

KANSAS CORPORATION COMMISSION

2024 | UTILITIES AND COMMON CARRIERS

➤ Serving the people of Kansas by regulating the State's energy infrastructure, oil and gas production and commercial trucking to ensure public safety.

About the Commission

Andrew J. French
Chairperson

Dwight D. Keen
Commissioner

Annie Kuether
Commissioner

The Commission consists of three members appointed by the Governor to overlapping four-year terms. No more than two members may be of the same political party. The authority of the Kansas Corporation Commission is derived from K.S.A. 74-601 to 74-631.

The Commission regulates investor-owned utilities operating in the state, the Kansas oil and gas industry and motor carrier safety. The KCC does not regulate most electric cooperatives, water cooperatives, municipalities, wireless telephone, long distance service, cable companies, or internet services.

To carry out its multi-faceted mission, the Commission is financed from assessments, registration fees, operating charges, federal funds, and other fee funding sources. The KCC does not receive funding from the state general fund.

3,498 TOTAL ORDERS ISSUED
BY THE COMMISSION
IN FY2023

The Commission meets bi-weekly at 10 a.m. on Tuesday and Thursday. The meeting is broadcast live on the KCC's YouTube channel. To preview the agenda in advance, sign up for meeting notifications at:

<https://kcc.ks.gov/>

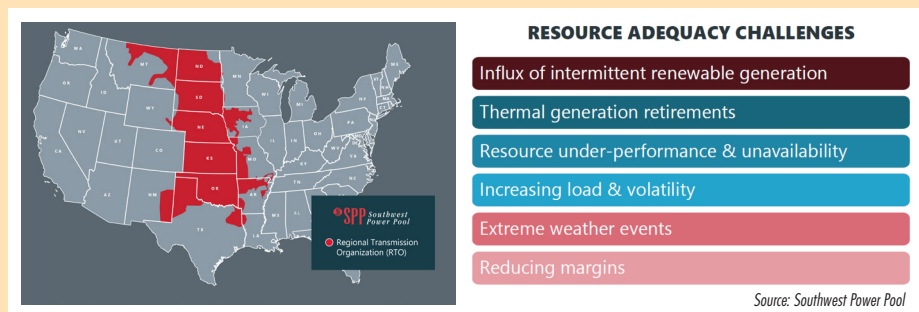

For more information, access the KCC Legislative reports at:

<https://kcc.ks.gov/commission-activity/reports-to-the-legislature/2024>

Resource adequacy guides energy planning

Most people take for granted that the lights will come on when they flip a switch or that heat and air conditioning are always readily available by adjusting a setting on the thermostat. However, ensuring there is enough energy generating capacity to continuously meet customer needs isn't that simple. Maintaining adequate resources has its challenges due to factors such as resource mix changes, extreme weather impacts, increased demand and evolving consumer behaviors.

Kansas is a member of the Southwest Power Pool (SPP), along with 13 other states that include Arkansas, Iowa, Louisiana, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas and Wyoming. SPP is a non-profit Regional Transmission Organization (RTO) regulated by the Federal Energy Regulatory Commission (FERC). SPP's role is to ensure reliable supplies of wholesale power, adequate transmission infrastructure, and competitive pricing of electricity for its members. Resource adequacy is a critical area of focus for the KCC, the SPP, and FERC.

The KCC actively engages in the SPP stakeholder process to influence sound resource adequacy policy and ensure our local utilities are effectively planning to meet their obligations. KCC Chairperson Andrew French, while serving as 2023 President of the SPP's Regional State Committee, established the Resource and Energy Adequacy Leadership (REAL) team at SPP. The team provides guidance, prioritization, and policy recommendations needed to increase assurance that energy can be continuously and cost effectively provided within the SPP Balancing Authority Area. In addition, the KCC maintains an internal working group dedicated to tracking and participating on FERC & SPP issues.

Work Study: SPP Resource Adequacy (2/24/23)

Work Study: Midwest Reliability Org. Resource Adequacy Work Study (2/8/23)

Work Study: Black & Veatch Resource Adequacy (1/25/23)

To keep the issues surrounding resource adequacy at the forefront and share information, the KCC began a series of public workshops last year. The workshops allowed industry experts to present their views and answer questions from the Commissioners and Commission Staff. Recordings of the three workshops held to date can be accessed on the KCC YouTube Channel or website at <https://www.kcc.ks.gov/resource-adequacy-work-study-series>.

Adequate resources expected under normal conditions

The North American Electric Reliability Corporation (NERC) issued its 2023-2024 Winter Reliability Assessment in November. The news for Kansas and the rest of the Southwest Power Pool region is mostly encouraging. However, the report cautions that unexpected weather events or outages could result in shortfalls. This possibility resulted in an "Elevated Risk" finding for the area citing the potential for insufficient reserves in above-normal conditions.

