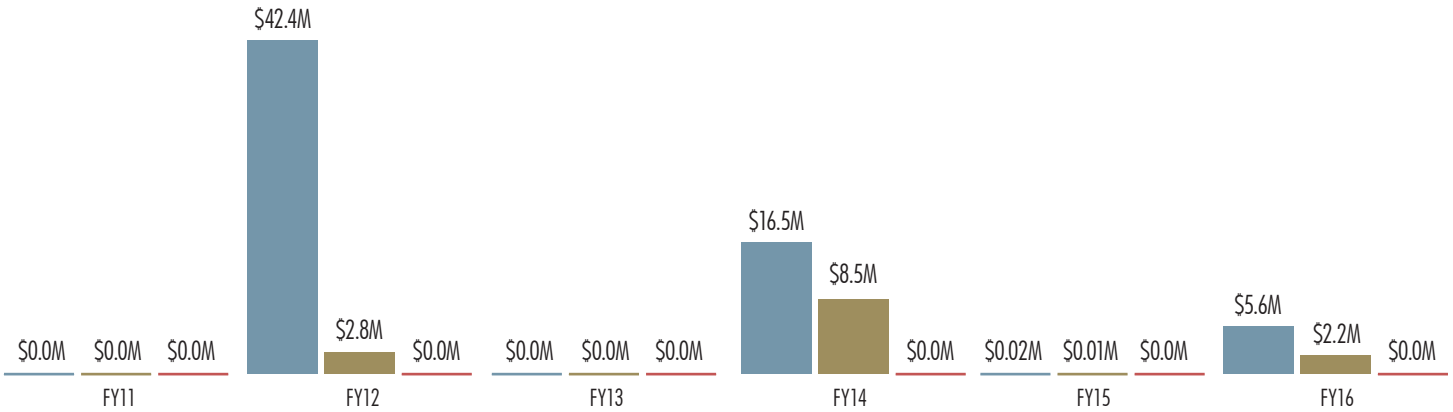

TOTAL PURCHASED GAS (GAS UTILITIES) AND TOTAL PURCHASED FUEL FOR GENERATION (ELECTRIC UTILITIES)

This chart shows the total natural gas purchased for utility use for the last two years. Each column bar is broken down into blue and yellow portions. The blue represents gas purchased by the gas utilities for regulated delivery to their retail and wholesale customers. The yellow represents natural gas “fuel” purchased by electric utilities for natural gas-fired generation of electricity. Whereas the bulk of retail gas use (blue) is for winter heating, utility gas fuel use is predominantly during peak electric usage summer months where baseload nuclear and coal generation have already been dispatched and the remaining load must be served by gas-fired generation.

Large Gas Rate Cases

ATMOS ENERGY CORPORATION

<i>Docket number</i>	<i>16-ATMG-079-RTS</i>
<i>Docket type</i>	<i>Gas</i>
<i>Date filed</i>	<i>13 Aug 2015</i>
<i>Action date</i>	<i>17 Mar 2016</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Application of Atmos Energy Corporation for Adjustment of its Natural Gas Rates in the State of Kansas.

On August 13, 2015, Atmos Energy Corporation (Atmos) filed its Application for a rate increase. Atmos requested a \$5.66 million increase in base rates, and a \$0.95 million surcharge for the recovery of rate case expenses, for a total revenue requirement increase of \$6.6 million. In addition to seeking approval of a rate increase, Atmos also sought approval to implement several alternative ratemaking proposals, including an Annual Review Mechanism (ARM) to reset the cost of service and rates on an annual basis; a System Integrity Program (SIP) tariff designed to accelerate progress in replacing obsolete materials in its distribution system; and a rate case expense surcharge to recover all rate case expenses from the current and previous cases over a year period.

On December 21, 2015, the parties filed their direct testimony. In its direct testimony, Staff recommended that the Commission increase Atmos' revenue requirement by \$1.49 million; and the Citizens' Utility Ratepayer Board (CURB) recommended a decrease of \$716,730. Both parties opposed Atmos' proposed ARM and rate case expense surcharge and suggested modifications of the SIP. Continuum Retail Energy Services, L.L.C. also filed testimony regarding revenue increases to transportation customers versus sales customers but did not take a position on the revenue requirement. On January 14, 2016, the parties met collectively to discuss the possibility of settlement of issues in this matter. After extensive negotiations, the parties agreed to a settlement of \$2.2 million, which included all rate case expense.

On March 17, 2016, the Commission approved an Order Approving in Part; Denying in Part Unanimous Settlement Agreement.

In its order, the Commission denied approval of the SIP tariff as it was presented in the settlement. However, the Commission did approve certain elements of the settlement that were, according to the signatories to the settlement, interdependent with the SIP. These elements included a three-year rate moratorium and abbreviated rate case provisions. On April 1, 2016, Atmos filed a Petition for Reconsideration and Clarification in which it asked the Commission to reconsider the denial of the SIP. On April 26, 2016, the Commission denied Atmos' Petition for Reconsideration. On May 19, 2016, Atmos appealed the decisions of the Commission to the Court of Appeals for the State of Kansas. On September 15, 2016, the Court of Appeals held that the Commission misinterpreted the settlement and remanded the case to the Commission for further proceedings. Per the Commission's request, Atmos, CURB, and Staff filed responses outlining their respective positions on the options available to the Commission on October 25, 2016. On December 22, 2016, the Commission issued its Final Order selecting the option that all parties agreed to in the responses filed on October 25, 2016. The Commission's Final Order affirmed all other rate provisions but denied the SIP and determined that Atmos would not be bound by the three-year moratorium or the abbreviated rate case provisions of the settlement. The Commission's Final Order also noted that the issue of the SIP will be determined in an ongoing general investigation, Docket No. 15-GIMG-343-GIG.

