

UTILITIES AND COMMON CARRIERS

ANNUAL REPORT

2018

We serve the people of Kansas...

The mission of the Kansas Corporation Commission is to serve the people of Kansas by regulating the State's energy infrastructure, oil and gas production, and commercial trucking to ensure public safety.

Our vision is a Kansas served by safe, reliable, environmentally responsible, diverse energy supplied at the lowest cost and for safe travel for the motoring public.

About the KCC

Established in 1883 to regulate railroad activity, the Kansas Corporation Commission (KCC) was one of the first state regulatory bodies in the nation. In 1911, the Kansas Legislature created a three member Public Utilities Commission to regulate telegraph and telephone companies, pipeline companies, common carriers, water, electric, gas, and all power companies with the exception of those owned by municipalities.

The present regulatory body was established by the Legislature in 1933. Over the years, its jurisdiction was extended to include motor carriers, gas conservation, and supervision of plugging abandoned wells to protect fresh and useable water from pollution.

Today, the KCC regulates five cornerstone industries in the Kansas economy. The Commission has the responsibility of ensuring that natural gas, electricity, telephone, and transportation vendors provide safe, adequate, and reliable services at reasonable rates. The Commission also has the mandate of ensuring that oil and gas producers protect correlative rights and environmental resources. The authority of the Kansas Corporation Commission is derived from KSA 74-601 to 74-631.

The Commission is comprised of three members who are appointed by the Governor and confirmed by the Senate. Members serve staggered four-year terms. Law provides that no more than

two of the three commissioners may belong to the same political party. Commissioners elect one of their colleagues as Chair. The work of the Commission is supported by the KCC Administrative Division, Public Affairs and Consumer Protection, Utilities, Conservation, Transportation, and Energy.

The KCC does not regulate most electric cooperatives, water cooperatives, municipalities, wireless telephone, long distance service, cable companies, or the internet.

Current KCC Leadership

Pat Apple
Chairman

Pat Apple was appointed to the KCC by Governor Brownback on March 24, 2014. He was elected Chairman on January 12, 2017. His term expires on March 15, 2018.

Commissioner Apple served in the Kansas Senate from 2005 to 2014, where he provided leadership in many capacities including Chairman and Vice-Chairman of the Utilities Committee. He also served on the Assessment and Taxation Committee, Commerce Committee, Confirmation Oversight Committee, Vice-Chair of Kansas Electric Transmission Authority, 911 Coordinating Council, and Chair of Telecommunications Study Committee. Commissioner Apple currently serves as the Kansas representative for the Interstate Oil and Gas Compact Commission.

Commissioner Apple's prior public service includes Miami County Commission 2003-2005 and USD 416, Louisburg Board of Education 1991-2003.

Shari Feist Albrecht
Commissioner

Shari Feist Albrecht was appointed to the KCC by Governor Brownback on June 25, 2012. She served as Chair from January 9, 2014, to January 14, 2016. Albrecht was reappointed to a second four year term, which expires on March 15, 2020.

Albrecht served at the Kansas Department of Health and Environment from 1993 to 2012. Previously at the KCC, Albrecht held the positions of Director and Deputy Director of the Conservation Division, chairing numerous committees, including the Oil and Gas Advisory Committee. She also served as Acting General Counsel, Assistant General Counsel, and staff attorney for the Transportation Division.

Albrecht is President of the Regional State Committee of the Southwest Power Pool and serves on the Advisory Board of the Financial Resources Institute. She is a member of NARUC, serving on the Gas Committee, Subcommittee on Pipeline Safety, and the Washington Action Committee. She is also a member of the Advisory Council of the New Mexico State University Center for Public Utilities and of the Energy Bar Association.

Albrecht earned a bachelor of arts degree in Spanish literature from KU in 1982. She graduated from WU School of Law in 1984 and is licensed in Kansas, the U.S. District Court for Kansas, and the U.S. Supreme Court. Albrecht and her husband live in Topeka and attend Faith Lutheran Church.

Jay Scott Emler
Commissioner

Jay Scott Emler was appointed to the KCC by Governor Brownback on January 8, 2014, to fill an unexpired term ending March 2015. He served as Chairman from January 14, 2016, to January 12, 2017. Emler was confirmed for a four year term, which expires on March 15, 2019.

Emler previously served in the Kansas Senate where he was elected Senate Majority Leader. He represented the 35th District in central Kansas for 13 years. Emler also served as Chairman of both Ways and Means and Utilities committees. Prior to the Senate, he was Vice President and General Counsel for Kansas Cellular.

He is the past national Chairman of the Council on State Governments. He also served on Governor Brownback's transition team.

Emler is a graduate of Bethany College, Lindsborg, where he earned a bachelor's degree and teaching certificate. He earned his law degree from the University of Denver, College of Law. In addition, Emler holds a master's degree in security studies from the Naval Postgraduate School in Monterey, California.

Emler and his wife Lorraine live in McPherson County, where they operate a small family farm and belong to Bethany Lutheran Church.

Utilities Overview

The Utilities Division is responsible for administering the laws and regulations applicable to jurisdictional electric, natural gas, telephone, and water utilities. The Utilities Division is comprised of four sections that are responsible for providing recommendations and advice to the Commission to promote and ensure sufficient, efficient, and safe utility services at reasonable and non-discriminatory rates to consumers.

The four sections within the Utilities Division are Accounting and Financial Analysis, Economics and Rates, Energy Operations and Pipeline Safety, and Telecommunications. These sections are responsible for the following:

1. The Accounting and Financial Analysis section is responsible for investigating, analyzing and making recommendations to the Commission on accounting and financial issues relating to the electric, natural gas, telecommunication, and water industries. These issues include the development of a revenue requirement for rate cases and KUSF audits as well as yearly surcharge filings. The section is also involved in Federal Energy Regulatory Commission (FERC) cases and participating in Southwest Power Pool workgroups.
2. The Economic Policy and Rates section is responsible for investigating and making recommendations on economic issues relating to the natural gas, electric, and telecommunications industries to the Commission as well as the Kansas Legislature and other state agencies. In rate cases, this section is

also responsible for evaluating the cost of service and developing a rate design.

3. The Energy Operations and Pipeline Safety section provides technical expertise relating to electric utility operation, reliability, safety, electric transmission siting, and electric and gas consumer service as well as analyzing requested changes to natural gas and electric certificates. The section has primary responsibility to ensure safe operation of all gas utilities through enforcement of federal and state pipeline safety regulations. The section also has the responsibility to ensure the safe operation of electric utilities under the provisions of K.S.A. 66-101h.
4. The Telecommunications section is responsible for researching, investigating, analyzing, and making recommendations on courses of action for all telecommunications matters that come before the Commission. This section is also involved in Federal Communications Commission cases and participating on NARUC subcommittees and Federal-State Joint Boards.

Major Issues for FY 2017

KANSAS CITY POWER & LIGHT ACQUISITION OF WESTAR ENERGY

- On June 28, 2016, Kansas City Power & Light (KCP&L) filed a Joint Application with Westar Energy (Westar) seeking the Commission's authority for Great Plains Energy (the parent company of KCP&L) to acquire Westar Energy. The proposed transaction was structured such that Great Plains Energy (GPE) agreed to pay \$51 in cash and \$9 in GPE common stock for each share of Westar's outstanding stock, which equated to a cost of approximately \$8.6 billion. In addition, GPE was to assume Westar's debt totaling \$3.6 billion, which brought the total purchase price to \$12.2 billion. Included within the \$12.2 billion purchase price was an acquisition premium (excess of purchase price over the original net book value of Westar's assets) of \$5 billion, which was approximately 233% over Westar's original net book value. In order to finance the transaction, GPE planned on issuing \$4.4 billion in new debt along with assuming the \$3.6 billion in existing Westar debt.

• On December 16, 2016, Staff and Intervenor testimony was filed. Each party opposed the merger based on similar grounds. From Staff's perspective, the proposed transaction could not be approved even with conditions due to several fundamental flaws. These flaws were:

- 1) The purchase price of \$12.2 billion was too high because it resulted in GPE and its subsidiary, Westar, being in a significantly weaker financial position post-acquisition.
- 2) Even though the Joint Applicants asserted they were not explicitly requesting recovery of the acquisition premium (AP) of \$5 billion, ratepayers would have inevitably paid the AP through the financial engineering created by GPE's assigned debt and equity levels to Westar and KCP&L. These assigned debt and equity levels would have required ratepayers to pay equity level returns on what would actually be debt financing.
- 3) The Joint Applicants were unable to demonstrate that the transaction benefits customers through demonstrable and quantifiable savings that could be reasonably attributed to the acquisition.
- 4) The Joint Applicants failed to provide any certainty with regard to the continued financial health of the combined companies. In particular, GPE was unable to provide any reasonable plan to pay down the significant amount of debt it would incur to pay for the acquisition.

• On April 19, 2017, the Commission issued its order denying the proposed acquisition. The Commission's overall position was that a merger between KCP&L and Westar made sense based on their adjoining geographic territories. However, the proposed transaction had an excessive purchase price that required GPE to take on significant debt. Moreover, the Joint Applicants advised the Commission that the transaction as presented was a take it or leave it

proposal. In other words, any significant safeguards to protect consumers that the Commission might have required would cause the Joint Applicants to halt the transaction.

• On August 25, 2017, GPE and Westar filed a Joint Application requesting the Commission approve a revised transaction structured as a merger of equals. Under a merger of equals, GPE and Westar shareholders will exchange their current shares for shares in a newly created holding company for the combined entities. This application is currently under review and an order will be issued in FY 2018.

ENVIRONMENTAL PROTECTION AGENCY

• In early 2013, President Obama issued a memorandum directing the EPA to re-propose carbon pollution guidelines for new and existing power plants. In September 2013, EPA announced proposed standards for new sources, and in June 2014, the EPA announced its proposed standards for existing sources (the Clean Power Plan). The EPA's rule proposed the use of four building blocks that required the re-dispatch of Kansas' affected coal electrical generating units (EGU's) to natural gas combined cycle, renewable generation, and demand-side management and energy efficiency. KDHE and the KCC discussed the proposed plan and mutually agreed that each Agency would file separate comments focused on the respective expertise of each Agency. As a result, the KCC Staff filed comments on our concerns regarding jurisdictional authority, cost, and reliability on October 29, 2014.

• HB 2233 (amending K.S.A. 65-3031) became law on May 28, 2015, and required KDHE and KCC to enter into a memorandum of understanding (MOU) regarding the implementation of the requirements and responsibilities under the Kansas Air Quality Act. KDHE and KCC completed and signed the MOU on July 14, 2015. In addition, HB 2233 requires the KCC to submit the

following information to the clean power plan implementation study committee: each utility's re-dispatch options along with the cost of each option; the lowest possible cost re-dispatch options on a statewide basis; and the impact of each re-dispatch option on the reliability of Kansas' integrated electric system.

• On August 3, 2015, EPA issued final emission guideline rules for existing electrical generating units, final CO2 performance standards for new, modified and reconstructed EGUs, and a proposed federal plan and model rule for existing EGUs. In order to fully evaluate the re-dispatch options available to Kansas and determine the impact of each re-dispatch option, Staff issued a Request for Proposal (RFP) to engage a consulting firm with the necessary experience and modeling software to run re-dispatch and power flow models. The RFP closed on September 22, 2015, and staff retained a consultant based on the RFP process.

• On February 9, 2016, the United States Supreme Court stayed the EPA's proposed Clean Power Plan. With a stay in place, the legislature modified K.S.A. 65-3031 via SB 318, which became effective May 19, 2016. The modification requires all state agency activities, studies and investigations in furtherance of the preparation of an initial submittal, or any evaluation of options for the submission of a final state plan be suspended until the stay is lifted.

• The Clean Power Plan has been appealed to the U.S. Court of Appeals for the District of Columbia Circuit. Oral arguments were held on September 27, 2016, and an order was expected the first or second quarter of 2017. However, with the election of President Trump, the EPA has been directed to review the proposed regulation with an eye towards its elimination. To that end, the EPA has determined that the agency lacks authority under the Clean Air Act to promulgate the Clean Power Plan. As of the drafting date of this report, the EPA has not determined whether it will replace the rule with a new greenhouse

gas regulation, but, on October 16, 2017, the agency published a proposal to announce its intention to repeal the Clean Power Plan. The proposal also requested public comment on the proposed rule. The EPA has also asked the U.S. Court of Appeals for the District of Columbia Circuit to continue to hold the case in abeyance until the agency can determine whether it will replace the rule.

- Pursuant to SB 318, KCC Staff is monitoring the progress of the appeal and the EPA’s repeal process, but neither Staff nor its consultant is performing any activities in furtherance of a preliminary or final plan during the stay.

SIGNIFICANT INCREASES IN CAPITAL INVESTMENT

- Electric utilities have effectively completed large-scale environmental retrofit projects on coal-fired generation assets. However, any new EPA rule related to greenhouse gases would have the potential to require significant investments in existing and potentially new generation and transmission assets. In addition, the Southwest Power Pool continues to approve new transmission facilities to enhance reliability of the transmission system. The potential new investments in generation and transmission assets are extremely capital intensive and will continue to place upward pressure on utility rates. Moreover, the trend of increases in transmission investment related to current congestion issues is far from the end, and we expect these investments to continue to put upward pressure on utility rates for several years to come.

- Investor-owned natural gas distribution utilities in Kansas are facing aging infrastructure, some of which is constructed of materials that are considered to be obsolete or that present a safety risk. This has led to these gas utilities placing an increased emphasis on accelerating the rate of replacement of aging infrastructure. This effort has also increased capital expenditures levels, and led to more frequent general rate cases. In March 2015, the Commission

opened a general investigation to explore whether the use of alternative ratemaking mechanisms, instead of general rate cases, to accelerate of the rate of replacement of natural gas infrastructure is in the public interest. The general investigation continued throughout 2015 and 2016. The Commission has taken testimony from investor-owned natural gas distribution companies, Commission Staff, and CURB. Additionally, a hearing was held on March 30 and 31, 2016. The Commission issued an Order on September 12, 2017, authorizing a voluntary alternative ratemaking mechanism to any natural gas utility that could provide a plan to replace all bare steel service/yard lines, cast iron mains, and bare steel gas mains within a 10-year period. This mechanism would be limited to an annual rate impact of \$.40 per residential customer, per month. The mechanism also contained a provision that required a participating utility to forego recovery of some rate case expense in the event that a rate case was filed within the four-year period of the pilot program.

- Telecommunications companies are continuing to invest in new technologies, primarily to enhance broadband services. The investment in broadband services is generally driven by the FCC’s National Broadband Plan, which has a goal of supporting the provision of broadband communications in areas that would be unserved or underserved without such support. However, the continued investment in new technologies should not increase the size of the KUSF. HB 2201, which was passed during the 2013 legislative session, caps the KUSF fund at \$30 million for rate of return regulated carriers, caps support for price cap regulated carriers, eliminates KUSF support for electing carriers, and phases out KUSF support for competitive eligible telecommunications carriers by March 2018.

Electric

OVERVIEW

The KCC regulates nine large (annual operating revenue greater than \$10 million) electric utilities. A list of the large electric utilities and a brief overview of the major activities for FY 2017 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other electric dockets. Also included in this narrative section is a discussion of the Federal, transmission, and wind issues that the Utilities Division spent a significant amount of time on during FY 2017.

