

ABANDONED
OIL & GAS
WELL STATUS

ANNUAL REPORT
2020

*We serve the
people of Kansas...*

Conservation Division's Role

The Conservation Division is a fee funded division of the Kansas Corporation Commission that regulates, enforces laws, and supervises activities associated with the exploration and production of oil and gas to prevent degradation of land and water resources, prevent the waste in the production of crude oil and natural gas resources, and protect correlative rights of mineral owners and royalty interest holders. The Division timely reclaims and remediates land and water resources using allocated funds. In addition, the Division strives to provide efficient and transparent regulatory information to the oil and gas industry by maintaining a web-based electronic filing system. This same service is provided to the citizens of the state by furnishing all information filed electronically to the Kansas Geological Survey (KGS) for publication on its website.

DISCLAIMER

ABANDONED WELL REPORT

January 2020

This report is a listing and ranking of abandoned wells in the State of Kansas, which are under investigation by the Conservation Division of the Kansas Corporation Commission. The listing of any individual well reflects its status as of the time of investigation or more recent update thereof. The investigation is by no means exhaustive. The Commission makes no warranty as to any recorded, unrecorded or misrecorded leases, deeds or other legal documents; any liens on file with the Uniform Commercial Code filing clerk of the respective Register of Deeds or the Secretary of State; any tax lien, be they Federal, State, County, or otherwise of any nature whatsoever; judgment liens by virtue of a civil, criminal, domestic, or probate proceeding; any recording in Federal Court for the District of Kansas; any security interest or financing statement purporting to claim an interest in said well or the property attendant thereto by any bank, lending institution, or creditor, or any subsequently filed instrument of any nature whatsoever. In addition, this report should not be disseminated for any purpose whatsoever which is impermissible under K.S.A. 45-201 et seq.

The physical tampering with or removal of any surface or subsurface equipment associated with an abandoned well may place that person or entity in the chain of responsibility for the proper operation and/or plugging of that well or wells pursuant to Kansas Statutes and/or KCC regulations. The operation of oil and gas facilities within the State of Kansas requires licensure by the Kansas Corporation Commission and complete adherence to KCC rules and regulations. Licensing information and a complete copy of the rules and regulations of the Kansas Corporation Commission, Conservation Division, is available upon request or available at the Conservation Division homepage at <http://www.kcc.ks.gov/oil-gas>.

**Abandoned Oil & Gas Exploration and Production Wells
January 13, 2020**

Introduction

In 1996, the Legislature created the Abandoned Well Plugging and Site Remediation Fund (Fund). The legislation established an annual reporting procedure whereby the Kansas Corporation Commission (KCC or Commission) accounts for the number of abandoned wells in Kansas, the funds available to plug abandoned wells, and the multiyear plan for addressing the abandoned well problem by creating a prioritization schedule.¹

Computer Database / Data Collection

The application used in the abandoned well inventory tracking system is Microsoft Access. Field data is collected onsite in the four Conservation Division District offices. The data is then entered into the tracking system allowing the information to be used to populate various reports concerning identified abandoned wells. The amount of information available for each well is extremely variable, primarily dependent on the location and age of the well. Those wells located in the Eastern portion of the state are generally older with very little detailed information available from industry or historical Commission files.

Abandoned Well Database Inventory

The current number of abandoned wells requiring action in the Abandoned Well Database is **5,653**, representing an increase of 123 wells from the legislative report submitted in 2019. The tables below show the changes from 2019 to 2020 regarding the crucial metrics within the inventory.

ABANDONED WELL DATABASE

	2019	2020	Change
Total Wells Requiring Action**	5,530	5,653	123
Total Wells Plugged with State Funds**	10,257	10,369	112

*Since creation of the Abandoned Well Plugging funds.

**TOTAL NO. OF ABANDONED WELLS
REQUIRING ACTION BY PRIORITY RANKING**

District	Priority 1	Priority 2	Total
1	66	5	71
2	211	7	218
3	4,805	406	5,211
4	151	2	153
Total	5,233	420	5,653

The Abandoned Oil and Gas Well Inventory is a dynamic database because information is updated on a regular basis as abandoned well plugging projects are approved. Staff anticipates more abandoned oil, gas, and injection wells will be added to the inventory as field staff responds to complaints, new well location techniques are adopted, and companies become insolvent.

¹ The prioritization schedule and a listing of the Abandoned Well Inventory by priority ranking is attached to this report as Exhibit A.

CURRENT STATUS OF PLUGGING OPERATIONS (FISCAL YEAR 2020 TO DATE)

	FY 2019	FY 2020*
# Wells Approved for Plugging	135	141
Plugging Operations Completed	120	28
Awaiting Contractor Availability	15	113

*The KCC Fiscal Year is from July 1 to June 30, so the numbers for FY 20 are only current through December 1, 2019.