KANSAS GAS SERVICE

<i>Docket number</i>	<i>16-KGSG-491-RTS</i>
<i>Docket type</i>	<i>Gas</i>
<i>Date filed</i>	<i>02 May 2016</i>
<i>Action date</i>	<i>29 Nov 2016</i>
<i>Commission action</i>	<i>Approved</i>

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Adjustment of its Natural Gas Rates in the State of Kansas.

On May 2, 2016, Kansas Gas Service, a Division of ONE Gas, Inc. (KGS) filed an Application to make changes in its rates

and charges for natural gas service. KGS requested an increase of \$35,446,665. The net rate impact of this request to customers result in a \$27,985,168 increase after rebasing the amounts currently collected through the Gas System Reliability Surcharge (GSRS). KGS also requested to establish an annual rate mechanism referred to as a Cost of Service Adjustment (COSA) mechanism that would provide an annual review and adjustment of KGS's cost of service and actual return on equity; to discontinue its Pension and Other Post-Employment Benefits (OPEB) trackers; to share the savings between customers and shareholders that have resulted from pension expenses having been pre-funded; and new corporate asset depreciation rates. On September 7, 2016, the parties filed their direct testimony. In its direct testimony, Staff recommended an increase of \$12.1 million; and CURB recommended an increase of \$3.7 million. Both parties opposed KGS's COSA mechanism and its proposal to share pension expense savings, and Staff also opposed KGS's request to eliminate the Pension and OBEP trackers. CenterPoint Energy Services, Inc. also filed testimony recommending changes to KGS's tariffs relating to transportation services but did not take a position on the revenue requirement. On October 3, 2016, the parties met collectively to discuss the possible settlement of issues in this matter. After extensive negotiations, the parties agreed to an increase of \$15.5 million. An Order approving the Unanimous Settlement Agreement was filed October 5, 2016. On November 29, 2016, the Commission issued an order approving the unanimous settlement agreement.

The Commission acted upon the following dockets filed by Large Gas Utilities from July 1, 2015 to June 30, 2016. These filings involved companies with operating revenues of more than \$10,000,000.

HOWISON HEIGHTS, INC.

<i>Docket number</i>	<i>13-HHIW-460-GIV</i>
<i>Docket type</i>	<i>Water</i>
<i>Date filed</i>	<i>14 Jan 2013</i>
<i>Action date</i>	<i>N/A</i>
<i>Commission action</i>	<i>Not final</i>

In the Matter of the Investigation of Howison Heights, Inc's Ability to Provide Sufficient and Efficient Service.

On February 8, 2013, the Commission ordered an investigation into Howison's ability to provide sufficient and efficient service to its customers. This report is an update on the progress of events in this matter from October 2015 to October 2016.

Mr. Howison, Ottawa Rural Water District No. 2 (RWD #2), Central National Bank, and Bennington State Bank have signed an amended agreement transferring Howison Heights, Inc. to RWD #2. Eighty-eight percent of Howison's customers have agreed to be served by RWD #2. Construction of an interconnection between Howison's customers and RWD #2 is projected to begin in November 2016 and be completed in February 2017. The amended closing date transferring ownership to RWD #2 is February 27, 2017. All parties still need to sign the proposed amendment changing the closing date to February 27, 2017. This case remains before the Commission, and Staff continues to be actively involved in the monitoring and investigation of this utility.

GREEN ACRES MOBILE HOME PARK, LLC

<i>Docket number</i>	<i>16-STMW-273-CCS</i>
<i>Docket type</i>	<i>Water</i>

Major Dockets | LARGE TELECOM UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Telecom Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

GENERAL INVESTIGATION

Docket number 16-GIMT-067-GIT
Docket type Telecom
Date filed 20 Aug 2015
Action date 26 Jan 2016
Commission action Order Issued

In the Matter of An Investigation to Determine the Assessment Rate for the Twentieth Year of the Kansas Universal Service Fund, Effective March 1, 2016.

The KCC opened this proceeding to determine the appropriate assessment rate for the twentieth year of the KUSF. The KCC issued an Order on January 15, 2015, in which it: (1) approved the proposed Stipulation and Agreement; (2) adopted a KUSF assessment rate for March 1, 2016, through February 28, 2017, of 6.53 percent; and (3) cancelled the evidentiary hearing scheduled for January 27, 2016.

GENERAL INVESTIGATION

Docket number 16-GIMT-382-GIT
Docket type Telecom
Date filed 05 Apr 2016
Action date 22 Sep 2016
Commission action Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

This proceeding was opened on April 5, 2016, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 1, 2016. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an

Order on September 22, 2016, in which it determined that: (1) KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2015 and will be used in 2017 only for the provision, maintenance, and upgrading of facilities and services for which support was intended; and (2) Sage Telecom Communications, LLC shall be assessed a monetary penalty of \$2,250 for late-filed certification documents.

GENERAL INVESTIGATION

Docket number 16-GIMT-413-GIT
Docket type Telecom
Date filed 07 Apr 2016
Action date 07 Jun 2016
Commission action Order Issued

In the Matter of a General Investigation into the Adjustment of Intrastate Switched Access Charges Pursuant to the Federal Communications Commission’s Reforms, Effective July 1, 2016.

This proceeding was opened on April 7, 2016, to implement the adjustment of price cap, competitive Local Exchange Carrier (LEC), and rural LEC intrastate access rate modifications, effective July 1, 2016. The Commission issued an Order on June 7, 2016, adopting the Commission Staff’s recommendations.

GENERAL INVESTIGATION

Docket number 16-GIMT-468-GIT
Docket type Telecom
Date filed 26 Apr 2016
Action date 12 Jul 2016
Commission action Order Issued

In the Matter of an Investigation to Determine Intrastate Access Revenue Due to Rural Local Exchange Carriers.