LARGE ELECTRIC UTILITY COMPANIES

(Annual operating revenue greater than \$10M)

Empire District Electric Company

ITC Great Plains, LLC (Transmission Only)

Kansas City Power & Light Company

Mid-Kansas Electric Company (Limited per K.S.A. 66-104d)

Midwest Energy, Inc. (Limited per K.S.A. 66-104d)

Prairie Wind Transmission, LLC (Transmission Only)

Southern Pioneer Electric Company

Sunflower Electric Power Corporation (Limited per K.S.A. 66-104d)

Westar Energy, Inc..

Three major electric utility companies filed applications to increase rates during FY 2017, and two other major electric utility companies filed formula base rate updates or tariff changes. These five utilities were Westar Energy, Southern Pioneer Electric Company, Sunflower Electric Power Corporation, Kansas City Power & Light Company, and Empire District Electric Company.

Westar Energy filed Docket No. 17-WSEE-147-RTS requesting a

\$17.4 million rate increase to update rates to reflect the full impact of the environmental upgrades at the LaCygne Coal Fired Generating Unit, other capital additions at the Wolf Creek Nuclear Generating Unit, and \$50 million in capital expenditures related to upgrading the resiliency of Westar's distribution system. Ultimately, this docket resulted in a unanimous settlement agreement that was approved by the Commission, granting \$16.37 million in additional revenues to Westar.

Southern Pioneer filed Docket No. 17-SPEE-476-TAR requesting a \$745,507 decrease in its retail distribution rates to meet pre-determined debt service coverage ratios approved by the Commission in a Debt Service Coverage Formula Based Rate (FBR) pilot program approved in FY 2013. This docket also contained a request to increase third-party local access rates by \$662,305 under Southern Pioneer's 34.5kV FBR Plan, originally approved by the Commission in 2016. The net result of this rate filing was a reduction of retail distribution rates of \$355,137, and an increase in the third-party local access rates of \$271,934.

Sunflower Electric Power Corporation filed Docket No. 17-SEPE-415-TAR requesting revisions to its Transmission Formula Rate (TFR) template. This TFR is used to collect the revenue requirement associated with Sunflower's transmission assets that are under the functional control of the Southwest Power Pool (SPP) and therefore included in the SPP Open Access Transmission Tariff (OATT). Sunflower requested KCC approval to maintain the financial ratios that limit the level of operating margin in the TFR, and to make revisions to the TFR template that would allow Sunflower flexibility when submitting revenue requirements as part of the competitive bidding process that resulted from FERC Order 1000. This filing is still under review by Staff and Sunflower and Staff have agreed to extend the procedural schedule for this docket

while revisions are made to Sunflower's original request in an attempt to arrive at a result that Staff and Sunflower can present to the Commission in agreement.

Kansas City Power & Light Company filed Docket No. 17-KCPE-201-RTS requesting a \$2,829,191 reduction in revenues in order to true-up the result of the company's previous base rate case, which was not based on final construction cost amounts for environmental upgrades to the LaCygne Generating Unit and the Wolf Creek Nuclear Generating Unit. Additionally, this rate case was used to reduce base rates for some outdated regulatory assets and liabilities that had been fully amortized (recovered) by KCP&L. Ultimately, the parties to this case agreed that KCP&L should reduce rates by \$3,557,588, and the Commission approved this rate reduction.

Empire District Electric Company filed Docket No. 17-EPDE-101-RTS requesting to increase electric rates by \$6.4 million, or 25.67%. Empire's rate request was primarily driven by increased costs associated with its investment in environmental upgrades at the Asbury Coal Fired Generating Unit, investment associated with the conversion of its Riverton 12 Combustion Turbine to a Natural Gas Combined Cycle unit, and other general cost increases since its last general rate increase in 2010. This rate case was eventually withdrawn as a result of the Settlement Agreement in Docket No. 16-EPDE-410-ACQ, in which Empire agreed to withdraw the rate increase and not refile it until after May 1, 2018, if the Commission approved its application to be acquired by Liberty Utilities.

FEDERAL ISSUES

The KCC intervened in several matters at FERC during FY 2017. Because of the increase in capital investment for transmission infrastructure and FERC's use of formula rates, the KCC's involvement in FERC electric matters has continued to increase significantly. Additionally, after the implementation of SPP's competitive bid solicitation

process for new transmission projects, as required by FERC's Order 1000, there have been numerous new Transmission Formula Rate (TFR) filings at FERC. These new TFR filings are being driven by the following factors: 1) the desire of new entities to calculate and report costs on an incremental cost basis for each new project, and 2) the desire of new entities for a flexible TFR template that allows for the recognition of any concessions that may be made in the competitive bidding process.

In docket EC17-171, the KCC intervened for the purpose of monitoring the Great Plains/Westar merger proceedings at FERC.

In docket numbers ER14-2850/2851, ER15-1775, and ER15-1777, the KCC protested the expansion of SPP to include the integrated system of the Western Area Power Authority, Basin Electric, and Heartland Electric. The KCC's primary protest is based on the fact that the new entities joining SPP do not have to pay for socialized transmission costs within the pre-existing SPP footprint that were incurred prior to the effective date of joining SPP. FERC issued an order on October 15, 2015, denying the KCC's protest. On December 14, 2015, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit. On November 28, 2017, the D.C. Circuit issued its opinion ruling in favor of FERC.

In docket numbers ER15-958 and ER15-2237, the KCC protested the transmission formula rates of Transource Kansas and Kanstar on the grounds that the requested returns on equity were too high and a request that future – yet to be created affiliates – of Transource Kansas and Kanstar would be permitted to automatically utilize the capital structure and return on equity approved by FERC in ER15-958 and ER15-2237. The KCC negotiated a settlement with Transource Kansas and Kanstar respectively on the issue of what the appropriate return of equity should be, however, FERC ruled that future Transource Kansas and

Kanstar affiliates would be permitted to automatically adopt the return on equity and capital structure of their parents without an additional filing. On March 8, 2016, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit in the Transource case. On June 2, 2016, the KCC filed a Petition for Review at the U.S. Court of Appeals for the D.C. Circuit in the Kanstar case. Those two appeals have been consolidated and are still pending.

SOUTHWEST POWER POOL

The Southwest Power Pool (SPP) is mandated by the Federal Energy Regulatory Commission (FERC) to ensure reliable supplies of power, adequate transmission infrastructure, and competitive wholesale pricing of electricity. SPP was approved as a Regional Transmission Organization (RTO) by FERC in 2004 and is a non-profit corporation organized under the laws of the State of Arkansas. SPP is a regulated public utility in Kansas, having obtained a limited certificate of convenience and authority to manage and coordinate use of certain transmission facilities and to develop an energy imbalance market. Simultaneously, the existing electric public utilities in Kansas were authorized to transfer functional control of transmission facilities to and participate in an SPP energy imbalance market. SPP is a non-profit corporation and not a regulatory or quasi-regulatory entity and is regulated by FERC.

When SPP became an RTO in 2004, it had 131 employees and 48 members, including 28 (58% of membership) investor-owned utilities, municipal systems, generation and transmission cooperatives and state authorities who served retail loads in parts of eight states (Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, and Texas). Three Nebraska public power utilities became members of SPP in 2008. On October 1, 2015, SPP membership expanded to include the Integrated Transmission System consisting of a portion of the

Western Area Power Administration, Basin Electric Cooperative, and the Heartland Consumers Power District. This integration, while contested by the KCC at FERC because of cost allocation concerns, added 5,000 MW of peak demand and 7,600 MW of generating capacity to SPP's system. SPP currently has around 600 employees and 97 members directly or indirectly responsible for serving retail loads in the 14 state region.

In early 2017, the Mountain West Transmission Group (MWTG) began negotiating with SPP to potentially join SPP in 2019. The MWTG footprint covers most of Colorado and Wyoming and smaller areas of Arizona, Montana, New Mexico, and Utah. The negotiations are ongoing. If the MWTG joins SPP, this would add 16,000 miles of transmission and 21,000 MW of generation capacity.

Commission interaction with the SPP and participation in RTO matters is authorized by K.S.A. 74-633 and K.S.A. 66-106. The SPP organization has created approximately thirty primary working groups/committees as well as multiple subordinate task forces. The Commission is represented by one KCC Commissioner on the Regional State Committee (RSC), which consists of one regulator or other state representative from each of the states in the SPP. In 2018, KCC Commissioner Albrecht will be the President of the RSC. The Cost Allocation Working Group reports to the RSC and is composed of one voting staff member from each of the states along with other state staff participants. The RSC fulfills an advisory role in SPP and does not "approve" any transmission projects. Its participation in the SPP process is mostly limited to providing collective state regulatory agency input and participation, as stated in the RSC Bylaws. However, the RSC does have specific authority over cost allocation methodologies. For example, the RSC designed the original cost allocation methodology for committing retail ratepayer funds for construction of new

transmission projects and has revised the methodology from time-to-time. The RSC has no responsibility in approving transmission projects or their associated costs. Approval of specific transmission projects and their associated costs are ultimately approved for construction by the SPP Board of Directors. Thus, the KCC has no direct oversight through its SPP involvement over the amount of spending for Kansas-specific or regional transmission projects, which makes it imperative that the Commission be represented in a liaison capacity on multiple SPP stakeholder committees and task forces.

TRANSMISSION PLANNING AND CONSTRUCTION

Since its inception as an RTO, the SPP has added \$6.0 billion in new zonal and regional transmission projects that are in service. According to the SPP Fourth Quarter Project Tracking Report (October 2017), an additional 547 projects have been approved by the SPP Board of Directors for construction with a total estimated cost of \$4.9 billion. The approved projects in the report are not yet in service and, generally, not in rates unless Construction Work In Progress (CWIP) is authorized. Depending on the operating voltages of a project, the costs are regionally or zonally recovered from ratepayers inside the SPP Region.

The total Annual Transmission Revenue Requirement for region-wide transmission projects is \$617 million as of September 2017. This represents annual capital cost recovery, operation and maintenance (O&M), and other transmission related expenses for regional projects that are in-service or under construction as of September 2016. These revenue requirements are recovered through FERC-approved Transmission Formula Rates (TFR), FERC-approved stated rates, or, in some cases, state approved TFRs. The current annual cost to Kansas ratepayers is approximately 18% of the annual transmission revenue requirement for the region, or \$111 million. This amount is expected to grow significantly

in the next few years as the remaining \$4.9 billion in new projects mentioned in the previous paragraph come in to service.

Grain Belt Express

Clean Line Energy Partners (Clean Line) was certificated as a public utility by the Commission in December 2011. Clean Line subsequently filed a line siting application for the Grain Belt Express Clean Line Project and this project was approved by the Commission on November 7, 2013. The proposed line is a ±600 kilo-volt (kV), high voltage direct current (HVDC) transmission line along with associated facilities capable of delivering 4,000 megawatts (MW) of power from Kansas to load centers east of Kansas. The project will originate in western Kansas near Sunflower's Spearville substation and traverse east across the state (approximately 370 miles) into Missouri where it will interconnect in the MISO RTO market at the St. Francois substation in southeastern Missouri. From there, the line will continue into Indiana where it will interconnect with the PJM RTO market at the Sullivan substation. The Project has been estimated to cost \$2.2 billion with an original estimated in-service date of 2018. This project will be funded through the sales of transmission capacity to wholesale customers (referred to as merchant transmission) and, therefore, will not be funded by Kansas retail ratepayers. The project was approved by Indiana, Illinois, and Kansas. Clean Line was denied a Certification of Public Convenience and Necessity in 2015 in Missouri. Clean Line filed a subsequent application with the Missouri Public Service Commission, which was ultimately denied in August 2017. Clean Line has appealed the latest Missouri decision to the Missouri Supreme Court.

Summit to Elm Creek

ITC and Mid-Kansas Electric Company have entered an agreement to jointly build with Westar a 345 kV line from Westar's Summit substation near Salina, Kansas, to ITC's Elm Creek substation

near the Cloud County wind farm. The Commission approved line siting applications for this 52 mile project on August 27 and August 29, 2013. ITC/ Mid-Kansas and Westar have completed the construction of this line, and it was energized on December 7, 2016.

FERC Order 1000

The Commission Staff continues to monitor the effects of FERC Order 1000, which was issued in July 2011. This landmark Order affects the transmission planning process as it eliminated the right of first refusal to incumbent transmission owners for any projects receiving regional funding. The Order also requires RTOs to: 1) coordinate and share information in a transparent manner with neighboring RTOs; 2) establish cooperative procedures by which interregional projects might be addressed; and 3) develop a cost allocation methodology for those interregional projects. SPP's implementation of a competitive bid solicitation process for transmission projects with a region-wide funding component has led to a flood of new transmission companies filing for TFRs at FERC. This process may also lead to the KCC certifying new utilities in the State if the successful bidder for a new regional transmission project in Kansas is not a current Kansas utility.

Natural Gas

OVERVIEW

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities. A list of the large gas distribution utilities and a brief overview of the major activities for FY 2017 are noted below. A summary of each major docket associated with the companies follow this narrative section along with a listing of all other natural gas dockets. In addition, included in this narrative section is a discussion of the Federal issues that the Utilities Division spent a significant amount of time on during FY 2017.

LARGE GAS UTILITY COMPANIES

ATMOS Energy Corporation

Black Hills/Kansas Gas Utility Co.

Kansas Gas Service, a Division of ONE Gas, Inc.

During FY 2017, there was one major gas proceeding decided by the Commission. Kansas Gas Service filed Docket No. 17-KGSG-455-ACT on April 11, 2017. This application requested an Accounting Authority Order (AAO) to record to a regulatory asset an unknown quantity of future costs associated with environmental remediation activities related to 12 former Manufactured Gas Plants (MGP) in Kansas. KGS also requested permission to amortize (recover in rates) these MGP costs over 10-years in a future rate case. Lastly, KGS requested permission to retain the first \$9.49 million of insurance proceeds received in reimbursement for MGP costs, and to retain 40% of all insurance proceeds received in excess of the \$9.49 million. After opposition by Staff and CURB to KGS's request, a settlement agreement was reached in the case and approved by the Commission. The agreement results in a cap of \$15 million of MGP costs to be recorded to the regulatory asset, 15-year amortization period for recovery of these costs from ratepayers, and 100% of all insurance proceeds credited to ratepayers to offset MGP cost recovery.

FEDERAL ISSUES

The Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users. Chief among these is Southern Star Central, which transports 50% to 70% of all natural gas consumed annually in Kansas. Other interstate gas pipelines such as Kansas Pipeline Company, Cheyenne Plains Gas Transmission, Tallgrass Interstate Gas Pipeline, and Northern Natural Gas are also monitored.

In gas storage matters, the KCC continues to monitor Docket CP11-481 Alden Storage Field, CP13-76 Alden

Storage Field, and CP13-531 Elk City Storage Field. These dockets are all related to Southern Star's continued efforts to maintain storage containment in its natural gas storage fields. Continued monitoring of these dockets is important as the process of stemming the loss of storage gas can take several years to fully vet.

In other storage matters, the KCC continues to monitor the activities of Northern Natural Gas in Docket CP09-465. In this case, Northern Natural has requested an enlargement of its certificated storage boundaries at its Cunningham storage field in an attempt to contain migrating storage gas. Northern is required to make quarterly compliance filings at FERC regarding its efforts, and the KCC receives and reviews these filings. On September 28, 2017, the KCC filed a Motion to Show Cause asking FERC to require Northern Natural to take steps necessary to ensure its storage gas does not migrate vertically out of its storage field.