** Current program Sunset Date is June 30, 2020. **

AVERAGE COST TO PLUG AN ABANDONED WELL (5 YEAR AVG.)

Dist. 1 - Dodge City	Dist. 2 - Wichita	Dist. 3 - Chanute	Dist. 4 - Hays
\$ 14,134.36	\$8,355.73	\$4,161.44	\$13,458.79

Available Funding

There are two funds available to plug abandoned wells in Kansas, the Abandoned Well Plugging and Site Remediation Fund (Legacy Fund) and the Well Plugging Assurance Fund (Assurance Fund). The Legacy Fund is used to plug wells drilled prior to July 1, 1996 and the Assurance Fund is used to plug abandoned wells drilled on or after July 1, 1996.

Legacy Fund

The Legacy Fund is also used to conduct remediation and monitoring of historic oil, gas, and injection well related contamination sites. Information pertaining to site remediation activities is provided to the Legislature in a separate report and that information is not discussed as part of this report. The 2020 Site Remediation report and the preceding four years are available on the Commission website (<http://kcc.ks.gov/>).

There are three sources of annual revenue for the Legacy Fund: 1) Quarterly, \$200,000 transfers from the Conservation Fee Fund; 2) a one-time \$500,000 transfer from the Assurance Fund; and 3) 50% of Kansas' portion of royalty revenue from monthly production on Federal Lands located in Kansas. The unencumbered cash balance of the Legacy Fund as of the writing of this report is \$3,184,666.89.

Assurance Fund

The Assurance Fund has one source of revenue – fees associated with operator licensing and operator license renewal. These fees may be \$100 if an operator maintains an acceptable compliance history after the first three years' of licensure and will range from \$450 to \$2,700 depending upon the depth and number of wells on an operator's license during the first three years' of licensure and at any time thereafter depending upon the operator's compliance record. The unencumbered cash balance of the Assurance Fund as of the writing of this report is \$4,425,059.12.

Appendix A

Well Plugging Prioritization Explanation

Abandoned Well Inventory By Priority Ranking

Priority Ranking

Priority I

Wells within the Priority I grouping have been subdivided on the basis of resources impacted and by the location or condition of the individual abandoned well. Impacts are categorized as: surface waters (SW), groundwater (GW), or public safety issues (PS). The listing below provides definitions for Priority Action Levels within the Priority I inventory. In general, Level “A” wells are the most serious cases while Level “C” wells are less serious.

Priority I Action Levels

Level A – Surface Water (SW) Wells actively discharging oil or brine into surface waters with significant ongoing impacts to surface water. Wells may be located within a sensitive groundwater area as designated in Commission regulations. Includes wells with moderate to high volumes of discharge impacting public water supplies or sole source water supplies.

Level A – Groundwater (GW) Wells creating significant ongoing or potential impacts to groundwater supplies through water quality degradation or loss of water supplies through downward drainage. Wells may be located within a designated sensitive groundwater area. Emphasis is placed upon impacts to groundwater supplies used for public water supplies or sole source supplies and cases of active subsidence caused by downward drainage.

Level A – Public Safety (PS) Wells creating an ongoing or current threat to public safety. Includes wells with active gas flows with danger of ignition or open large diameter wellbores or casings in urban or suburban settings.

Level B – Surface Water (SW) Wells intermittently to actively discharging oil or brine into surface waters with ongoing impacts to surface water. Wells may be located within a designated sensitive groundwater area. Includes wells with low to moderate volumes of discharge impacting water resources outside of public water supplies when alternative water supplies are available.

Level B – Groundwater (GW) Wells creating ongoing or potential impacts to groundwater supplies through water quality degradation or loss of water supplies through downward drainage. Wells may be located within a designated sensitive groundwater area. Includes wells with impacts to groundwater supplies outside of public water supply areas and cases of strong potential for subsidence.

Level B – Public Safety (PS) Wells creating a current or ongoing threat or potential danger to public safety. Includes wells with active gas flows with danger of ignition and/or open large diameter wellbores or casings located in rural, low population areas.

Level C – Surface Water (SW)	Wells located outside designated sensitive groundwater areas, which are intermittently discharging oil and/or brine or have potential for discharge into surface waters.
Level C – Groundwater (GW)	Wells located outside designated sensitive groundwater areas which have potential impacts to groundwater supplies or loss of water resources through downward drainage
Level C – Public Safety (PS)	Wells creating a potential danger to public safety. Includes secured gas wells in populated areas.

Priority II

Wells within the Priority II group are relatively modern in terms of construction and do not pose either an ongoing or potential threat to the public safety or the environment. These wells have adequate surface pipe to protect shallow freshwater aquifers and are generally located in environmentally non-sensitive areas. These wells fall within the lowest priority ranking for authorization of plugging with Abandoned Oil and Gas Well / Remediation Fund monies. These wells are documented and added to the inventory. Periodic inspections determine if well conditions have changed to a sufficient degree to warrant upgrading to Priority I status.