This proceeding was opened on April 26, 2016, to determine that amount of intrastate access revenue, if any, due to rural local exchange carriers (RLECs). The Commission determined in Docket Nos.

12-GIMT-170-GIT and 13-GIMT-004-GIT that the FCC’s Order preempted K.S.A. 66-2005(c)(1), thereby not allowing reductions to intrastate access revenue to be recovered from the KUSF. The RLECs filed an appeal in Washington County, Kansas. After the Washington County District Court issued a Journal Entry affirming the Commission’s orders, the RLECs appealed the District Court’s Journal Entry to the Court of Appeals. On November 25, 2015, the Court of Appeals reversed in part, vacated in part, and remanded with direction. Therefore, the Commission opened this proceeding to determine how much intrastate access revenue was due to each RLEC. Each RLEC was directed to file documentation supporting any requested recovery of intrastate access revenue by July 1, 2016, or file notification of non-participation in the Docket by June 21, 2016. All of the RLECs that filed the appeal filed a notification of non-participation, declaring they are not seeking recovery of intrastate terminating access revenue denied to them in the aforementioned dockets. The Commission issued an Order on July 12, 2016, closing the docket.

GENERAL INVESTIGATION

Docket number 16-GIMT-511-GIT
Docket type Telecom
Date filed 24 May 2016
Action date 11 Oct 2016
Commission action Order Issued

In the Matter of an Investigation to Address CenturyLink’s CAF II and KUSF Support.

This proceeding was opened on May 24, 2016, to review CenturyLink’s Connect America Fund (CAF) II support and its impact on the Company’s annual KUSF support. In its Order opening the Docket, the Commission directed CenturyLink to file its proposed model, revised CAF II support offset calculations, 2015 enabled locations reported to the FCC, and its preliminary 2016 enabled data by July

1, 2016. CenturyLink filed the required documentation on June 30, 2016, and on August 16, CenturyLink filed a revised CAF II model. The Commission issued an Order on October 11, 2016: (1) adopting CenturyLink's August 16, 2016, CAF II model; (2) adopting the annual true-ups proposed by Staff, resulting in a net reduction to CenturyLink's KUSF support for January 2015 through February 2017; (3) directing CenturyLink to file its updated CAF II model, CAF II offset, KUSF support calculations, and supporting documentation by October 19, 2016; and (4) directing CenturyLink to submit an updated CAF II model, reflecting its 2016 enabled locations and preliminary 2017 enabled locations, and CAF II support offset, to the Commission in this Docket by May 1, 2017.

GENERAL INVESTIGATION

Docket number 16-GIMT-517-GIT

Commission action Pending

In the Matter of a General Investigation into the Implementation of Senate Substitute for House Bill 2131.

This proceeding was opened on June 7, 2016, to implement Senate Substitute for House Bill 2131, which was passed by the 2016 Kansas Legislature and went into effect on July 1, 2016. The Commission solicited comments and reply comments on Staff's initial Report and Recommendation. Staff filed a Report and Recommendation on July 29, 2016, based on the comments and reply comments filed. A Commission order is pending.

GENERAL INVESTIGATION

Docket number 16-GIMT-575-GIT
Docket type Telecom
Date filed 12 Jul 2016
Action date 18 Oct 2016
Commission action Order Issued

In the Matter of a General Investigation to Address Issues Concerning the Kansas Lifeline Service Program.

This proceeding was opened on June 7, This proceeding was opened on July 12, 2016, to solicit comments from the telecommunications industry regarding what changes, if any, it should make to the Kansas Lifeline Service Program

(KLSP) as a result of the recent changes made by the FCC to the federal Lifeline program. Following the filing of initial and reply comments, Staff filed a Report and Recommendation. The Commission issued an Order on October 18, 2016: (1) revising the KLSP eligibility criteria to mirror the federal Lifeline eligibility criteria, effective December 2, 2016, or the effective date of the changes to 47 C.F.R. § 54.400(j) and 47 C.F.R. § 54.409(a), if the FCC delays the implantation date; (2) requiring all mobile Eligible Telecommunications Carriers (ETCs) for state Lifeline purposes to request approval of their calling plans for the KLSP at least 30 days prior to offering such plans and receiving support from the KLSP; (3) not taking any action with regard to Broadband Internet Access Service and the KLSP; (4) moving the KUSF snapshot date from the last day to the first day of the month, effective December 2016; (5) requiring all KLSP providers to abide by the FCC's record retention rules in 47 C.F.R. § 54.417; (6) determining that Competitive Local Exchange Carriers (CLECs) should not be required to participate in the KLSP, and CLECs not receiving KLSP as of the date of the Order must be designated as an ETC in order to provide KLSP; (7) ceasing to require ETCs to utilize the KCC-approved Lifeline form and instead allowing ETCs to use an enrollment form of their own design that meets state and federal requirements until the FCC's standardized form becomes mandatory; (8) seeking additional comment on the issue of supported services; and (9) adopting the FCC's re-certification rules in 47 C.F.R. § 54.410(f) and de-enrollment rules in 47 C.F.R. § 54.405(e). Comments on the issue of supported services are to be filed by November 18, 2016, and reply comments are due by December 9, 2016.

GENERAL INVESTIGATION

Docket number 16-GIMT-587-GIT
Docket type Telecom
Date filed 14 Jul 2016
Action date 18 Oct 2016
Commission action Order Issued

In the Matter of a General Investigation Into the Adjustment of Intrastate Switched Access Charges for Rural Telephone Companies in Compliance with K.S.A. 2013 Supp. 66-2005(c) and FCC Reforms.