The KCC intervened and provided Comments in Support of a tariff waiver in the annual Fuel and Lost and Unaccounted For recovery filings at FERC filed by Southern Star Central in Docket RP17-438. During the tracker measurement period, Southern Star experienced larger than normal gas storage losses due to the warmer than normal winters the past two years. When storage fields do not completely "cycle" (from full to empty as in a normal winter), gas losses tend to be higher. In an effort to insulate its customers from an unusually large increase, Southern Star proposed to recover the losses over a two-year period which would require a waiver from their usual tariff provisions. The KCC filed Comments in Support of Southern Star's tariff waiver request, which was ultimately approved by FERC.

In Kansas Pipeline Company's (KPC) 2015 Fuel and Lost and Unaccounted For docket, the KCC protested KPC's lack of sufficient data and information. The FERC agreed and required KPC to make

a compliance filing with the required data and computational processes. The KCC intervened in KPC's 2016 Fuel and Loss filing, Docket RP16-777, to ensure that KPC continues with FERC's instructions to them to make the data changes required in the FERC Order from the previous docket. The KCC intervened in KPC's 2017 Fuel and Lost filing at FERC in Docket RP17-137 to ensure that KPC continues to report its Fuel and Lost percentages accurately.

The KCC Intervened in FERC Docket CP16-502 and CP17-45, both Abandonment dockets. In Docket CP16-502, Southern Star was requesting permission to abandon four compressor units on its mainline transmission system. In Docket CP17-45, Southern Star was seeking permission to abandon a compressor unit in its South Welda storage field. The KCC routinely Intervenes in Abandonment dockets to ensure that Peak Day Deliveries will not be affected by the abandonment. At the KCC's request, in both dockets Southern Star provided analysis that showed that Peak Day Deliveries would not be affected.

Natural Gas Pipeline Safety

OVERVIEW

Pipeline safety personnel continue to conduct on-site inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator's management of the integrity of the pipeline delivery system including such topics as review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements. In addition, engineers and pipeline safety inspectors investigate any incident suspected of being caused by natural gas and report these to the Commission. Any recommendations of Staff regarding prevention of potential incidents are included in the report and considered by

the Commission. Statistics that provide a snapshot of the pipeline safety personnel's inspection activity, as well as an overview of the regulated gas infrastructure in Kansas, can be found in the pipeline safety section of this report.

Pipeline safety personnel also investigate violations of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Investigators work with excavators and utility operators to ensure compliance with provisions of the act, such as requesting locates prior to digging and locating facilities within 48 hours of being notified of pending excavation work. To enhance our KUUDPA enforcement efforts, KCC receives two federal grants that provide funding for two inspector positions for the calendar year. From July 1, 2016, to June 30, 2017, the Commission acted upon 14 filings in which fines were levied to 10 excavators for failure to notify utilities prior to excavating over buried facilities and to two utility operators for failure to provide timely or accurate locates. For the 14 cases, a total of \$15,000 in fines was levied.

Kansas experienced three natural gas incidents in FY 2017. There was one minor injury resulting from these incidents and one incident which resulted in significant property damage. The specifics for the incidents considered to be significant are included in the Natural Gas Pipeline Safety Dockets section of this report.

Aging infrastructure remains a top concern with Kansas natural gas operators. In 2006, the Kansas Legislature passed the Gas Safety Reliability Surcharge (GSRS) which allows for alternative recovery of investments for pipe replacement investments. This program has been very successful in accelerating the replacement of aging pipelines. The replacement of distribution piping continues at a rate of approximately 168 miles of bare steel main, 18 miles of cast iron main, and 119 miles of bare steel service lines in CY 2016. In March of 2015, the Commission opened a general investigation into the need to accelerate

the replacement of obsolete natural gas infrastructure and to consider the necessity of additional alternative rate treatment for pipe replacement programs. The Commission issued an order in the general investigation on September 12, 2017, requiring the regulated natural gas public utilities to file a plan for replacing all obsolete pipe in their operations within 10 years. The plans are due in early 2018.

Liquid Pipeline Common Carriers

OVERVIEW

Although there are relatively few intrastate pipeline common carriers in Kansas, the Commission is responsible for the economic regulation of this sector. The majority of Staff's work in this area is the review of tariff and rate filings in an effort to ensure efficiency, public interest, and balanced benefit to Kansas common carriers and shippers. Staff is responsible for the economic regulation, including but not limited to: processing tariff and rate filings; analyzing tariffs for compliance; monitoring complaints; processing and monitoring certificate filings due to sales, purchases, mergers and acquisitions, divestitures, service cessations and abandonment; and monitoring operations for unforeseeable events and capacity constraints. Additionally, Staff tracks all intrastate revenue reported from each pipeline company. Staff processed 21 intrastate pipeline common carrier dockets during FY 2017. The intrastate liquids pipeline companies regulated by the KCC are noted below. A summary of each major docket follows this narrative section along with a listing of all other liquid pipeline dockets.

LARGE LIQUID PIPELINE UTILITIES (*\$10M or more in annual intrastate revenues*)

Jayhawk Pipeline (owned by NCRA)

Magellan Pipeline Company, LP

Mid-America Pipeline Company, a subsidiary of Enterprise Products Partners, LP

SMALL LIQUID PIPELINE UTILITIES

($\$10M$ or less in annual intrastate revenues)

Kaw Pipeline Company

NuStar Pipeline Operating Partnership, LP

ONEOK NGL Pipeline, LLC

ONEOK North Systems, LLC

Plains Pipeline, LP

Telecommunications

OVERVIEW

The KCC regulates four primary types of telecommunications carriers with varying degrees of regulation: Incumbent Local Exchange Carriers (ILECs); Electing Carriers; Competitive Local Exchange Carriers (CLECs); and Interexchange Carriers (IXCs) (also known as long distance carriers). These telecommunications carriers serve a customer base ranging from as few as one customer to over 250,000 customers. The large telecommunications carriers regulated by the KCC are noted below. A summary of each major docket associated with the telecommunications carriers follow this narrative section along with a listing of all other telecommunications dockets.

LARGE TELECOMMUNICATIONS CARRIERS

Consolidated Communications Enterprise Services, Inc.

Cox Kansas Telecom, LLC

Kansas Fiber Network, LLC

Rural Telephone Service Co., Inc.

Southwestern Bell Telephone Company d/b/a AT&T Kansas

Time Warner Cable Information Services (Kansas), LLC

United Telephone Company of Kansas, Inc. d/b/a Century Link

In addition to the seven large telecommunications utilities listed above, the Commission has certificated

34 incumbent local exchange carriers (ILECs), 123 competitive local exchange carriers (CLECs), and 227 interexchange carriers (IXCs).

The KCC continues its effort in fulfilling its obligation to protect the rights and privileges of Kansas consumers in balance with the interests of the telecommunication carriers. The evolution of competition in providing local and long distance telecommunications has resulted, in some instances, in greater choice of available services at a variety of rates with a wider array of providers, packages, and bundles from which to choose. Technology developments have also continued to play a key role in the evolution of the telecommunications industry.

The KCC Staff is responsible for the economic regulation, including but not limited to: processing incumbent local exchange carrier tariff filings and switched access rate filings; analyzing tariffs for compliance with KCC rules and regulations; administering consumer and carrier complaints; processing certificate filings, service cessations, and name changes; reviewing carrier-to-carrier interconnection agreements and providing mediation when necessary; ensuring quality services of the incumbent local exchange carriers; overseeing the Kansas Universal Service Fund (KUSF); auditing rate-of-return regulated ILECs; processing video service applications; and processing eligible telecommunications carriers filings.

KANSAS UNIVERSAL SERVICE FUND

The KUSF was established by the Commission in 1996, as required by the Kansas Telecommunications Act. The KUSF is in its twenty-first year of providing support to local telephone service providers to assist in making universal service available in high-cost areas of the state, to provide dual-party relay service and telecommunications equipment for persons with disabilities, and to provide assistance to those with lower incomes through the Lifeline

program. Effective March 1, 2017, the annual KUSF funding requirement is approximately \$44 million and the carrier assessment rate is 7.25%. The KUSF provides approximately \$40.9 million in high-cost support, \$1.9 million for low-income subscribers, \$473,000 for telecommunications relay service, \$249,000 for the telecommunications equipment program, and \$500,000 for the fund administration and carrier audits.

The Commission began audits of all ILECs receiving KUSF support in 2000. The Commission has completed the initial audits for all ILECs and continues to monitor and initiate new audits when warranted based on an annual review of financial metrics. All of the rural LECs have elected rate-of-return regulation; therefore, the audits provide an opportunity for the Commission to determine whether or not the KUSF support is cost-based for each rural ILEC.

FEDERAL ISSUES

Congress has determined that broadband has gone from being a luxury to a necessity for full participation in our economy and society – for all Americans. For that reason, the Federal Communications Commission (FCC) has adopted comprehensive reforms of its Universal Service Fund (USF) and Intercarrier Compensation (ICC) systems to accelerate broadband build-out to the approximately 23 million Americans (as of December 31, 2013) who lacked access to infrastructure capable of providing 10/1 Megabits per second (Mbps) fixed broadband. This reform will expand the benefits of high-speed Internet to millions of consumers in every part of the county by transforming the existing USF into a new Connect America Fund (CAF) focused on broadband. The broad goal is to support the provision of broadband communications in areas that would be unserved without such support or that depend on universal service support for the maintenance of existing broadband service. The FCC has initiated numerous proceedings aimed at implementing its broadband goals.

As part of its reform efforts, the FCC offered over \$1.675 billion annually, for six calendar years (2015-2020), model-based CAF support to price cap carriers nationwide to fund the deployment of voice and broadband-capable services of at least 10/1 (Mbps) in the eligible areas. CenturyLink accepted \$16.5 million to provide broadband to 29,018 eligible households in Kansas, and AT&T accepted \$18.9 million to provide broadband to 35,375 eligible households in Kansas. Carriers are required to meet specific deployment milestones required by the FCC, including deployment to at least 40 percent of the supported locations in each state by December 31, 2017.

Taking further steps to expand rural broadband deployment, in March of 2016 the FCC approved modernization and reform of its universal service program supporting the nation’s rate-of-return carriers. Providing approximately \$20 billion in support over the next 10 years, modernizations of the universal service program for rate-of-return areas include enabling rate-of-return providers to meet consumer demand for stand-alone broadband by providing support for stand-alone broadband. Reforms also include better targeting of support to communities that need it the most. The FCC is further allowing carriers to voluntarily transition from legacy rate-of-return support to model-based support, similar to CAF Phase II for rate-of-return carriers (also known as Alternative Connect America Cost Model of ACAM). Kansas rate-of-return carriers: Haviland Telephone Company, Moundridge Telephone Company, S&A Telephone Company, Zenda Telephone Company, and Totah Communications elected to transition from legacy USF support to ACAM support. Carriers electing to voluntarily transition to model-based support must deploy service providing 10 Mbps/1 Mbps to all funded locations, with faster 25 Mbps/3 Mbps service required in areas of higher population density. Carriers are required to meet specific deployment milestones required by the FCC.

Water

OVERVIEW

The Kansas Corporation Commission (KCC) regulates three water companies, none of which fall into the large utility category. These water companies serve a customer base ranging from as few as 60 to as many as 1,500, with little to no potential of increasing their customer base. Customers served by these companies typically live in a suburban area approximately two to ten miles outside the city. The water supplied varies from city water supplied by a nearby town to ground water supplied by the company’s own water wells. The water companies regulated by the KCC are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other water dockets.

WATER COMPANIES

Barton Hills Water District

Green Acres Mobile Home Park, LLC

Suburban Water, Inc.

During FY 2017, the Commission continued its general investigation into Howison Heights’ ability to provide efficient and sufficient service given the company’s documented financial distress and numerous customer complaints. Howison Heights, Ottawa Rural Water District No. 2 (RWD #2), Central National Bank, and Bennington State Bank signed an amended agreement transferring Howison Heights, Inc. to RWD #2 in January 2017. Construction of an interconnection between Howison’s customers and RWD #2 began in December 2016 and was completed in February 2017.

The Commission approved the revocation of Howison Heights’ Certificate of Convenience on February 28, 2017. Transfer of the Howison Heights water system to RWD #2 occurred on March 2, 2017.

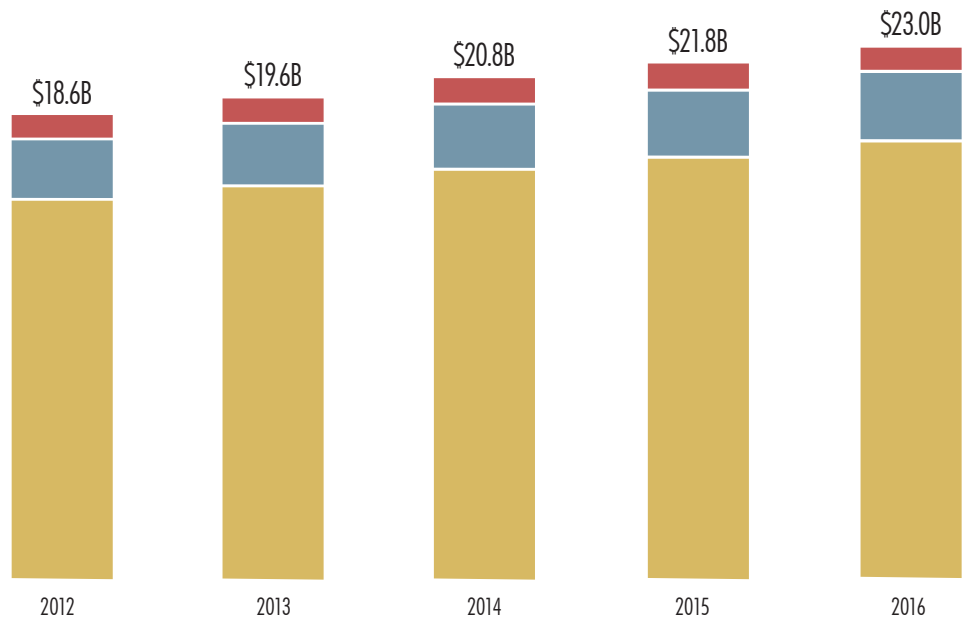

Financial Information and Other Metrics

OVERVIEW

The KCC sets rates for electric, natural gas, telecommunications, and water utilities on a rate base/rate of return basis for public or private utilities or a Times Interest Earned (TIER)/Debt Service Coverage Ratio (DSC) basis for cooperatives. For the electric, natural gas, and rural local exchange companies, the amount of capital investment, fuel and purchased power expense, total revenues, and total expenses are measured in billions of dollars. Following this overview section, more details are provided regarding financial information and other metrics for all the KCC jurisdictional utility industries on a consolidated and individual industry basis.

Electric Utilities

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis. Empire District Electric and Kansas City Power & Light have operations in multiple states. The values represented in the following charts relate only to the Kansas operations of those two entities.

