

TEST BEFORE YOU TOUCH:

TREAT ALL CIRCUITS AS LIVE UNTIL TESTED

Every year, **thousands** of workers are **injured** or **killed** by circuits they thought were safely turned off. Simply shutting off the power is not enough. **Hazardous conditions** can still exist. Make sure to always

TEST BEFORE YOU TOUCH.

- Ensure all participants are qualified for the job
- Identify potential hazards
- Wear correct PPE and use the proper tools
- De-energize the circuit
- Lockout/Tagout
- Test the circuit
- Verify the testing device

MAY IS NATIONAL ELECTRICAL SAFETY MONTH