This proceeding was opened on July 14, 2016, to facilitate the adjustment of the

Rural Local Exchange Carriers' (RLECs) intrastate access rates and accompanying KUSF adjustments under K.S.A. 66-2005(c) with respect to originating switched end office and traffic sensitive transport. Direct testimony was filed by Commission Staff on September 21, 2016, recommending the following: (1) the intrastate originating switched access rates, calculated intrastate originating and terminating access revenues, net revenue changes, and Connect America Fund support offsets should be adopted; (2) the Commission should adopt a net aggregate \$411,976 reduction in the RLECs' annual KUSF support, effective July 2017; and (3) the access revisions should be effective July 2017, concurrent with the FCC's implementation of the July 2017 intercarrier compensation reforms. The Commission issued an Order on October 18, 2016, adopting the Commission Staff's recommendations.

GENERAL INVESTIGATION

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

This proceeding was opened on March 4, 2015, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 1, 2015. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an Order on September 24, 2015, in which it determined that: (1) KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2014 and will be used in 2016 only for the provision, maintenance, and upgrading of facilities and services for which support

was intended; and (2) the KCC Staff shall open a company-specific proceeding for Blue Valley Tele-Communications, Inc. for the purpose of evaluating whether a KUSF audit of the company is warranted.

GENERAL INVESTIGATION

Docket number 15-GIMT-436-GIT
Docket type Telecom
Date filed 14 Apr 15
Action date 04 Jun 15
Commission action Order Issued

In the Matter of a General Investigation into the Adjustment of Intrastate Switched Access Charges Pursuant to the Federal Communications Commission's Reforms, Effective July 1, 2015.

This proceeding was opened on April 14, 2015, to implement the adjustment of price cap and competitive Local Exchange Carrier (LECs) intrastate access rate modifications, effective July 1, 2015. The Commission issued an Order on June 4, 2015, adopting the Commission Staff's recommendations.

MOUNDRIDGE TELEPHONE COMPANY, INC.

Docket number 15-MRGT-097-KSF
Docket type Telecom
Date filed 03 Sep 2014
Action date 27 Apr 2015
Commission action Order Issued

In the Matter of the Application of Moundridge Telephone Company, Inc. for Additional Kansas Universal Service Fund Support.

Moundridge filed an Application requesting an increase of \$725,818 in its high-cost KUSF support on September 3, 2014. Direct testimony was filed on behalf of Commission Staff on January 20, 2015, recommending an intrastate revenue decrease of \$571,441. Since Staff's proposed revenue requirement was a reduction greater than the Company's KUSF draw, Staff recommended Moundridge's annual level of KUSF support be set at \$0. Rebuttal testimony was filed on February 4, 2015 on behalf of Moundridge stating that Moundridge is entitled to a KUSF revenue increase of approximately \$215,000. An evidentiary hearing was held on February 25, 2015. Moundridge filed its Post Hearing Brief on March 13, 2015, Staff filed its Closing Brief on March 20, 2015, and Moundridge filed its Reply Brief on March 27, 2015. The KCC issued an Order on April 27, 2015, finding that Moundridge is entitled

to negative \$220,533, therefore, the KCC set Moundridge's KUSF at zero. On May 6, 2015, Moundridge filed its Motion for Increased KUSF Support; Alternative Petition for Reconsideration; and Motion for Stay. The KCC issued its Order Denying Petition for Reconsideration; Denying Motion to Increase KUSF Support; and Denying Motion for Stay on June 4, 2015. Moundridge appealed the KCC's Order to the Kansas Court of Appeals. On November 25, 2015, the Court of Appeals affirmed the KCC's Order. (Moundridge Tel. Co. v. Kansas Corp. Comm'n, No. 114,064. 2015 WL 7693784 (Kan. Ct. App. Nov. 25, 2015) (Unpublished)).

TWIN VALLEY TELEPHONE, INC.

Docket number 15-TWVT-213-AUD
Docket type Telecom
Date filed 09 Dec 2014
Action date 10 Dec 2015
Commission action Order Issued

In the Matter of an Audit of Twin Valley Telephone, Inc. to Determine its Cost-Based Kansas Universal Service Fund Support Pursuant to K.S.A. 66-2008.

On December 9, 2014, the KCC ordered that Twin Valley be subjected to an audit to determine its cost-based KUSF. On October 16, 2015, following the filing of direct, errata and rebuttal testimony, Twin Valley and Commission Staff filed a Joint Motion requesting the KCC approve a partial stipulation and agreement, waive the evidentiary hearing, and determine the lost FUSF support impact. The KCC issued an Order on October 27, 2015, approving the partial stipulation and agreement. On November 12, 2015, Twin Valley and Commission staff filed briefs on the remaining issue of the lost FUSF support, and Twin Valley also filed its documentation of audit expenses. On December 10, 2015, the KCC issued an Order denying Twin Valley's request for an annual increase of \$856,627 in KUSF support due to the decrease in FUSF support, but approving Twin Valley's request for the recovery of additional audit expenses. The KCC authorized a \$14,688 annual increase in Twin Valley's KUSF support, effective January 1, 2016. The KCC's orders contain a provision for recovery of a total of \$212,480 in audit expense, which shall be amortized over five years. Twin Valley appealed the KCC's

Order to the Kansas Court of Appeals. On June 17, 2016, the Court of Appeals affirmed the KCC's Order. (Twin Valley Telephone, Inc. v. Kansas Corp. Comm'n, No. 115,284. (Kan. Ct. App. June 17, 2016) (Unpublished)).

Dockets

Docket type Telecom
Docket filed 29 Apr 2016
Action date 17 May 2016
Commission Action Approved

In the Matter of the Application of Gorham Telephone Company Filing Revisions to Add Calling Features and Remove Services no Longer Available.

Transportation

The role of the Transportation Division of the Kansas Corporation Commission (KCC) is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection to the extent not preempted by federal law.