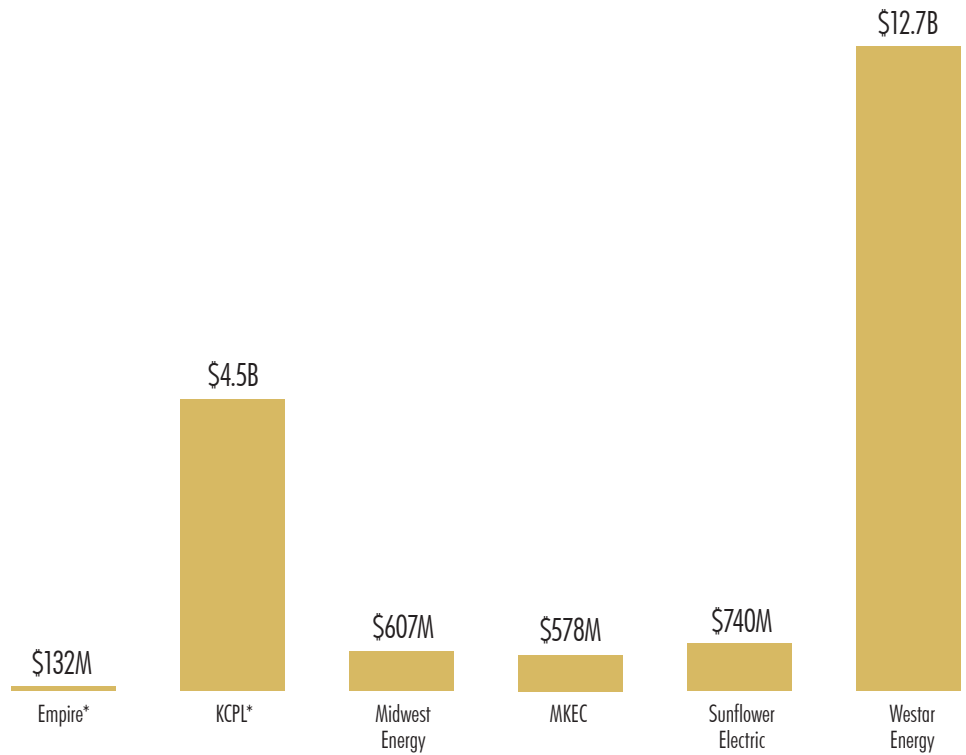

ELECTRIC COMPANIES STATEWIDE GROSS PLANT | 2012–2016

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

ELECTRIC COMPANIES GROSS PLANT, BY COMPANY | 2016

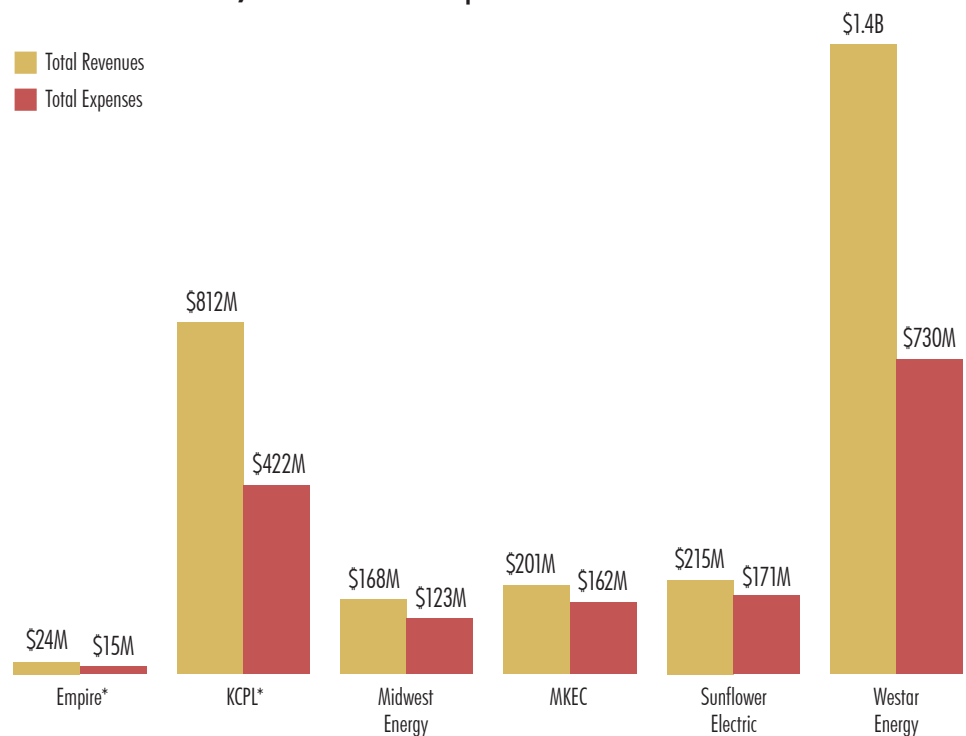

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, two entities encompass a vast majority of utility gross plant across Kansas.

*All figures for Kansas operations only.

ELECTRIC COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2016

This chart compares each utility's annualized revenues and expenses. The difference between the two represents the gross margin of each company. Worth noting is the difference in gross margins between the investor-owned utilities and the cooperatives. Embedded in that difference is the dividend cost that rewards and helps ensure continued shareholder investment.

*All figures for Kansas operations only.

ELECTRIC COMPANIES GENERATING AND PURCHASED POWER COSTS, BY COMPANY | 2016

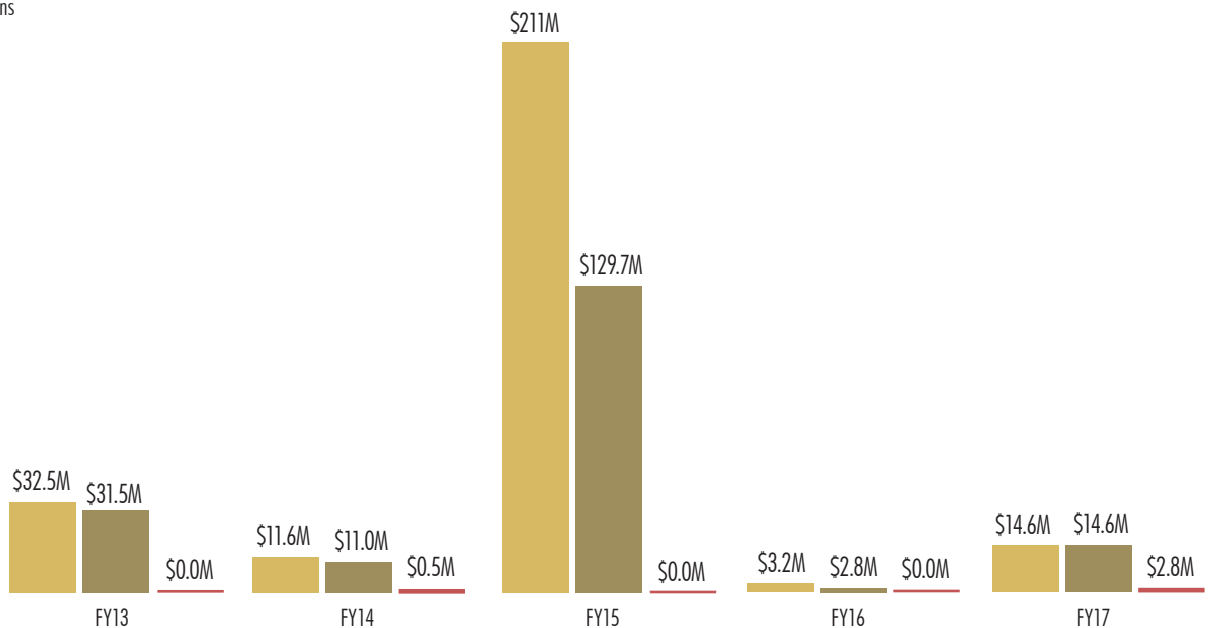

This chart takes the expense portion from each utility on the previous table and carves out the cost of generation and purchased power. As can be seen by comparing the two tables, generation and purchased power represent only about half the total cost of providing safe, reliable, and efficient electric service.

*All figures for Kansas operations only.

Generation Planning Survey

The Commission continues to monitor the generation capacity and reliability of Kansas electric utilities. Staff members annually review generation and load forecasts of Kansas electric utilities to ascertain whether there is adequate electric supply to meet the needs of Kansas electric consumers. The findings of that survey can be

seen below. Based on its review, staff determined that, at this time, forecasted electric generation capacity and planning to meet future changes in system load in the State of Kansas appears sufficient given current load and generation forecasts planned. Although utilities in the chart do indicate deficiencies in the future,

planned generation capacity additions can be made that will satisfy future planning responsibility. The chart on this page describes the generation capacity situation major utilities in Kansas face going forward.

| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>26 Oct 2016</i> |
| <i>Action date</i> | <i>08 Jun 2017</i> |
| <i>Commission action</i> | <i>Approved</i> |

In the Matter of the Applications of Westar Energy, Inc. and Kansas Gas and Electric Company for Approval to Make Certain Changes in their Charges for Electric Service.

Westar Energy, Inc. and Kansas Gas and Electric Company (Westar) filed its Application for an abbreviated rate increase on October 26, 2016. The total request was for an increase in rates of \$17.4 million. The company cited the following factors as drivers of the rate increase: 1) environmental upgrades to the LaCygne Coal Fired Generating Unit; 2) capital additions at the Wolf Creek Nuclear Generating Unit; 3) \$50 million in capital expenditures related to Westar's Grid Resiliency program; and 4) the final roll-in to rates of costs that used to be recovered via the Environmental Cost Recovery Rider. On April 11, 2017, the parties filed their direct testimony. Staff recommended an increase of \$16.3 million; and The Citizens' Utility Ratepayer Board recommended an increase of \$16.4 million. On April 26, 2017, the parties reached a unanimous settlement. The parties to the Stipulation & Agreement agreed to an increase of \$16.37 million. An Order approving the Stipulation & Agreement was issued on June 8, 2017.

SOUTHERN PIONEER ELECTRIC COMPANY

| | |
|--------------------------|------------------------|
| <i>Docket number</i> | <i>17-SPEE-476-TAR</i> |
| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>26 Apr 2017</i> |
| <i>Action date</i> | <i>25 Jul 2017</i> |
| <i>Commission action</i> | <i>Approved</i> |

In the Matter of the Annual Filing of Southern Pioneer Electric Company for Approval to Make Certain Changes to Its Charges for Electric Services, Pursuant to the Debt Service Coverage Formula Based Ratemaking Plan Approved in Docket No. 13-MKEE-452-MIS and 34.5 kV Formula Based Ratemaking Plan Approved in Docket No. 16-MKEE-023-TAR.

On April 26, 2017, Southern Pioneer Electric Company (Southern Pioneer) filed

its fourth Application under its five-year Debt Service Coverage Formula Based Ratemaking (DSC-FBR) Pilot Program approved in Docket No. 13-MKEE-452-MIS and Southern Pioneer's second annual update of its three-year 34.5 kV Formula Based Ratemaking (34.5kV FBR) plan approved in Docket No. 16-MKEE-023-TAR. This is the first-year the DSC-FBR and 34.5kV FBR plans were combined into a single Docket pursuant to Commission Orders in Docket Nos. 16-SPEE-497-RTS and 16-SPEE-501-TAR. In its Application, Southern Pioneer was seeking a revenue decrease of \$745,507 or 1.1% under its DSC-FBR plan and a revenue requirement increase of \$662,305 under its 34.5kV FBR plan, which was apportioned based on load ratio share (LRS). Southern Pioneer's wholesale Local Access Delivery Service (LADS) Customers were responsible for 41 percent of the load ratio share and accounted for \$271,934 of the revenue requirement increase while Southern Pioneer's retail customers were apportioned the remaining \$390,371 of the revenue requirement increase based on a 59 percent LRS. The resultant proposed wholesale LADS rate was \$4.88/kW in the Application. The Citizens' Utility Ratepayer Board (CURB), Kansas Electric Power Cooperative, Inc., Kansas Power Pool, and Kansas Industrial Electric Consumer Group petitioned to intervene in the Docket, and all parties were granted intervention by the Commission. On June 26, 2017, Staff and CURB filed direct testimony in the Docket. Staff recommended an adjustment to Southern Pioneer's Application to disallow various advertising, dues, and donations expenses; however, Staff's adjustment did not impact the revenue requirements of the DSC-FBR and 34.5kV FBR plans or the \$4.88/kW LADS rate calculated in the Application. Staff found and corrected minor errors that resulted in slight changes to the retail allocation of the 34.5kV FBR revenue requirement. CURB recommended making the same adjustment and corrections in the Docket. On July 10, 2017, Southern Pioneer filed rebuttal testimony stating that Southern Pioneer agreed with Staff's recommendations and offered clarification for terms discussed in Staff and CURB's direct testimony. On July 25, 2017, the Commission issued its Order approving Staff's recommendations.

SUNFLOWER ELECTRIC POWER CORPORATION

| | |
|--------------------------|------------------------|
| <i>Docket number</i> | <i>17-SEPE-415-TAR</i> |
| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>16 Mar 2017</i> |
| <i>Action date</i> | <i>N/A</i> |
| <i>Commission action</i> | <i>Not Final</i> |

In the Matter of the Application of Sunflower Electric Power Corporation for an Order Approving (i) Continued Use of the Target Financial Ratio Levels Used in, and (ii) Amendments to its Commission Approved Formula-Based Rate for Recovery of Transmission Costs.

On March 16, 2017, Sunflower Electric Power Corporation (Sunflower) filed an Application requesting the Commission approve (i) continued use of the current levels of Debt Service Coverage (DSC) and Times Interest Earned Ratio (TIER) target metrics in Sunflower's Formula-Based Rate for Recovery of Transmission Costs (TFR), which was previously approved by the Commission in Docket No. 13-SEPE-701-TAR, and (ii) amendments to the TFR to allow adjustments in the TFR for Southwest Power Pool, Inc. competitively bid transmission projects compelled by Federal Energy Regulatory Commission Order 1000. On April 4, 2017, the Commission issued a Suspension Order to allow for a full investigation on the matter for a period of 240 days from the date the Application was filed until November 13, 2017. On October 19, 2017, Sunflower Electric Company and KCC Staff filed a joint motion for an Order extending the Suspension Order for a period of 120 days. In support of their motion, the Parties stated, "Sunflower's request for TFR competitive bid adjustments is unique and complex. Sunflower and Staff have had extensive informal discussion regarding Sunflower's request for adjustments to its TFR. Both Parties have worked collaboratively towards a revised structure of such adjustments, but have not finalized the exact details. Once the adjustments to the template are finalized Sunflower will revise its request for such adjustments and file a Supplemental Application." Sunflower did not revise its requests related to its continued use of the current DSC and TIER in the TFR, and the extension will not impact that request. On October 19, 2017, the Commission issued an Order extending the suspension period until March 13, 2018. This

case remains before the Commission, and Staff continues to be actively involved in the investigation.

KANSAS CITY POWER & LIGHT COMPANY

Docket number 17-KCPE-201-RTS
Docket type Electric
Date filed 09 Nov 2016
Action date 06 Jun 2017
Commission action Approved

In the Matter of the Application of Kansas City Power & Light Company to Make Certain Changes in Its Charges for Electric Service.

On November 9, 2016, Kansas City Power & Light Company (KCP&L) filed its abbreviated rate case Application. The total request was a \$2,829,191 decrease in revenue requirement. KCP&L was required by the Commission in Docket No. 15-GIME-025-MIS to file an abbreviated rate case to true-up to actual costs for the LaCygne Environmental Project and Wolf Creek Capital Additions. Additional items included in the case, such as the termination of several regulatory asset and liability amortizations as well as adjustment for customer migration, were also identified and approved by the Commission in Docket No. 15-KCPE-116-RTS. On April 6, 2017, the parties filed their direct testimony. In its direct testimony, Staff recommended a revenue decrease of \$4,192,681; and CURB recommended a decrease of \$3,792,805. On April 18, 2017, KCP&L filed rebuttal testimony accepting some of the adjustments recommended by Staff and CURB, and, as requested by Staff in its direct testimony, provided adjustments related to customer migration based on actual data through March 31, 2017. On April 20, 2017, the parties met collectively to discuss the possible settlement of issues in this matter. After negotiations, the parties agreed to a decrease of \$3,557,588. On June 6, 2017, the Commission issued an Order approving the Unanimous Settlement Agreement.