"Southwest Power Pool (SPP): The Anticipated Reserve Margin (ARM) of 38.8% is over 30 percentage points lower than last winter; this is driven by higher forecasted peak demand and less resource capacity. While the reserve margin is adequate for normal forecasted peak demand and expected generator outages, higher demand levels and outages that have occurred during extreme cold weather result in shortfalls that can trigger energy emergencies. The vast wind resources in the area can alleviate firm capacity shortages under the right conditions; however, energy risks emerge during periods of low wind or forecast uncertainty and high electricity demand."

– NERC 2023–2024 Winter Reliability Assessment

UTILITIES

- Ensure sufficient and safe utility services at just rates.
- Enforce state and federal pipeline safety regulations.
- Administer Kansas Universal Service Fund (KUSF).

Electric

The Kansas Corporation Commission regulates the state's investor-owned electric companies: Evergy, Liberty-Empire, and Southern Pioneer. The KCC also has limited jurisdiction over the following: Sunflower Electric Power Corporation, Prairie Wind Transmission LLC, Midwest Energy Inc., and ITC Great Plains LLC.

The KCC regularly intervenes in electric matters at the Federal Energy Regulatory Commission (FERC) to protect the interests of Kansas ratepayers. The KCC also has representation in transmission matters at the Southwest Power Pool (SPP).

Regionally competitive rates remain a focus

Improving the regional competitiveness of Kansas' electric rates is a goal shared by the Commission, the Legislature, and energy stakeholders. While the State has made great progress in the last four years, the Commission will continue to look for ways to improve regional rate competitiveness over time, where our legal authority allows, while ensuring continued access to safe, reliable electric service.

KCC staff is prepared to provide an update to the Legislature on the current status of state's regional rate competitiveness in the first few weeks of the Legislative Session. Here is a preview:

- Over the last five years, Kansas electricity rates increased in total by 6.97%, which ranks No. 40 out of 50 states during this time for the highest growth in electricity prices (No. 1 being the highest growth in prices).
- In 2022, average electricity rates in Kansas grew 9.52% compared to 2021. This ranks 24th out of 50 states for the largest increases in prices.
- Kansas electricity rates are now 7.23% lower than the national average (compared to 1.8% higher than national average in 2018).
- Kansas electricity rates have fallen from 15th highest in the Country in 2018 to 20th highest in 2021 to 24th highest in 2022.

Residential Electric Bill Comparison | July 2022 to June 2023

	Company**	Customer Charge	Energy Charge	ECA**	Trans. Delivery Charge	Property Tax Surcharge	Total Bill Without Tax	Cost Per KWH	Utility Bill as a % of National Avg. Bill	Number of Residential Customers FY22
Investor-Owned	Empire	\$14.25	\$58.53	\$44.87	\$17.02	\$1.44	\$136.11	\$0.145	91.98%	8,217
	Evergy Metro	\$14.25	\$83.55	\$17.56	\$7.29	\$1.31	\$123.95	\$0.132	83.76%	239,597
	Evergy Central	\$14.50	\$67.34	\$32.22	\$17.76	\$1.54	\$133.55	\$0.142	90.25%	634,334
						National Average Bill*	\$147.98	\$0.158		

* Average retail price of electricity monthly (FY2022) ** Utility Average ECA for the July 2022 through June 2023 period

Renewable goals and aging electric distribution network could impact rates

Environmental concerns about greenhouse gasses emitted by fossil-fuel generation sources, as well as the significant decline in the all-in cost of energy production from renewable generation sources, is fueling the movement to decarbonize electric generation.

In addition, many major banks, investment firms, and rating agencies have adopted policies to limit their risk associated with utilities using coal-fired generation. As a result, significant capital investment to replace existing generation assets may happen sooner than expected. However, any decisions made are expected to be evaluated in Integrated Resource Planning (IRP) Dockets or Predetermination proceedings filed with the Commission pursuant to K.S.A. 66-1239.

Another issue affecting the electric utility industry is hardening, and in some cases replacing the aging distribution network of electric utilities to improve reliability and resiliency. The aging distribution network of the Kansas-jurisdictional electric utilities is an issue that has long been discussed at the Commission, and is likely to be a major driver of additional capital investment in years to come.

The Southwest Power Pool continues to approve new transmission facilities to enhance reliability of the transmission system. Transmission assets are capital intensive and will continue to place upward pressure on utility rates to the extent corresponding reductions in fuel and purchased power do not offset these increases.