Motor Carriers

The chief responsibility of the Transportation Division is to develop, modify and implement licensing, auditing, inspection and other administrative procedures that promote safe and efficient motor carrier operations, while balancing public interest and minimizing administrative burdens to the extent possible. Likewise, State law requires the KCC to verify that each new motor carrier is in compliance with the Commission's safety rules and regulations within 18 months of granting the motor carrier Commission operating authority. To advance the Division's established mission, Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The Transportation Division also works closely with the Kansas Highway Patrol (KHP) and the Federal Motor Carrier Safety Administration (FMCSA) to reduce accidents involving motor carriers through promotion of safety education to the motor carrier industry and oversight of State and Federal regulations.

Regarding safety education, the KCC sends e-mails and postcard invitations to each Kansas-based motor carrier that applies for and receives a new USDOT number. The invitations are mailed monthly and are designed to encourage the new motor carriers to attend the free Commission-sponsored Safety Seminars focused on the state and federal motor carrier rules and regulations. KCC Special Investigators (SIs) conduct the educational safety seminars throughout Kansas six times per month. Currently, motor carriers may attend one of these seminars in Bonner Springs, Topeka, Chanute, Hutchinson, Hays or Garden City. These seminars are designed to inform and educate new, existing, and out-of-compliance motor carriers of the Commission's rules and regulations. Additionally, the Transportation Staff conducts educational safety seminars for the graduating classes at the truck driving technical schools in Liberal, Kansas City, Topeka, Wichita, and Fort Scott.

Since the inception of the federal Comprehensive Safety Analysis (CSA) program, the FMCSA has responded to concerns from industry and enforcement by updating the program in an effort

to improve their motor carrier safety compliance program. The goal of the CSA program has been to intervene early enough in a motor carrier's operation to permit the identification of problem areas and an opportunity for the motor carrier to correct the concerns before an accident occurs. The Federal New Entrant program requires all motor carriers seeking a federal interstate USDOT number to pass a safety audit within 12 months of beginning operations.

The CSA program focuses on 16 regulations that are considered essential to a motor carrier's basic safety plan and therefore necessary to operate in interstate commerce. The CSA audit uses on-road safety performance data to measure a carrier's safety fitness. The data is classified into seven specific categories of carrier/driver behavior to include: unsafe driving; fatigued driving (Hours of Service violations); driver fitness concerns; controlled substances/alcohol programs; vehicle maintenance concerns; cargo-related safety concerns; and the carrier's crash indicator. A motor carrier's failure to comply with any one of the 16 regulations results in an automatic failure of the safety audit.

A motor carrier who fails a new entrant safety audit is provided formal notice of the failure and 60 days to correct the problems identified. Only those carriers who fail to correct the problems or who fail to request either additional time or a formal review are subject to revocation of the carrier’s interstate operating authority. On the other hand, a carrier who passes the review is moved to the bottom of the review list until such time as the carrier’s safety indicators decline and require official intervention.

Regarding motor carrier safety, the KCC, the Kansas Department of Revenue and the Kansas Highway Patrol implemented a system aimed at halting the intrastate motor carrier operation of those interstate carriers who have failed to meet the minimum safety requirements of a New Entrant Safety Audit. The KCC Staff will formally recommend that the Commission suspend a carrier listed on a federal out-of-service order. The Director of Vehicles will issue a “tag pick-up” request to the Kansas Highway Patrol.

The KCC, KHP, KDOR and FMCSA share responsibilities in the oversight of both the state and federal motor

carrier safety and economic rules and regulations. This partnership has proven to be extremely efficient and effective in contacting more carriers and drivers and in identifying high risk carriers and drivers. As a result, it is possible for the FMCSA and state oversight agencies to apply a wider range of interventions aimed at correcting high risk behavior.

These efforts have been rewarded with a measurable reduction in the number of carriers operating in an unsafe manner as well as an improved rate of compliance among Kansas carriers when compared to states in the surrounding region. The following charts, compiled from data provided by the FMCSA, demonstrate a couple of the metrics we use to measure the effectiveness of our safety education classes and enforcement mechanisms.

The chart below illustrates the number of “unsatisfactory carriers” found over the past three years. Unsatisfactory carriers are those who have been found to have committed violations of applicable regulations after a compliance review, have a proposed unsatisfactory or have been rated unsatisfactory by the FMCSA. The results for the ten states

in the Midwest region demonstrate Kansas has the 3rd lowest percentage of compliance reviews with an “unsatisfactory” outcome over the past three years. Kansas is also very close statistically to the two states that had slightly lower percentages.

The chart on the following page provides a FMCSA Motor Carrier Management Information System (MCMIS) data snapshot of the number of Kansas domiciled carriers involved in crashes in Kansas. Crashes involving Kansas domiciled carriers – those that are required to take the safety education program we provide – represent a much smaller percentage of the total crashes in Kansas than the nationwide trend. In 2014 and 2013 the numbers were even starker with a difference of -24.4% and -22.8% (respectively) compared to the national average. Essentially, Kansas carriers represent a much smaller percentage of our total crashes than most other states are experiencing. These numbers provide a testimony to the success of the KCC’s safety programs that reach both interstate and intrastate carriers.

UNSATISFACTORY CARRIERS FOR THE YEARS 2013-2015 IN THE MIDWEST REGION			
STATE	REVIEWS	PROPOSED UNSATISFACTORY	UNSATISFACTORY RATING
Nebraska	388	19	4.80%

Commercial Driver’s License (CDL) Reciprocity Agreements

Currently, Kansas has active agreements with our counterparts in Missouri, Nebraska and Oklahoma. Kansas has entered into Reciprocity Agreements which permit Kansas farmers to operate their commercial driver’s license (CDL) class commercial motor vehicles (CMV) in interstate commerce within 150 miles of the farmers place of operation without the necessity of obtaining a CDL under certain conditions. A farmer may benefit under this exemption when the farmer operating a vehicle holds a valid driver’s license in the farmer’s home state and the vehicle is properly operated as a farm vehicle under the laws of the state. The vehicle must be registered as a farm vehicle and be controlled and operated by a farmer for the exclusive purpose of transporting agricultural products, farm machinery, and/or farm supplies to or from the farmer’s farm. The federal statutory provisions in the Moving Ahead for Progress in the Twenty-First Century (MAP-21) legislation were self-executing and took effect on October 1, 2012. This exemption eliminates the need for our CDL Reciprocity agreements for the purpose of safety regulations; however, farm vehicle drivers still need the agreements for the Hazardous Materials exemptions. We continue to work on a

similar agreement with representatives from Colorado.