EMPIRE DISTRICT ELECTRIC COMPANY

Docket number 17-EPDE-101-RTS
Docket type Electric
Date filed 15 Sep 2016
Action date 10 Jan 2017
Commission action Withdrawn

In the Matter of the Application of The Empire District Electric Company for Approval of the Commission to Make Certain Changes in its Charges for Electric Service.

On September 15, 2016, The Empire District Electric Company filed an Application to increase its base rates by approximately \$6.4 million, or 25.67%. On March 16, 2016, Empire, Liberty Sub Corp. and Liberty Utilities filed a Joint Application seeking Commission approval of the acquisition by Liberty Utilities of all of the common stock of Empire in Docket No. 16-EPDE-410-ACQ. On October 6, 2016, the parties in the 16-EPDE-410-ACQ Docket agreed that Empire would withdraw its rate case application upon approval by the Commission of the Agreement in the 16-410 Docket. This rate case would not be re-filed until after May 1, 2018. On December 22, 2016, the Commission approved the agreement in the 16-410 Docket. In January 2017, the parties requested and were granted approval to withdraw the rate case Application in Docket No. 17-EPDE-101-RTS.

Major Dockets | ELECTRIC UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Electric Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.” That year runs from July 1, 2016 through June 30, 2017.

KANSAS CITY POWER & LIGHT COMPANY

| <i>Docket number</i> | <i>16-KCPE-593-ACQ</i> |
| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>28 Jun 2016</i> |
| <i>Action date</i> | <i>19 Apr 2017</i> |
| <i>Commission action</i> | <i>Denied</i> |

In the Matter of the Joint Application of Great Plains Energy Incorporated, Kansas City Power & Light Company and Westar Energy, Inc. for Approval of the Acquisition of Westar Energy, Inc. by Great Plains Energy Incorporated.

On June 28, 2016, Kansas City Power & Light Company (KCP&L) and Westar Energy, Inc. and Kansas Gas and Electric Company (Westar) filed a Joint Application seeking approval for the acquisition of Westar by Great Plains Energy, the parent company of KCP&L. Great Plains Energy agreed to acquire 100 percent of the stock of Westar in a transaction then valued at approximately \$12.2 billion, including assumed debt. Upon closing, Kansas’ two largest jurisdictional utilities will be owned by Great Plains Energy, with Westar becoming a wholly-owned subsidiary of Great Plains Energy. On August 9, 2016, the Commission issued its Order on Merger Standards, reaffirming the merger standards as modified in Docket No. 97-WSRE-676-MER, to ensure consistent approaches in the three pending merger dockets. Since the Joint Applicants in this docket filed their Joint Application prior to the issuance of the Order on Merger Standards, the Commission directed the Joint Applicants to file any modifications to their Joint Application with supporting testimony within 21 days. On August 30, 2016, the Joint Applicants filed their Verified Response to Commission’s Order on Merger Standards expressing their understanding of the Commission’s merger standards and agreeing those standards will be used to evaluate the Joint Application but did not believe that

any changes to the Joint Application were necessary. On September 9, 2016, Staff filed its Reply to Joint Applicants’ Verified Response to Commission’s Order on Merger Standards, claiming the Joint Applicants altered the merger standard to ease their burden and requested the Commission direct the Joint Applicants to amend their Joint Application to allow the other parties to fully investigate and analyze the Application, or alternatively dismiss the Joint Application without prejudice. On September 12, 2016, CURB filed its Response to Staff’s Reply, agreeing with Staff that the Joint Application is deficient and parrots Staff’s request that the Commission direct the Joint Applicants to amend their Joint Application to conform to the merger standards or dismiss the Joint Application without prejudice. On October 18, 2016, the Commission issued an Order Addressing Joint Applicants’ Verified Responses on the Commission’s Merger Standards taking no formal action at this time on Staff’s Reply or CURB’s Response. Furthermore, discovery is ongoing and may provide the parties with sufficient information to evaluate the Joint Applications. If the parties continue to believe the Joint Application does not adequately address the merger standards, they may file for the appropriate relief. On November 2, 2016, the Joint Applicants requested leave to file Supplemental Direct Testimony in an attempt to address the Commission’s concerns expressed in previous orders that the Application may not conform to the merger standards. On December 1, 2016, the Commission granted the Joint Applicants request to amend their filed testimony and Application. In doing so, the Commission expressly indicated that “Accepting the Joint Applicants’ supplemental testimony should not be construed as alleviating the Commission’s concerns that the Application may not conform to the merger standards.” On

December 16, 2016, Staff, CURB, and the several other interveners filed Direct Testimony requesting that the Commission deny the merger in its current form. The Joint Applicants filed rebuttal testimony on January 9, 2017. The Commission held an evidentiary hearing from January 30, 2017 through February 6, 2017. After taking briefs by all parties through March 20, 2017, the Commission issued its Order denying the Joint Application on April 19, 2017. In its Order denying the Joint Application, the Commission found that the Transaction would not promote the public interest because it failed to meet the merger standards enumerated in previous orders. On May 23, 2017 the Commission issued an Order on the Joint Applicant’s Petition for Reconsideration. In doing so, the Commission stated the following: “The Commission encourages the parties to continue working together to revise the transaction to address the Commission’s concerns related to purchase price, capital structure, and other issues and welcomes the filing of a new application that can satisfy the merger standards and advance the public interest.”

EMPIRE DISTRICT ELECTRIC COMPANY

| | |
|--------------------------|------------------------|
| <i>Docket number</i> | <i>16-EPDE-410-ACQ</i> |
| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>16 Mar 2016</i> |
| <i>Action date</i> | <i>22 Dec 2017</i> |
| <i>Commission action</i> | <i>Approved</i> |

In the Matter of the Joint Application of The Empire District Electric Company, Liberty Sub Corp. and Liberty Utilities (Central) Co. for Approval of an Agreement and Plan of Merger and for Other Related Relief.

On March 16, 2016, The Empire District Electric Company (Empire), Liberty Sub Corp. (LSC), and Liberty Utilities (Central) Co. (LU Central), a subsidiary of Algonquin Power & Utilities Corp. (Algonquin), filed a Joint Application for approval of an Agreement and Plan

of Merger (Merger Agreement). Under the Merger Agreement, Algonquin will acquire, indirectly through its subsidiary LU Central, all of the capital stock of Empire (Transaction). LSC, an entity owned by LU Central, will be merged with and into Empire, with Empire emerging as the surviving entity. Immediately following the merger LSC will cease to exist. Algonquin offered to pay \$34 per share in cash, or approximately \$1.5 billion, for all of the outstanding common stock of Empire, and will assume \$0.9 billion of existing Empire indebtedness. This equates to a total enterprise value of approximately \$2.4 billion for Empire's assets. At the closing of the Transaction, Empire will become a wholly-owned subsidiary of LU Central and will cease to be a publicly held corporation. On October 6, 2016, the parties filed direct testimony and testimony in support of Unanimous Settlement Agreement (Settlement). In its testimony, Staff and CURB recommended approval of the Transaction with the modifications and conditions contained within the Settlement because it promotes the public interest as determined by an application of the Commission's Merger Standards. As part of the Settlement, Empire will withdraw its current rate increase request pending before the Commission, and current rates will remain in effect until at least January 1, 2019. Additionally, LU Central and Empire have agreed to maintain or improve Empire's current quality of service using benchmarks established for customer service from 2013 to 2015 and agree to pay a refund to its Kansas customers for any year the annual statistics in the Kansas service area decrease in reliability. An Order approving the Unanimous Settlement Agreement was issued on December 22, 2016.

| <i>Commission action</i> | <i>APRVD w/Modifications</i> |

In the Matter of the Application of Kansas City Power & Light Company For Approval of Its Demand-Side Management Portfolio Pursuant to the Kansas Energy Efficiency Investment Act ("KEEIA"), K.S.A. 66-1283.

On April 6, 2016, KCP&L filed an Application requesting approval of a suite of energy efficiency programs with an expected cost of \$29.6 million and also requesting recovery through its proposed Demand-Side Investment Mechanism Rider. On August 8, 2016, Staff, CURB, Westar, Climate and Energy Project, National Housing Trust, Atmos Energy, Black Hills Energy, Kansas Gas Service, and Brightergy filed direct testimony. On August 15, 2016, CURB and Staff filed cross-answering testimony. KCP&L filed rebuttal testimony on August 22, 2016. KCP&L filed Testimony in Support of Settlement of Non-Unanimous Stipulation and Agreement on August 31, 2016, and on September 12, 2016, filed corrections to its KEAA report. On December 15, 2016, the Commission amended its prior Procedural Schedule and directed KCP&L to supplement its testimony in support of the Application, and granted the other parties an opportunity to respond via surrebuttal testimony. On December 15, 2016, KCP&L filed the Supplemental Direct Testimony. On January 20, 2017, CURB filed Supplemental Testimony and Staff filed Surrebuttal, Supplemental, and Amended Testimony. An evidentiary hearing was held March 22, 2017 thru March 24, 2017. On June 22, 2017, the Commission issued an order upholding its prior orders and finding:

(1) The appropriate benefit-cost tests are the 1) Participant Test; 2) Ratepayer Impact Test (RIM); 3) Program Administrator Test (PAC); and 4) Total Resource Cost Test (TRC).

However, the Commission shall continue to place primary emphasis on the TRC and RIM tests because these tests provide information particularly relevant to KEEIA's and the Commission's shared policy objectives.

(2) For the purposes of figuring KCP&L's avoided capacity cost, Staff's proposal is the most appropriate.

(3) Staff's proposed NTG ratio of 0.8 was appropriate and supported by the record.

(4) KCP&L's proposed TRM is generally acceptable.

(5) The plain reading of KEEIA does not expressly forbid attempts to incentivize fuel switching of business or industrial customers. Be that as it may, for a

demand-side program implemented by an electric utility, the Commission concludes regardless of whether the demand-side program is an energy efficiency, load management, demand response, interruptible or curtailable load or any other proposed measure, the result must be a reduction of the net consumption of electricity by the participating retail customer.

(6) It is appropriate to amend past EM&V requirements to allow KCP&L to conduct EM&V in accordance with the EM&V plan and scheduled outlines in KCP&L's Appendix C of the KEEIA Report. Further, it is necessary to amend past EM&V requirements to grant KCP&L's request to hire an EM&V independent contractor with KCC Staff approval, and a Commission hired EM& V auditor.

(7) The existing EE Rider should be utilized to recover costs associated with the demand-side programs approved herein.

(8) Staff's decoupling mechanism and shared benefits proposal is in the public interest.

(9) Staff's proposed treatment of labor costs associated with DSM/energy efficiency programs ensures those costs are not double recovered and, therefore, Staff's proposal is in the public interest.

(10) KCP&L's Ten Percent Portfolio Budget waiver would deprive the Commission of any significant oversight regarding KCP&L's demand-side program budgets and is, therefore, not in the public interest.

(11) KCP&L's proposal to form an Advisory Group to meet and review the progress of KCP&L's KEEIA Cycle 1 programs and EM&V reports is supported by the record and is in the public interest.

(12) The proposed Educational Programs are in the public interest because of their parameters, descriptions, and target markets.

The Commission's prior orders regarding the 5% budget cap on educational programs remain in effect and will result in ensuring the programs are supported by a reasonable budget.

(13) The proposed Income-Eligible Programs are in the public interest because of their parameters, descriptions, and target markets. Staff's proposal to cap Income-Eligible Programs at 5% serves as a helpful guideline which will provide assurance

the Income-Eligible Programs will be supported by a reasonable budget similar to the Educational Programs. The Settlement Agreement, as it relates to low-income programs is in the public interest.

(14) The Home Lighting Rebate Program is in the public interest. However, the Residential Programmable Thermostat Program, Whole House Energy Efficiency Program, and the Home Energy Report did not pass the benefit-cost tests and are, therefore, not in the public interest.

(15) The Business Energy Efficiency Rebate- Standard Program and the Demand Response Incentive Program are in the public interest. However, the Business Energy Efficiency Rebate-Custom, Strategic Energy Management Program, Block Bidding and Small Business Direct Install Programs either do not pass the TRC or the RIM tests and are, therefore, not in the public interest.

(16) The Research and Pilot Program is in the public interest.

(17) KCP&L's request to terminate the Cool Homes, Energy Star New Homes, Energy Audit and Energy Measure Rider, and Building Operators Certificate programs are in the public interest. The Commission will, however, permit KCP&L to continue its Building Operators Certificate program if, it so chooses.

On June 30th, 2017, KCP&L notified the Commission that it withdrew its DSM Plan application in its entirety, effective immediately.

GENERAL INVESTIGATION

| | |
|--------------------------|------------------------|
| <i>Docket number</i> | <i>16-GIME-403-GIE</i> |
| <i>Docket type</i> | <i>Electric</i> |
| <i>Date filed</i> | <i>12 Jul 2016</i> |
| <i>Action date</i> | <i>12 Sep 2017</i> |
| <i>Commission action</i> | <i>Denied</i> |

In the Matter of the General Investigation to Examine Issues Surrounding Rate Design for Distributed Generation Customers.

On July 12, 2016, the Commission issued an Order Opening General Investigation to examine various issues surrounding rate structure for distributed generation (DG) customers. On February 16, 2017, the Commission issued an Order Setting Procedural Schedule. The order set a schedule for the parties to file comments, engage in roundtable discussions, and participate in an evidentiary hearing. On March 17, 2017, Midwest Energy, Southern

Pioneer, which was joined by KEC, Westar, Brightergy, CEP, KCP&L, United Wind, Cromwell, Sunflower and Mid Kansas, CURB, Empire, and Commission Utilities Staff (Staff) filed their initial Comments.

On May 5, 2017, Southern Pioneer, Westar, Midwest, Staff, Sunflower and Mid-Kansas, KCP&L, Empire, Brightergy, Cromwell, IBEW 304, and CEP filed their reply comments. On June 16, 2017, Staff, Westar, KCP&L, Sunflower, Mid-Kansas, Southern Pioneer, KEC, Midwest Energy, Empire, Brightergy, United Wind, and IBEW 304 filed a Motion to Approve Non-Unanimous Stipulation and Agreement (S&A). On June 20, 2017, Westar, KCP&L, Southern Pioneer and KEC, and Staff filed testimony in support of the S&A. On June 20, 2017, CURB, Cromwell, and CEP filed testimony in opposition to the Non-Unanimous Stipulation and Agreement. On June 27-28, 2017, the Commission held an evidentiary hearing. On September 21, 2017, the Commission issued a final order accepting the terms of the S&A and finding:

- (1) DG customers should be uniquely identified within the ratemaking process because of their potentially significant different usage characteristics.
- (2) The current two-part residential rate design is problematic for utilities and residential private DG customers because DG customers use the electric grid as a backup system resulting in their consuming less energy than non-DG customers, which results in DG customers not paying the same proportion of fixed costs as non DG customers.
- (3) The following rate design options are appropriate for residential private DG customers: a. A cost of service based three-part rate consisting of a customer charge, demand charge, and energy charge; b. A grid charge based upon either the DG output or nameplate rating; or c. A cost of service-based customer charge that is tiered based upon a customer's capacity requirements. However, the list is not meant to preclude a utility from proposing other appropriate rate designs within that individual utility's rate case proceeding, but rather recognizes that each utility might have different conditions and different needs. Thus, the S&A allows flexibility for a variety of alternatives.
- (4) A customer education program must

be implemented whenever new residential private DG rate structures are ordered, and that program should be completed as soon as practical after the Commission approves a new rate design.