Due to MAP-21, our CDL Reciprocity Agreements are more important than ever. Currently if farmers transport Hazardous Materials in interstate commerce they are not allowed to use the MAP-21 exemptions. Our agreements allow a farm vehicle driver to operate up to a 150 air-mile radius from the farm in interstate commerce without requiring a commercial driver’s license (CDL) and without registering in a Substance and Alcohol Testing program. The Transportation Division is currently working with the Department of Revenue to resolve this issue.

Civil Assessment Program

In 2006, the KCC and KHP partnered to enhance the Kansas Safety Compliance Program with the goal of reducing the number of injury/fatality accidents involving Commercial Motor Vehicles. The Civil Assessment Program was designed and implemented for the purpose of distinguishing the responsibilities of drivers from those of the motor carriers under the Federal Motor Carrier Safety Regulations’ (FMCSRs) “Out-Of-Service” violations. Out-of-Service (OOS) violations are violations designated as serious by the Commercial Vehicle Safety Alliance (CVSA), and require that a driver or

vehicle be removed from service until the violations are corrected. CVSA is a non-profit organization consisting of federal and state regulatory agencies, motor carrier industry, and representatives dedicated to improving motor carrier safety.

STRATEGIES

The program focuses on the safety of the driver, equipment and the traveling public. The KCC and KHP work together on enforcement and education regarding OOS violations of the FMCSRs discovered during roadside inspections. The KCC will only issue one civil penalty for each OOS violation category. For example, if the truck-tractor of a combination vehicle is placed OOS for brakes and the trailer is also placed OOS for brakes, the company will be documented for both OOS violations, but only fined for one. The KHP and KCC will allow the civil assessment to be waived for OOS violations that are outside the obvious normal method of company operations. The KHP Trooper or local enforcement officer will have the ability to provide information to recommend that no civil assessment be issued. If the carrier has demonstrated, at the roadside inspection, that the violation was 1) potentially unavoidable; 2) the carrier has processes in place to prevent the violation; and 3) the carrier clearly has the means to correct the violation, the Trooper/Officer may recommend no civil

assessment be issued. In all cases, the field decision may be superseded after the inspection is reviewed.

OBJECTIVE

The effectiveness of the roadside inspection program is based on information provided by the FMCSA Analysis and Information (A&I) database. The data is based on roadside inspections from both Kansas and foreign based motor carriers. The State of Kansas experienced an 18% decrease in roadside inspections between the Federal fiscal year (FFY) 2012 and FFY 2016 (the most recent information as of 9/23/2016*). While the number of inspections decreased, the OOS rate for drivers also decreased from a 5.43% in 2012 to 5.27% in 2016. The vehicle OOS rate experienced a slight increase from 14.51% in 2012, to 15.18% in 2016. Our continued education efforts are designed to help maintain downward OOS trends, or actively correct short term OOS rate increases for our Kansas based motor carriers. (*The FFY ends 9/30/2016.)

Nationally, A&I information indicates Kansas continues to have a slightly higher driver OOS rate of 5.27% compared to the National driver OOS rate of 4.93%. For the vehicle OOS, Kansas continues to have significantly lower vehicle OOS rate of 15.18% compared to the National vehicle OOS rate of 20.11%. In hazardous materials (HM) OOS, Kansas maintains a slightly lower OOS rate of 3.66% compared to the National HM OOS rate of 3.97%. These numbers reflect a continuing downward trend in driver and vehicle OOS rates both nationally and Statewide.

Federal Unified Carrier Registration (UCR)

HISTORY

The Unified Carrier Registration (UCR) Agreement is found in 49 USC 14504a (hereinafter referred to as section 14504a). The UCR Agreement is established by federal law in the

UCR Act, which is part of the federal highway reauthorization bill known as the Safe, Accountable, Flexible, Efficient Transportation Equity Act, A Legacy for Users (“SAFETEA-LU”), Public Law 109-59, enacted August 10, 2005.

The UCR Act is sections 4301 through 4308 of SAFETEA-LU. In particular, the structure of the UCR Agreement is set forth in section 4305 of the UCR Act, which enacts section 14504a as a new section in 49 USC.

The UCR Agreement was amended under Section 301 of the SAFETEA-LU Technical Corrections Act of 2008, Public Law 110-244, enacted June 6, 2008, and in the Rail Safety Improvement Act of 2008, Public Law 110-432, enacted October 16, 2008. As of September 2011, SAFETEA-LU is currently under extension awaiting a new act of Congress. In the meantime, UCR remains in full force and effect and compliance is mandatory.

SUMMARY

Forty one states submitted a state plan to the Secretary prior to the August 10, 2008, deadline and are eligible to participate in the UCR agreement. The federal UCR agreement requires all for-hire motor carriers transporting property or passengers, and motor private carriers transporting property in interstate commerce, as well as brokers, freight forwarders, and leasing companies to register with the United States Department of Transportation and pay UCR fees. Wholly intrastate carriers and private motor carriers transporting only passengers are not subject to UCR fees.