- (5) Rates for private residential DG customers should be cost-based and any unquantifiable value of resource approach should not be considered when setting rates.
 - (6) A value of resource study is not required by the Commission at this time. However, nothing precludes any party from developing any study it believes to be helpful to the Commission in establishing just and reasonable rates.
 - (7) DG rate design policy is best determined in this docket in order to provide certainty to all parties for the benefit of the orderly development of the private DG market in Kansas.
 - (8) Any DG-specific rate design implemented subsequent to this proceeding to serve residential private DG customers would apply to those customers adding DG systems on or after the effective date of those tariffs.
 - (9) The S&A provides guidance to the cooperatives that have elected to be self-regulated pursuant to K.S.A. 66-104d, but such self-regulated cooperatives shall not be bound by the S&A.
- On October 5, 2017, CEP filed a Petition for Reconsideration. On October 16, 2017, Westar, KCP&L, and Staff filed their respective Responses to CEP's PFR. On October 26, 2017, CEP filed replies to Westar, KCP&L and Staff's responses to CEP's PFR. On November 2, the Commission issued an Order denying CEP's PFR.

Dockets

LARGE ELECTRIC UTILITIES (revenues of more than \$10M)

The Commission acted upon the following dockets filed by Large Electric Utilities from July 1, 2016 to June 30, 2017. These filings involved companies with operating revenues of more than \$10,000,000.

Natural Gas Utilities

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis.

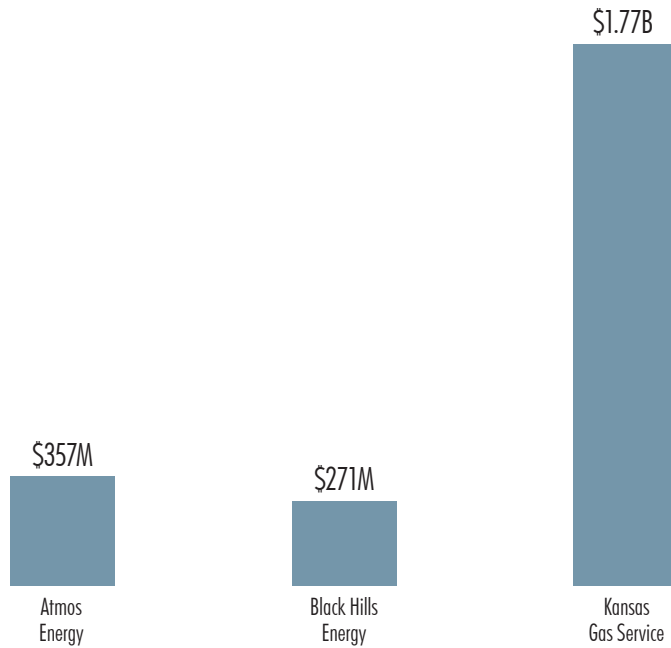

GAS COMPANIES STATEWIDE GROSS PLANT | 2012–2016

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility's rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

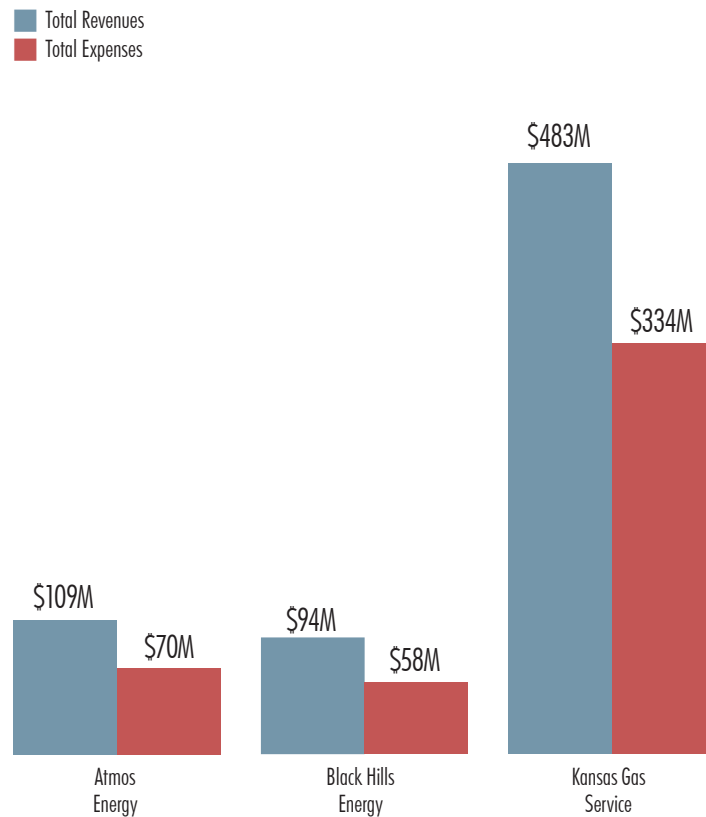

GAS COMPANIES GROSS PLANT, BY COMPANY | 2016

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, one entity encompasses a vast majority of utility gross plant across Kansas.

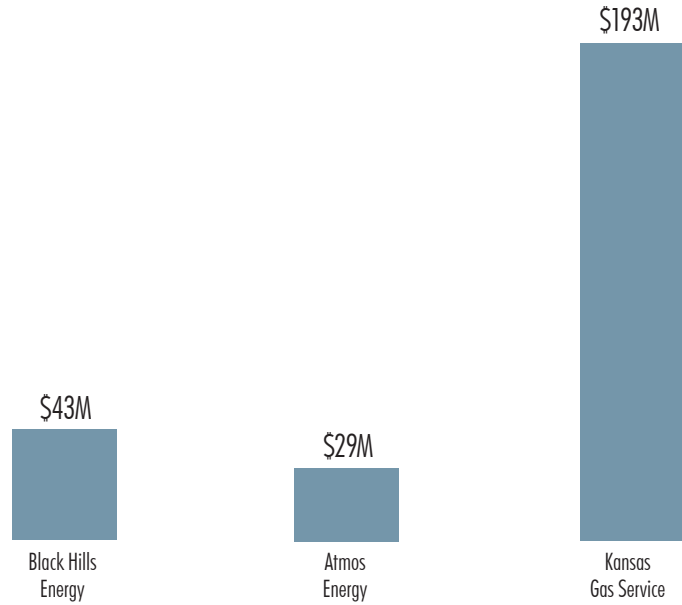

GAS COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2016

This chart compares each utility's annualized revenues and expenses and the difference between the two represents the gross margin of each company.

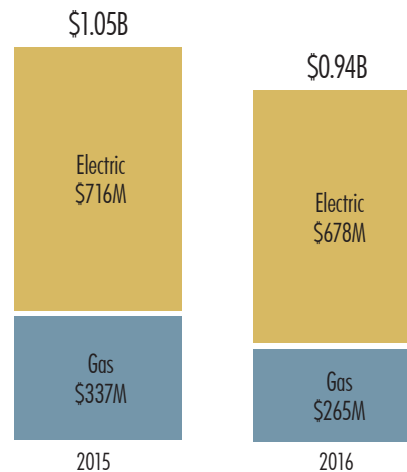

GAS COMPANIES PURCHASED GAS COSTS, BY COMPANY | 2016

This chart takes the expense portion from each utility on the previous table and carves out the cost of purchased gas.

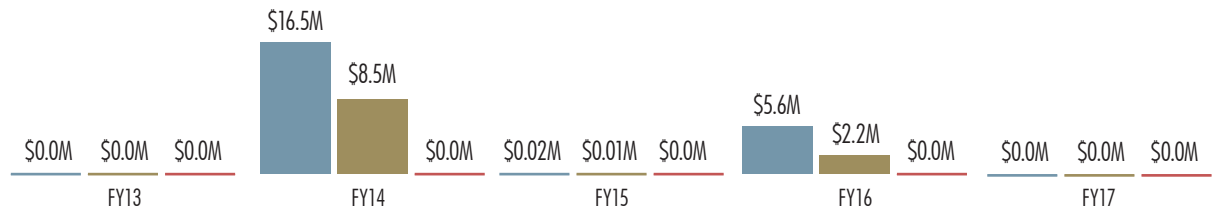

TOTAL PURCHASED GAS (GAS UTILITIES) AND TOTAL PURCHASED FUEL FOR GENERATION (ELECTRIC UTILITIES) | 2015 - 2016

This chart shows the total natural gas purchased for utility use for the last two years. Each column bar is broken down into blue and yellow portions. The blue represents gas purchased by the gas utilities for regulated delivery to their retail and wholesale customers. The yellow represents natural gas “fuel” purchased by electric utilities for natural gas-fired generation of electricity. Whereas the bulk of retail gas use (blue) is for winter heating, utility gas fuel use is predominantly during peak electric usage summer months where baseload nuclear and coal generation have already been dispatched and the remaining load must be served by gas-fired generation.

GAS UTILITIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY13–FY17

- Requested
- Granted
- Refunds and/or Rate Reductions

RESIDENTIAL GAS BILL COMPARISON | JULY 2016 - JUNE 2017

The following chart represents a comparison of monthly bills based on average residential consumption of 5.117 Mcf.

| Company | Customer Charge | Delivery Charge | Cost of Gas** | Hedge Factor | GSRS per Meter/Month | Property Tax | Total Bill Without Tax | Cost Per MCF | Utility Bill as a % of National Avg. | <i>Date filed</i> | <i>02 May 2016</i> |
| <i>Action date</i> | <i>29 Nov 2016</i> |
| <i>Commission action</i> | <i>Approved</i> |

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Adjustment of its Natural Gas Rates in the State of Kansas.

On May 2, 2016, Kansas Gas Service, a Division of ONE Gas, Inc. (KGS) filed an Application to make changes in its rates and charges for natural gas service. KGS requested an increase of \$35,446,665. The net rate impact of this request to customers result in a \$27,985,168 increase after rebasing the amounts currently collected through the Gas System Reliability Surcharge (GSRS). KGS also requested to establish an annual rate mechanism referred to as a Cost of Service Adjustment (COSA) mechanism that would provide an annual review and adjustment of KGS's cost of service and actual return on equity; to discontinue its Pension and Other Post-Employment Benefits (OPEB) trackers; to share the savings between customers and shareholders that have resulted from pension expenses having been pre-funded; and new corporate asset depreciation rates. On September 7, 2016, the parties filed their direct testimony. In its direct testimony, Staff recommended an increase of \$12.1 million; and CURB recommended an increase of \$3.7 million. Both parties opposed KGS's COSA mechanism and its proposal to share pension expense savings, and Staff also opposed KGS's request to eliminate the Pension and OBEP trackers. CenterPoint Energy Services, Inc. also filed testimony recommending changes to KGS's tariffs relating to transportation services but did not take a position on the revenue requirement. On October 3, 2016, the parties met collectively to discuss the possible settlement of issues in this matter. After extensive negotiations, the parties agreed to an increase of \$15.5 million. On November 29, 2016, the Commission issued an Order approving the Unanimous Settlement Agreement.

| <i>Action date</i> | <i>21 Nov 2017</i> |
| <i>Commission action</i> | <i>Approved</i> |

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Approval of an Accounting Order to Track Expenses Associated with the Investigating, Testing, Monitoring, Remediating and Other Work Performed at the Manufactured Gas Plant Sites Managed by Kansas Gas Service.

On April 11, 2017, Kansas Gas Service, a division of ONE Gas, Inc., filed an Application requesting approval of an Accounting Authority Order (AAO) to record to a regulatory asset, and recover over 10-years in future rate cases, costs associated with environmental work at 12 former Manufactured Gas Plant sites in Kansas. This request was not limited to any total amount of cost. Additionally, KGS sought permission to retain for shareholders the first \$9.49 million of insurance proceeds received by KGS in compensation for the same amount of MGP costs it incurred from 1997-2016. For all insurance recoveries in excess of \$9.49 million, KGS sought to retain 40% of the proceeds as an incentive to pursue the recoveries. On September 8, 2017, Staff and the Citizens Utility Ratepayer Board (CURB) filed testimony that opposed KGS request. Staff suggested a framework that would allow KGS to recover 60% of all costs with a return on the remaining balance to be recovered. Staff's proposal also required KGS to credit 100% of all insurance proceeds against the costs charged to ratepayers. If only 60% of costs were sought for recovery from ratepayers, 60% of insurance proceeds should be credited to customers. On October 12, 2017, the Parties filed a unanimous settlement agreement that provided for KGS to defer a maximum of \$15 million in MGP costs to be recovered in a subsequent rate case over 15-years. For rate cases after the first rate case, different amortization periods may apply, but they will result in no less than 40% of the net present value

of the MGP costs being borne by KGS shareholders. The agreement also provides that KGS will credit 100% of all insurance recoveries related to these MGP costs will be credited against the costs sought to be recovered from ratepayers. Lastly, the agreement provided for substantial annual reporting requirements designed to keep the Commission and CURB informed as to the status of KGS's MGP remediation activities, costs incurred, and environmental solutions chosen for the MGP projects. On November 21, 2017, the Commission approved the settlement agreement.

The Commission acted upon the following dockets filed by Large Gas Utilities from July 1, 2016 to June 30, 2017. These filings involved companies with operating revenues of more than \$10,000,000.

| <i>Date filed</i> | <i>14 Jan 2013</i> |
| <i>Action date</i> | <i>28 Feb 2017</i> |
| <i>Commission action</i> | <i>Revoked</i> |

In the Matter of the Investigation of Howison Heights, Inc's Ability to Provide Sufficient and Efficient Service.

On February 8, 2013, the Commission ordered an investigation into Howison's ability to provide sufficient and efficient service to its customers. This report is an update on the progress of events in this matter from October 2016 to March 2017. Mr. Howison, Ottawa Rural Water District No. 2 (RWD #2), Central National Bank, and Bennington State Bank signed an amended agreement transferring Howison Heights, Inc. to RWD #2 in January 2017. Construction of an interconnection between Howison's customers and RWD #2 began in December 2016 and was completed in February 2017. The Commission approved the revocation of Howison Heights' Certificate of Convenience on February 28, 2017. Transfer of the Howison Heights water system to RWD #2 occurred on March 2, 2017.

NUMBER OF KUSF TELECOMMUNICATION FILINGS | FY13–FY17

KUSF FUNDING OBLIGATIONS | 3/1/17 - 2/28/18

Major Dockets | LARGE TELECOM UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Telecom Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

GENERAL INVESTIGATION

Docket number 16-GIMT-382-GIT
Docket type Telecom
Date filed 05 Apr 2016
Action date 22 Sep 2016
Commission action Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

This proceeding was opened on April 5, 2016, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 1, 2016. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an Order on September 22, 2016, in which it determined that: (1) KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2015 and will be used in 2017 only for the provision, maintenance, and upgrading of facilities and services for which support was intended; and (2) Sage Telecom Communications, LLC shall be assessed a monetary penalty of \$2,250 for late-filed certification documents.

TAG MOBILE, LLC

Docket number 16-TAGC-323-SHO
Docket type Telecom
Date filed 14 Jan 2016
Action date 19 Oct 2017
Commission action Order Issued

In the Matter of a General Investigation of TAG Mobile, LLC to Show Cause Why This Commission Should Not Initiate Sanctions

and Fines and Cancel, Suspend and Revoke Any Authority the Carrier Currently Holds.