The UCR fees are structured based on fleet size, and trailers have been permanently removed from the fee calculation. Oversight of non-payment of UCR fees began January 1, 2009, and is conducted through KHP compliance verification at roadside inspections, at Ports of Entry and through the KCC Transportation Division Compliance Reviews. Additionally, the Transportation Division mails notices to each Kansas-

based motor carrier which acknowledges interstate activity on its USDOT profile, but has not registered or paid UCR fees for the appropriate year.

PURPOSE

Collection of UCR fees directly affects a state’s receipt of its allotment of federal funds. These funds are used specifically for the enforcement of Kansas motor carrier safety programs. Kansas is focused on making the UCR program work as effectively and efficiently as possible. The Transportation Staff closely monitors the program and participates through quarterly conference calls with the FMCSA and fellow state representatives. Staff has consistently responded to any calls for assistance and has shared information now found in the program’s oversight best practice guide. Kansas remains dedicated to this program and is annually ranked among the top states for compliance with the UCR as measured by the registration of motor carriers.

The charts on the following pages demonstrate the success of the Transportation Division’s UCR compliance efforts. For the last three years, Kansas has been in the top ten jurisdictions in North America based on the number of Kansas carriers compliant with the UCR registration requirements. For that period, Kansas was also the #1 jurisdiction in the United States.

Kansas Trucking Regulatory Assistance Network (KTRAN)

FEDERAL GRANT

The Kansas Department of Revenue (KDOR) is the lead agency for the Kansas Commercial Vehicle Information Systems and Networks (CVISN) program. Other agencies involved in the Kansas Expanded CVISN Program Plan are the KCC, KHP and KDOT. These agencies have a longstanding relationship and have partnered on numerous projects in the past. The CVISN team shares a strategic vision which includes providing unparalleled customer service; safety compliance education; and effective, balanced enforcement of our state motor carrier rules and regulations.

BACKGROUND

In May of 2009, the FMCSA reviewed and accepted the KDOR Core CVISN Program Plan/Top-Level Design and certified Kansas as Core CVISN compliant. The mission of the Kansas CVISN program is to create an information network using advanced technology that will enhance efficiency, safety, compliance, and enforcement

for commercial vehicle operations. The information network includes the exchange of information and ideas between the government partners and the motor carrier industry. CVISN initiatives will promote the economic well-being of Kansas by facilitating the movement of goods for business and industry. The Kansas CVISN team is dedicated to applying cost-effective, intelligent transportation technologies and streamlining of existing processes that will improve transportation safety and administrative efficiency for both the motor carriers and the state.

In February 2010, the FMCSA announced the availability of \$17,000,000 in additional CVISN grant funds. Additional federal funds under Section 4126(d)(3) provides up to \$1,000,000 in funding for States to deploy, operate, and maintain elements of their CVISN programs. The elements include the commercial vehicle, commercial driver, and carrier specific information systems and networks. The KCC made a timely application seeking \$1,000,000 in grant funding. The grant requires a 50% soft match and the Transportation Division’s budget will be used for that match.

PROJECT SUMMARY

The KTRAN project will serve to further integrate information about Kansas motor carriers, commercial vehicles and commercial drivers. For example, roadside enforcement will be able to access KCC authority information through Kansas Commercial Vehicle Information Exchange Window (CVIEW) query windows utilizing a new system-to-system interface built as part of this project. Further, KCC officials will be automatically notified of PRISM OOS status changes as well as having a real-time interface to KSCVIEW for PRISM checking of carriers and vehicles prior to issuing KCC authorities.

Additionally, this project will serve to enhance the Kansas E-Credentialing capability through establishing an interactive process whereby carriers are walked through a logical set of questions to determine what authorities, forms and processes need to be followed to meet the carrier’s needs. The project will build an intelligent, interactive front-end to the TruckingKS.org portal, thus creating a more efficient business process for carriers and state motor carrier personnel. The phases of this project include:

- Creating a porting system into a modern database environment with Internet-based functionality. (Public-facing functions allowing for electronic submission of information.)
- Developing a “wizard” based portal to provide carriers with a question and answer process to obtain information needed to conduct online motor carrier business in Kansas. A preliminary interview of the user would determine which credentials and authorities are needed.
- Establishing key system interfaces with other agencies to share information. This activity includes developing PRISM functionality for testing intrastate carriers prior to issuing KCC authorities and tying civil assessments to renewals and roadside enforcement activities.
- Developing a real-time link to KSCVIEW to provide roadside enforcement with improved access to permit information and intrastate operating authority data.

SUMMARY OF WORK PERFORMED

The KCC completed the Subproject I – Detailed Design for the KTRAN project. The detailed design included requirements for the wizard, modules, and data interfaces with other state agencies. They developed a KTRAN flyer to communicate to motor carriers and stakeholders about the KTRAN project, benefits, and timelines. The KTRAN project team held a meeting with the KTRAN Project Advisory Group to present the KTRAN project progress, timelines, and obtain feedback for requirements for the KTRAN modules.

The web-based wizard will give motor carriers the capability to determine what is required to conduct business as a motor carrier based in Kansas. The modules and templates completed were the Drivers module that will enable drivers to apply for and manage their

waivers; correspondence templates to create ad hoc and form correspondence; Correspondence module that will provide tools for creating, managing, and producing correspondence; Compliance and Training module that will encompass the functions required to manage compliance reviews and safety training seminars; Unified Carrier Registration (UCR) module that will let a motor carrier pay their UCR in the KTRAN system via the INK and the Financial module that will display the motor carriers fees, fines, and penalties. The KTRAN project team also completed the design of the agency and public user interfaces.

The KCC worked and finalized data agreements and interface control documents with several state agencies, including the KHP, Kansas Secretary of State, and the KDOR to establish system-to-system interfaces that will allow the state agencies the exchange of information needed for regulatory compliance and roadside enforcement.

The KCC developed the KTRAN Subproject II detailed project plans and submitted them to the Chief Information Technology Officer (CITO) for approval. The KCC received approval on June 9, 2015, to begin the system development, testing, and implementation.