This proceeding was opened on January 14, 2016, requiring TAG Mobile, LLC (TAG) to show cause why it should not be subject to sanctions and fines and its federal and state ETC designations for Lifeline support should not be canceled, suspended and/or revoked. On June 23, 2017, Staff filed direct testimony and TAG filed rebuttal testimony on July 31, 2017. On August 25, 2017, the Parties filed a Joint Motion to Waive Evidentiary Hearing and Proceed Upon Paper Record. On October 19, 2017, the Commission issued an Order in which it: (1) revoked TAG’s federal and state ETC designations for Lifeline support; (2) required TAG to refund \$942,298.98 in Kansas Lifeline support by January 17, 2018; (3), determined TAG is not eligible to receive any of the accrued Kansas Lifeline Service Program credits; and (4) ordered TAG to remit payment of a \$118,000 fine for its failure to meet its Kansas Lifeline Service Program obligations.

GENERAL INVESTIGATION

Docket number 16-GIMT-511-GIT
Docket type Telecom
Date filed 24 May 2016
Action date 11 Oct 2016
Commission action Order Issued

In the Matter of an Investigation to Address CenturyLink’s CAF II and KUSF Support.

This proceeding was opened on May 24, 2016, to review CenturyLink’s Connect America Fund (CAF) II support and its impact on the Company’s annual KUSF support. In its Order opening the Docket, the Commission directed CenturyLink to file its proposed model, revised CAF II support offset calculations, 2015 enabled locations reported to the FCC, and its preliminary 2016 enabled data by July 1, 2016. CenturyLink filed the required documentation on June 30, 2016, and on August 16, CenturyLink filed a revised

CAF II model. The Commission issued an Order on October 11, 2016: (1) adopting CenturyLink’s August 16, 2016, CAF II model; (2) adopting the annual true-ups proposed by Staff, resulting in a net reduction to CenturyLink’s KUSF support for January 2015 through February 2017; (3) directing CenturyLink to file its updated CAF II model, CAF II offset, KUSF support calculations, and supporting documentation by October 19, 2016; and (4) directing CenturyLink to submit an updated CAF II model, reflecting its 2016 enabled locations and preliminary 2017 enabled locations, and CAF II support offset, to the Commission in this Docket by May 1, 2017. CenturyLink made the required filing on May 1, 2017, and filed its updated list of previously-identified Round 2-eligible census blocks to which CenturyLink did not deploy broadband using Round 2 support due to changes in CenturyLink’s deployment plans.

GENERAL INVESTIGATION

Docket number 16-GIMT-517-GIT
Docket type Telecom
Date filed 07 Jun 2016
Action date 23 Feb 2017
Commission action Order Issued

In the Matter of a General Investigation into the Implementation of Senate Substitute for House Bill 2131.

This proceeding was opened on June 7, 2016, to implement Senate Substitute for House Bill 2131, which was passed by the 2016 Kansas Legislature and went into effect on July 1, 2016. The Commission solicited comments and reply comments on Staff’s initial Report and Recommendation. Staff filed a Report and Recommendation on July 29, 2016, based on the comments and reply comments filed. A Commission Order was issued on February 23, 2017, in which the Commission implemented the statute and, in so doing, determined: 1) its authority to regulate rural telephone

companies is unaffected by the revisions to K.S.A. 66-2017; 2) a process was determined for applications for rate increases filed pursuant to K.S.A. 66-2007(d); 3) price cap carriers are authorized to increase their local rates as necessary to maintain the local rate floor and are not limited by the FCC's phase-in of the local rate floor; 4) price cap carrier rates, other than the initial residential local exchange access line, are price deregulated pursuant to K.S.A. 66-2005(q)(1)(F); 5) the definition of "net retail revenue" for KUSF reporting purposes; and 6) local exchange carriers may offer individual customer pricing without petitioning the Commission and carriers are relieved of their ICP reports.

GENERAL INVESTIGATION

Docket number 16-GIMT-575-GIT
Docket type Telecom
Date filed 12 Jul 2016
Action date 18 Oct 2016
Commission action Order Issued

In the Matter of a General Investigation to Address Issues Concerning the Kansas Lifeline Service Program.

This proceeding was opened on July 12, 2016, to solicit comments from the telecommunications industry regarding what changes, if any, it should make to the Kansas Lifeline Service Program (KLSP) as a result of the recent changes made by the FCC to the federal Lifeline program. Following the filing of initial and reply comments, Staff filed a Report and Recommendation. The Commission issued an Order on October 18, 2016: (1) revising the KLSP eligibility criteria to mirror the federal Lifeline eligibility criteria, effective December 2, 2016 or the effective date of the changes to 47 C.F.R. § 54.400(j) and 47 C.F.R. § 54.409(a), if the FCC delays the implantation date; (2) requiring all mobile Eligible Telecommunications Carriers (ETCs) for state Lifeline purposes to request approval of their calling plans for the KLSP at least 30 days prior to offering such plans and receiving support from the KLSP; (3) not taking any action with regard to Broadband Internet Access Service and the KLSP; (4) moving the KUSF snapshot date from the last day to the first day of the month, effective December 2016; (5) requiring all KLSP providers to abide by the FCC's record

retention rules in 47 C.F.R. § 54.417; (6) determining that Competitive Local Exchange Carriers (CLECs) should not be required to participate in the KLSP, and CLECs not receiving KLSP as of the date of the Order must be designated as an ETC in order to provide KLSP; (7) ceasing to require ETCs to utilize the KCC-approved Lifeline form and instead allowing ETCs to use an enrollment form of their own design that meets state and federal requirements until the FCC's standardized form becomes mandatory; (8) seeking additional comment on the issue of supported services; and (9) adopting the FCC's re-certification rules in 47 C.F.R. § 54.410(f) and de-enrollment rules in 47 C.F.R. § 54.405(e). After receiving additional comments on the definition of universal service, the Commission issued an Order on February 28, 2017, in which the current definition of universal service will remain unchanged at this time.

GENERAL INVESTIGATION

Docket number 16-GIMT-587-GIT
Docket type Telecom
Date filed 14 Jul 2016
Action date 18 Oct 2016
Commission action Order Issued

In the Matter of a General Investigation Into the Adjustment of Intrastate Switched Access Charges for Rural Telephone Companies in Compliance with K.S.A. 2013 Supp. 66-2005(c) and FCC Reforms.

This proceeding was opened on July 14, 2016, to facilitate the adjustment of the Rural Local Exchange Carriers' (RLECs) intrastate access rates and accompanying KUSF adjustments under K.S.A. 66-2005(c) with respect to originating switched end office and traffic sensitive transport. Direct testimony was filed by Commission Staff on September 21, 2016, recommending the following: (1) the intrastate originating switched access rates, calculated intrastate originating and terminating access revenues, net revenue changes, and Connect America Fund support offsets should be adopted; (2) the Commission should adopt a net aggregate \$411,976 reduction in the RLECs' annual KUSF support, effective July 2017; and (3) the access revisions should be effective July 2017, concurrent with the FCC's implementation of the July 2017 intercarrier compensation reforms. The Commission issued an Order on October

18, 2016, adopting the Commission Staff's recommendations.

GENERAL INVESTIGATION

Date filed 27 Oct 2016
Action date N/A
Commission action Stayed

In the Matter of the Application of Southwestern Bell Telephone Company d/b/a AT&T Kansas for an Order Confirming Relinquishment of its Eligible Telecommunications Carrier Designation in Specified Areas, and Notice Pursuant to K.S.A. 2015 Supp. 66-2006(d) of Intent to Cease Participation in the Kansas Lifeline Service Program.

On October 27, 2016, Southwestern Bell Telephone Company d/b/a AT&T Kansas (AT&T) filed an Application requesting relinquishment of its ETC designation in all currently designated areas except for the census blocks identified in Exhibit B to its Application. On April 27, 2017, the KCC issued an Order confirming that AT&T is authorized to cease participation in the Kansas Lifeline Service Program, effective May 31, 2017, and requiring Staff to file a recommendation pertaining to AT&T's ETC relinquishment request by May 10, 2017. On May 4, 2017, Staff filed a Report and Recommendation in

which it recommended the KCC: (1) grant AT&T's request for ETC relinquishment for Lifeline purposes in all of the requested census blocks; (2) grant AT&T's request for ETC relinquishment in all but 932 of the 116,282 requested census blocks; and (3) require the remaining ETCs to ensure that all customers served by AT&T will continue to be served. The Commission requested additional briefing from the parties on July 11, 2017. On July 19, 2017, AT&T requested the Commission to stay its Application until such time as it makes revisions to its Exhibits and/or notifies the Commission of its desire to lift the stay and continue the proceeding. The request was made so that AT&T could finalize its list of census blocks requested in its Exhibits. The Commission issued an Order on July 27, 2017, staying the proceeding until such time as AT&T notifies the Commission of its desire to lift the stay and continue the proceeding.

GENERAL INVESTIGATION

Docket number 17-GIMT-405-GIT
Docket type Telecom
Date filed 28 Mar 2017
Action date 21 Sep 2017
Commission action Order Issued

In the Matter of Certification of Compliance In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas Universal Service Fund Support.

This proceeding was opened on March 28, 2017, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The data was to be filed by July 3, 2017. The data is used to determine whether the KCC will certify to the FCC and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately. The KCC issued an Order on September 21, 2017, in which it determined that KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support used in 2016 and will be used in 2018 only for the provision, maintenance, and upgrading of

facilities and services for which support was intended.

Docket type Telecom
Date filed 19 Jun 2017
Action date N/A
Commission action Pending

In the Matter of the Application of Rainbow Telecommunications Association, Inc. for an Increase in its Cost-Based Kansas Universal Service Fund Support.

Rainbow filed an Application requesting an increase of \$1,387,985 in its high-cost KUSF support on June 19, 2017. Direct testimony was filed on behalf of Commission Staff on October 26, 2017, recommending an intrastate revenue increase of \$618,864. Staff also recommended that all audit expense included in this figured be removed after five years, consistent with the amortization period. Finally, Staff recommended Rainbow perform the following actions: (1) revise and update the existing Management and Operational Service Arrangement between Rainbow and Carson Communications, LLC to reflect the current affiliate name; (2) enter into a formal agreement between Rainbow and its affiliate addressing the provision and reimbursement of services provided to Rainbow, including labor, office space, furniture, equipment, and other support services; (3) enter into a formal agreement for goods and/or services provided between

Rainbow and Harvest Video, LLC; and (4) conduct current, annual reviews of the Board of Directors minutes to update and document the time spent by the Board on regulated and non-regulated operations. On November 8, 2017, Staff revised its recommended level of annual cost-based KUSF support through errata testimony, to an increase of \$685,093. On November 9, 2017, Staff and Rainbow filed a Joint Motion to Approve Staff's Position Regarding Rainbow's Annual Cost-Based KUSF Support. A Commission Order is pending.

Dockets

Commission Action Accepted

In the Matter of the Application of WTC Communications, Inc. Filing New Access Services Tariff.

Transportation

The role of the Transportation Division of the Kansas Corporation Commission (KCC) is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection to the extent not preempted by federal law.

Motor Carriers

The chief responsibility of the Transportation Division is to develop, modify and implement licensing, auditing, inspection and other administrative procedures that promote safe and efficient motor carrier operations, while balancing public interest and minimizing administrative burdens to the extent possible. Likewise, state law requires the KCC to verify that each new motor carrier is in compliance with the Commission's safety rules and regulations within 18 months of granting the motor carrier Commission operating authority. To advance the Division's established mission, Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The Transportation Division also works closely with the Kansas Highway Patrol (KHP) and the Federal Motor Carrier Safety Administration (FMCSA) to reduce accidents involving motor carriers through promotion of safety education to the motor carrier industry and oversight of State and Federal regulations.

Regarding safety education, the KCC sends e-mails and invitations to each Kansas-based motor carrier that applies for and receives a new USDOT number. The invitations are mailed throughout the month and are designed to encourage the new entrant motor carriers to register their company in the Kansas Trucking Regulatory Assistance Network (KTRAN) and to attend the free Commission-sponsored Safety Seminars focused on the state and federal motor carrier rules and regulations. KCC Special Investigators (SIs) conduct the educational safety seminars throughout Kansas six times per month. Currently, motor carriers may attend one of these seminars in Bonner Springs, Topeka, Chanute, Hutchinson, Hays or Garden City. These seminars are designed to inform and educate new, existing, and out-of-compliance motor carriers of the Commission's rules and regulations. Additionally, the Transportation Staff conducts educational safety seminars for the graduating classes at the truck driving technical schools in Liberal, Kansas City, Topeka, Wichita, and Fort Scott.

Since the inception of the federal Comprehensive Safety Analysis (CSA)

program, the FMCSA has responded to concerns from industry and enforcement by updating the program in an effort to improve their motor carrier safety compliance program. The goal of the CSA program has been to intervene early enough in a motor carrier's operation to permit the identification of problem areas and an opportunity for the motor carrier to correct the concerns before an accident occurs. The Federal New Entrant program requires all motor carriers seeking a federal interstate USDOT number to pass a safety audit within 12 months of beginning operations.

The CSA program focuses on 16 regulations that are considered essential to a motor carrier's basic safety plan and therefore necessary to operate in interstate commerce. The CSA audit uses on-road safety performance data to measure a carrier's safety fitness. The data is classified into seven specific categories of carrier/driver behavior to include: unsafe driving; fatigued driving (Hours of Service violations); driver fitness concerns; controlled substances/alcohol programs; vehicle maintenance concerns; cargo-related safety concerns; and the carrier's crash indicator. A

motor carrier’s failure to comply with any one of the 16 regulations results in an automatic failure of the safety audit. A motor carrier who fails a new entrant safety audit is provided formal notice of the failure and 60 days to correct the problems identified. Only those carriers who fail to correct the problems or who fail to request either additional time or a formal review are subject to revocation of the carrier’s interstate operating authority. On the other hand, a carrier who passes the review is moved to the bottom of the review list until such time as the carrier’s safety indicators decline and require official intervention.

Regarding motor carrier safety, the KCC, the Kansas Department of Revenue (KDOR) and the Kansas Highway Patrol (KHP) implemented a system aimed at halting the intrastate motor carrier operation of those interstate carriers who have failed to meet the minimum safety requirements of a New Entrant Safety Audit. The KCC Staff will formally recommend that the Commission suspend a carrier listed on a federal out-of-service order. The Director of Vehicles will issue a “tag

pick-up” request to the Kansas Highway Patrol.

The KCC, KHP, KDOR and FMCSA share responsibilities in the oversight of both the state and federal motor carrier safety and economic rules and regulations. This partnership has proven to be extremely efficient and effective in contacting more carriers and drivers and in identifying high risk carriers and drivers. As a result, it is possible for the FMCSA and state oversight agencies to apply a wider range of interventions aimed at correcting high risk behavior.

These efforts have been rewarded with a measurable reduction in the number of carriers operating in an unsafe manner as well as an improved rate of compliance among Kansas carriers when compared to states in the surrounding region. The following charts, compiled from data provided by the FMCSA, demonstrate a couple of the metrics we use to measure the effectiveness of our safety education classes and enforcement mechanisms.

The chart below illustrates the number of “unsatisfactory carriers” found

in the past federal fiscal year (FFY). Unsatisfactory carriers are those who have been found to have committed violations of applicable regulations after a compliance review, have a proposed unsatisfactory or have been rated unsatisfactory by the FMCSA. The results for the ten states in the Midwest region demonstrate Kansas has the 2nd lowest percentage of compliance reviews with an “unsatisfactory” outcome over the past FFY year.