The KCC started the development of the KTRAN system completing the database design as well as the database. The KCC has also completed the Wizard, which is a web-based application for potential motor carriers to answer a series of questions to determine what is required to conduct business in Kansas, as well as the interface with the Kansas Secretary of State to obtain whether a motor carrier is in “good standing.” The Fleet module that provides the motor carrier the ability to manage their vehicle fleets has also been completed and includes functionality for adding, deleting, or transferring vehicles using the most current information available from the Kansas Department of Revenue via the Kansas Commercial Vehicle Information Exchange Window

(CVIEW). The Correspondence module was completed that provides tools for creating, managing, and producing correspondence and the Driver module for the driver to apply for and manage their medical waivers.

The KCC is developing and testing the Customer Account module for the motor carrier to apply for authority, Financial module that displays and accepts payments for fees, fines, civil assessments, and penalties, and the Unified Carrier Registration (UCR) module that will allow motor carriers to pay their UCR fees.

GRANT AMENDMENT, AND MODIFICATIONS OF ACTIVITIES

The desired grant modification is a schedule and budget modification which accounts for a new, revised project end date of February 23, 2017, and budget revisions between Object Class Categories (Personnel, Fringe Benefits, Supplies, and Contractual) pending FMCSA approval.

The KTRAN system was originally going to be developed using all outside programming consultants. After the high-level requirements were completed, the KCC determined it needed to contract for a requirements analyst to develop the detailed-level requirements. Using in-house programmers with extensive knowledge of existing systems benefit building the system instead of using all outside programming consultants. Budget revisions included adding \$315,309 to the Personnel Category, \$117,867 to the Fringe Benefits Category, \$19,250 to the Supplies Category and decreasing the Contractual Category to \$547,574.

The Personnel and Fringe Benefits Budget revisions include the cost for four Full Time Equivalent (FTEs) KCC employees and all of the costs pertaining to these employees over the three-year grant period.

The KCC budgeted \$40,000 to purchase a server to enable the KTRAN system to align with the KCC’s agency-wide

enterprise modernization effort, which includes server virtualization and enterprise software components. The KCC determined that its current servers could be used for the server virtualization for the KTRAN system.

The KTRAN system resides on an Oracle database and the KCC Docket system resides on a Microsoft SQL Server database. The two systems need to interface with each other to provide real-time information for KCC Staff to determine whether to grant KCC authority to motor carriers. In addition, the software will allow for the sharing of information with partner agencies to check compliance with KCC regulations when motor carriers are conducting business or when vehicles are stopped on the roadside. The cost of the Oracle Bridge software with two years of annual support is \$27,720.

The KCC requested and received a grant modification on April 7, 2016,

to the grant agreement for a budget revision between Object Class Categories (Personnel, Fringe Benefits, and Contractual). The KTRAN Customer Account module is being developed by internal KCC staff that has been pulled to work on other KCC agency critical systems. After development of the Customer Account module started it was determined that the programming of the Customer Account module was more complex and additional time was needed to complete the module. Based on Staff being pulled to work on other agency critical systems and the added complexity of the Customer account module the timeline has been pushed out by three months.

The KCC Staff programmer that is working on the Customer Account module was scheduled to start programming of the Financial module once the programming of the Customer Account module was completed and the

KCC testers were testing the Customer Account module. Since the Customer Account module has been delayed the programming of the Financial module will not begin at the scheduled time and the internal KCC Staff programmer scheduled to work on this module will not be able to do so.

Due to the KCC Staff programmer being pulled to work on other KCC agency critical systems, the added complexity of the Customer Account module, and the Financial module not being able to start on the scheduled time, the KCC hired a contract programmer for six months to complete the Financial module. The KCC moved monies from the Personnel and Fringe Benefits Categories to the Contractual Category. Budget revisions include increasing the Contractual Category to \$646,574 and decreasing the Personnel Category to \$252,939 and the Fringe Benefits Category to \$81,237.

Conclusion

The Transportation Division has undertaken significant efforts to enhance the oversight responsibilities within its purview and has made significant improvements in motor carrier safety and economic regulation. The Transportation Division continues to explore ways to enhance and refine its role to the benefit of the motor carrier industry and the Kansas public.

The Commission acted upon the following Transportation filings from July 1, 2015 to June 30, 2016. These filings pertained to rates, operating authority, and safety-related matters for motor carriers.

MOTOR CARRIERS

Docket number 15-TRAM-435-PEN
Docket type Transportation
Docket filed 05 May 2015
Action date 24 Nov 2015
Commission Action Reinstated

In the Matter of the Investigation of Prairie Trucking & Excavation LLC of Holton, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 14-TRAM-265-OOS
Docket type Transportation
Docket filed 10 Dec 2013
Action date 10 Dec 2015
Commission Action Reinstated

In the Matter of the Emergency Suspension of Operating Authority of Dustin L. Fisher, d/b/a Fisher Harvesting of Pratt, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 16-TRAM-256-OOS
Docket type Transportation
Docket filed 01 Dec 2015
Action date 01 Dec 2015
Commission Action Suspended

In the Matter of the Emergency Suspension of Operating Authority of R P M Transports, LLC of Topeka, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 16-TRAM-257-OOS
Docket type Transportation
Docket filed 01 Dec 2015
Action date 01 Dec 2015
Commission Action Suspended

In the Matter of the Emergency Suspension of Operating Authority of Jody Guliford, d/b/a The Rubber Kings Tire Company of Wichita, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 16-TRAM-274-PEN
Docket type Transportation
Docket filed 05 Jan 2016
Action date 05 Jan 2016
Commission Action Fined

In the Matter of the Investigation of Fibernet Inc. of Lenexa, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 16-TRAM-280-PEN