The charts on the following page provide a FMCSA Motor Carrier Management Information System (MCMIS) data snapshot of the number of Kansas domiciled carriers involved in crashes across the country. Crashes involving Kansas domiciled carriers – those that are required to take the safety education program we provide – represent a much smaller percentage of the total crashes than the nationwide trend. Since 2011, Kansas domiciled motor carriers have shown a steady decrease in the number of accidents nationwide. These numbers provide a testimony to the success of the KCC’s safety programs that reach both interstate and intrastate carriers.

| UNSATISFACTORY CARRIERS FOR FFY YEAR 2017 IN THE MIDWEST REGION | | | |
|---|------------|-------------------------|-----------------------|
| STATE | REVIEWS | PROPOSED UNSATISFACTORY | UNSATISFACTORY RATING |
| Nebraska | 138 | 7 | 5.07% |
| Missouri | 434 | 5 | 1.15% |
| Ohio | 651 | 25 | 3.84% |
| Illinois | 321 | 53 | 16.51% |
| Indiana | 243 | 13 | 5.35% |
| Iowa | 154 | 13 | 8.44% |
| Wisconsin | 242 | 29 | 11.98% |
| Michigan | 364 | 19 | 5.22% |
| Minnesota | 322 | 12 | 3.73% |
| Kansas | 324 | 10 | 3.09% |

Commercial Driver’s License (CDL) Reciprocity Agreements

Currently Kansas has active agreements with our counterparts in Missouri, Nebraska and Oklahoma. Kansas has entered into Reciprocity Agreements which permit Kansas farmers to operate their commercial driver’s license (CDL)

class commercial motor vehicles (CMV) in interstate commerce within 150 miles of the farmer’s place of operation without the necessity of obtaining a CDL under certain conditions. A farmer may benefit under this exemption when the farmer operating a vehicle holds a valid driver’s license in the farmer’s home state and the vehicle is properly operated as a farm vehicle under the laws of the state.

The vehicle must be registered as a farm vehicle and be controlled and operated by a farmer for the exclusive purpose of transporting agricultural products, farm machinery, and/or farm supplies to or from the farmer’s farm. The federal statutory provisions in the Moving Ahead for Progress in the Twenty-First Century (MAP-21) legislation were self-executing and took effect on October 1, 2012. This

exemption eliminates the need for our CDL Reciprocity agreements for the purpose of safety regulations; however, farm vehicle drivers still need the agreements for the Hazardous Materials exemptions. We continue to work on a similar agreement with representatives from Colorado.

Due to MAP-21, our CDL Reciprocity Agreements are more important than ever. Currently, if farmers transport Hazardous Materials in interstate commerce they are not allowed to use the MAP-21 exemptions. Our agreements allow a farm vehicle driver to operate up to a 150 air-mile radius from the farm in interstate commerce without requiring a CDL and without registering in a Substance and Alcohol Testing program.

Civil Assessment Program

In 2006, the KCC and KHP partnered to enhance the Kansas Safety Compliance Program with the goal of reducing the number of injury/fatality accidents involving Commercial Motor Vehicles. The Civil Assessment Program was designed and implemented for the purpose of distinguishing the responsibilities of drivers from those of the motor carriers under the Federal Motor Carrier Safety Regulations' (FMCSRs) "Out-Of-Service" violations. Out-of-Service (OOS) violations are violations designated as serious by the Commercial Vehicle Safety Alliance (CVSA), and require that a driver or vehicle be removed from service until the violations are corrected. CVSA is a non-profit organization consisting of federal and state regulatory agencies, motor carrier industry, and representatives dedicated to improving motor carrier safety.

STRATEGIES

The program focuses on the safety of the driver, equipment and the traveling public. The KCC and KHP work together on enforcement and education regarding OOS violations of the FMCSRs discovered during roadside inspections. The KCC will only issue

one civil penalty for each OOS violation category. For example, if the truck-tractor of a combination vehicle is placed OOS for brakes and the trailer is also placed OOS for brakes, the company will be documented for both OOS violations, but only fined for one. The KHP and KCC will allow the civil assessment to be waived for OOS violations that are outside the obvious normal method of company operations. The KHP Trooper or local enforcement officer will have the ability to provide information to recommend that no civil assessment be issued. If the carrier has demonstrated, at the roadside inspection, that the violation was 1) potentially unavoidable; 2) the carrier has processes in place to prevent the violation; and 3) the carrier clearly has the means to correct the violation, the Trooper/Officer may recommend no civil assessment be issued. In all cases, the field decision may be superseded after the inspection is reviewed.

OBJECTIVE

The effectiveness of the roadside inspection program is based on information provided by the FMCSA Analysis and Information (A&I) database. The data is based on roadside inspections from both Kansas and foreign based motor carriers. The State of Kansas experienced a 24% decrease in roadside inspections between the Federal fiscal year (FFY) 2013 and FFY 2017 (the most recent information as of 10/10/17*). While the number of inspections decreased, the OOS rate for drivers increased from a 4.92% in 2013 to 5.35% in 2017. The vehicle OOS rate experienced a slight increase from 13.71% in 2013, to 14.72% in 2017. Our continued education efforts for Kansas based motor carriers are designed to help maintain downward OOS trends, or actively correct short term OOS rate increases for our Kansas based motor carriers. These roadside inspection statistics reflect all roadside inspection activity in Kansas which include a large segment of foreign based motor carriers. (*The FFY ended 9/30/2017)

Nationally, A&I information indicates Kansas continues to have a slightly higher driver OOS rate of 5.35% compared to the National driver OOS rate of 5.12%. For the vehicle OOS, Kansas continues to have significantly lower vehicle OOS rate of 14.27% compared to the National vehicle OOS rate of 20.59%. In hazardous materials (HM) OOS, Kansas has a slightly higher OOS rate of 4.04% compared to the National HM OOS rate of 3.96%. These numbers reflect a continuing relatively static trend in driver and vehicle OOS rates both nationally and Statewide.

Federal Unified Carrier Registration (UCR)

HISTORY

The Unified Carrier Registration (UCR) Agreement is found in 49 USC 14504a (hereinafter referred to as section 14504a). The UCR Agreement is established by federal law in the UCR Act, which is part of the federal highway reauthorization bill known as the Safe, Accountable, Flexible, Efficient Transportation Equity Act, A Legacy for Users ("SAFETEA-LU"), Public Law 109-59, enacted August 10, 2005.

The UCR Act is sections 4301 through 4308 of SAFETEA-LU. In particular, the structure of the UCR Agreement is set forth in section 4305 of the UCR Act, which enacts section 14504a as a new section in 49 USC.

The UCR Agreement was amended under Section 301 of the SAFETEA-LU Technical Corrections Act of 2008, Public Law 110-244, enacted June 6, 2008, and in the Rail Safety Improvement Act of 2008, Public Law 110-432, enacted October 16, 2008. As of September 2011, SAFETEA-LU is currently under extension awaiting a new act of Congress. In the meantime, UCR remains in full force and effect and compliance is mandatory.

SUMMARY

Forty one states submitted a state plan to the Secretary prior to the August 10, 2008, deadline and are eligible to participate in the UCR agreement. The federal UCR agreement requires all for-hire motor carriers transporting property or passengers, and motor private carriers transporting property in interstate commerce, as well as brokers, freight forwarders, and leasing companies to register with the United States Department of Transportation and pay UCR fees. Wholly intrastate carriers and private motor carriers transporting only passengers are not subject to UCR fees.

The UCR fees were last modified in 2010. The fee schedule in the chart below is currently in effect through calendar year 2017. A proposed reduction of the UCR fees schedule is currently pending and could go into effect as early as 2018. The UCR fee reduction is two part and impacts the fees for both calendar year (CY) 2018 and 2019.

The UCR fees are structured based on fleet size, and trailers have been

permanently removed from the fee calculation. Oversight of non-payment of UCR fees began January 1, 2009, and is conducted through KHP compliance verification at roadside inspections, at Ports of Entry and through the KCC Transportation Division Compliance Reviews. Additionally, the Transportation Division mails notices to each Kansas-based motor carrier which acknowledges interstate activity on its USDOT profile, but has not registered or paid UCR fees for the appropriate year.

PURPOSE

Collection of UCR fees directly affects a state's receipt of its allotment of federal funds. These funds are used specifically for the enforcement of Kansas motor carrier safety programs. Kansas is focused on making the UCR program work as effectively and efficiently as possible. With the rollout of the Kansas Trucking Regulatory Assistance Network (KTRAN), the Transportation Division is able to remind carriers of their UCR renewal obligations through their interaction with the KTRAN system and

additionally through email alerts when their UCR expires. The Transportation Staff closely monitors the program and participates through quarterly conference calls with the FMCSA and fellow state representatives. Staff has consistently responded to any calls for assistance and has shared information now found in the program's oversight best practice guide. Kansas remains dedicated to this program and is annually ranked among the top states for compliance with the UCR as measured by the registration of motor carriers.

The charts on the following page demonstrate the success of the Transportation Division's UCR compliance efforts. For the last two years, Kansas has been in the top ten jurisdictions in North America based on the number of Kansas carriers compliant with the UCR registration requirements. For that period Kansas was also the #1 jurisdiction in the United States.

| UCR FEE SCHEDULE | | | | | |
|-----------------------------|-----------------|------------------------------|-----------------|------------------------------|-----------------|
| CURRENT FEE SCHEDULE | | PROPOSED FEES CY 2018 | | PROPOSED FEES CY 2019 | |
| Fleet Size | Fee Per Company | Fleet Size | Fee Per Company | Fleet Size | Fee Per Copmany |
| 0-2 | \$76.00 | 0-2 | \$69.00 | 0-2 | \$73.00 |
| 3-5 | \$227.00 | 3-5 | \$206.00 | 3-5 | \$217.00 |
| 6-20 | \$452.00 | 6-20 | \$411.00 | 6-20 | \$431.00 |
| 21-100 | \$1,576.00 | 21-100 | \$1,433.00 | 21-100 | \$1,503.00 |
| 101-1,000 | \$7,511.00 | 101-1,000 | \$6,827.00 | 101-1,000 | \$7,165.00 |
| More than 1,000 | \$73,346.00 | More than 1,000 | \$66,669.00 | More than 1,000 | \$69,971.00 |

Kansas Trucking Regulatory Assistance Network (KTRAN)

FEDERAL GRANT

The Kansas Department of Revenue (KDOR) is the lead agency for the Kansas Commercial Vehicle Information Systems and Networks (CVISN) program. Other agencies involved in the Kansas Expanded CVISN Program Plan are the KCC, KHP and KDOT. These agencies have a longstanding relationship and have partnered on numerous projects in the past. The CVISN team shares a strategic vision which includes providing unparalleled customer service; safety compliance education; and effective, balanced enforcement of our state motor carrier rules and regulations.

BACKGROUND

In May of 2009, the FMCSA reviewed and accepted the KDOR Core CVISN Program Plan/Top-Level Design and certified Kansas as Core CVISN compliant. The mission of the Kansas CVISN program is to create an information network using advanced technology that will enhance efficiency, safety, compliance, and enforcement for commercial vehicle operations. The information network includes the exchange of information and ideas between the government partners and the motor carrier industry. CVISN initiatives will promote the economic well-being of Kansas by facilitating the movement of goods for business and industry. The Kansas CVISN team is dedicated to applying cost-effective, intelligent transportation technologies and streamlining of existing processes that will improve transportation safety and administrative efficiency for both the motor carriers and the state.

In February 2010, the FMCSA announced the availability of \$17,000,000 in additional CVISN grant funds. Additional federal funds under Section 4126(d)(3) provides up to \$1,000,000 in funding for States to deploy, operate,

and maintain elements of their CVISN programs. The elements include the commercial vehicle, commercial driver, and carrier specific information systems and networks. The KCC made a timely application seeking \$1,000,000 in grant funding. The grant requires a 50% soft match and the Transportation Division's budget will be used for that match.

PROJECT SUMMARY

The KTRAN project serves to further integrate information about Kansas motor carriers, commercial vehicles and commercial drivers. For example, roadside enforcement is now able to access KCC authority, Intrastate Out-of-Service Orders and Driver Waiver information through Kansas Commercial Vehicle Information Exchange Window (CVIEW) query windows utilizing a new system-to-system interface built as part of this project. Further, KCC officials are automatically notified of PRISM OOS status changes as well as having a real-time interface to KSCVIEW for PRISM checking of carriers and vehicles prior to issuing KCC authorities.

This project involved:

- Creating a porting system into a modern database environment with Internet-based functionality. (Public-facing functions allowing for electronic submission of information.)
- Developing a “wizard” based portal to provide carriers with a question and answer process to obtain information needed to conduct online motor carrier business in Kansas. A preliminary interview of the user would determine which credentials and authorities are needed.
- Establishing key system interfaces with other agencies to share information. This activity includes developing PRISM functionality for testing intrastate carriers prior to issuing KCC authorities and tying civil assessments to renewals and roadside enforcement activities.

Developing a real-time link to KSCVIEW to provide roadside enforcement with improved access to permit information and intrastate operating authority data.

KTRAN STATUS UPDATE

The KTRAN project went live in April of 2017 and continues to welcome new registrants with each passing week. Currently, registrants are able to apply and renew their intrastate authorities and soon will begin processing their interstate Unified Carrier Registration (UCR) as well.

Additionally, this project serves to enhance the Kansas E-Credentialing capability by establishing an interactive process where carriers walk through a logical set of questions to determine what authorities, forms and processes need to be followed to meet the carrier's needs. The project is an intelligent, interactive front-end to the TruckingKS.org portal, creating a more efficient business process for carriers and state motor carrier personnel.

KTRAN PROGRAM ENHANCEMENTS

The project has three enhancements awaiting approval, which include:

- Compliance Review (CR) Module
- Insurance Module
- KDHE Hazardous Waste Permit Module

Conclusion

The Transportation Division has undertaken significant efforts to enhance the oversight responsibilities within its purview and has made significant improvements in motor carrier safety and economic regulation. The Transportation Division continues to explore ways to enhance and refine its role to the benefit of the motor carrier industry and the Kansas public.

The Commission acted upon the following Transportation filings from July 1, 2016 to June 30, 2017. These filings pertained to rates, operating authority, and safety-related matters for motor carriers.

KHP MOTOR CARRIER VIOLATIONS

Docket number 17-GIMM-003-KHP
Docket type Transportation
Docket filed 01 Jul 2016
Action date 02 Aug 2016
Commission Action Dismissed

In the Matter of the Investigation of Quality Drive Away, Inc. of Goshen, Indiana, Pursuant to the Kansas Highway Patrol Issuance of a Notice of Violation for Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

KHP MOTOR CARRIER VIOLATIONS

Docket number 17-GIMM-088-KHP
Docket type Transportation
Docket filed 12 Sep 2016
Action date 06 Dec 2016
Commission Action Stipulation

In the Matter of the Investigation of First Farms Trucking, LLC of Breckenridge, Missouri, Pursuant to the Kansas Highway Patrol Issuance of a Notice of Violation for Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

KHP MOTOR CARRIER VIOLATIONS

Docket number 17-GIMM-133-KHP
Docket type Transportation
Docket filed 02 Feb 2017
Action date 02 Feb 2017
Commission Action Stipulation

In the Matter of the Investigation of Kelsy Conard of Wentworth, Missouri, Pursuant to the Kansas Highway Patrol Issuance of a Notice of Violation for Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

KHP MOTOR CARRIER VIOLATIONS

Docket number 17-GIMM-269-KHP
Docket type Transportation
Docket filed 18 May 2017
Action date 18 May 2017
Commission Action Fined

In the Matter of the Investigation of Benfer Enterprises II, LLC of Independence, Missouri, Pursuant to the Kansas Highway Patrol Issuance of a Notice of Violation for Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

KHP MOTOR CARRIER VIOLATIONS

Docket number 17-GIMM-343-KHP