Kansas Electric Generation Sources by Total Megawatt hours

July 2022 to June 2023

Source: U.S. Department of Energy, The Energy Information Administration (EIA)

Kansas receives more than \$13 million to address grid resilience and reliability

Aging infrastructure is a concern for electric utilities and their customers, who expect safe and reliable service. A Department of Energy (DOE) formula grant announced in 2023 provides funding to States to strengthen, modernize, and improve the resilience of their electric grid against disruptive events. A disruptive event, as defined by the Program, is “an event in which operations of the electric grid are disrupted, preventively shut off, or cannot operate safely due to extreme weather, wildfire, or a natural disaster.”

The KCC’s allocation from the DOE totals \$13,313,126 for fiscal years 2022 and 2023. The allocation for each fiscal year thereafter, for the next three fiscal years, is expected to be approximately \$6,647,000.

The KCC will allocate funds to eligible entities which could include an electric grid operator, an electricity storage operator, an electricity generator, a transmission owner or operator, a distribution provider, a fuel supplier, and other entities. Details about the grant and eligible resilience measures are available on the [KCC website](https://kcc.ks.gov).

For detailed information on utility regulation, access the KCC Legislative reports at:

<https://kcc.ks.gov/commission-activity/reports-to-the-legislature/2024>

2023 Electric Rate Case Summary

Order Date	Utility	Requested Net Increase	Proposed Monthly Impact to Residential Customers	Approved	Monthly Impact To Residential Customers
11/21/2023	Evergy Central	\$204 million	\$14.24	\$74 million	\$4.64
11/21/2023	Evergy Metro	\$14 million	\$3.47	-\$32.9 million	-\$6.07

reports-to-the-legislature/2024](https://kcc.ks.gov/commission-activity/reports-to-the-legislature/2024)

Natural Gas and Pipeline Safety

KCC Energy Operations and Pipeline Safety staff play an important role in keeping Kansans safe in their homes and neighborhoods. They enforce federal and state pipeline safety regulations ensuring the safe operation of all gas utilities. The staff also provides technical expertise relating to electric utility operations, reliability, safety, electric transmission siting, and electric and gas consumer service, as well as analyzing requested changes to natural gas and electric certificates.

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities: Atmos Energy Corporation, Black Hills/ Kansas Gas Utility Co., and Kansas Gas Service, a Division of ONEOK, Inc. In addition, the Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users.

On-Site inspections ensure best practices

Pipeline safety staff conducts on-site inspections of intrastate natural gas facilities to monitor the gas systems for any areas of noncompliance with safety regulations. A typical audit covers the operator's management of the integrity of the pipeline delivery system including a review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements.

Engineers and pipeline safety inspectors also investigate any incident where natural gas is suspected to be the cause or there is an alleged violation of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Their findings are reported to the Commission.

In calendar year 2022, the Commission levied fines to 23 excavators for failure to notify utilities prior to excavating over buried facilities and to 4 utility operators for failure to provide timely or accurate locates. The fines assessed totaled \$12,500.

Underground Damage Prevention Statistics for Calendar Year 2022

LOCATION	TOTAL GAS DAMAGE INCIDENTS	GAS DAMAGES INVESTIGATED	GAS LOCATES REQUESTED	DAMAGES PER 1000 LOCATES
Johnson County	165	321	175,306	1.83
Sedgwick County	167	225	158,912	1.6
Remaining State	109	617	236,547	2.1

Continuing safety education

The KCC hosts an annual Pipeline Safety Seminar to help professionals managing pipeline operations, maintenance, and emergency response hone their techniques, learn new skills and stay up-to-date with current regulations. Seminar presentations are available on the [KCC website](#).

Telecommunications

KCC Telecommunications staff is responsible for administering the Kansas Universal Service Fund as well as researching, investigating, analyzing and making recommendations to the Commission on all telecommunications matters. Staff is also involved in Federal Communications Commission cases and participates on National Association of Regulatory Utility Commission (NARUC) subcommittees and Federal-State Joint Boards.

Kansas Universal Service Fund

The Kansas Universal Service Fund (KUSF) was established by the Commission in 1996, as required by the Kansas Telecommunications Act. Now in its 27th year, the KUSF continues to provide much needed services to Kansans. Those services include telephone discounts to low-income families, phone services and adaptive equipment for persons with disabilities, and network enhancements and upgrades in rural areas.

All telecommunications companies must contribute to the KUSF. Assessments are a percentage of intrastate (within Kansas) retail revenues. Companies are allowed to pass the assessment on to its customers, but not required to. Effective March 1, 2023, the current KUSF funding requirement is \$38.3 million. The carrier assessment rate is 11.37%.

How are KUSF dollars used?*

Enhancements/upgrades in rural areas	\$37.1 million
Lifeline Program	\$174,800
Kansas Relay 711	\$241,900
Telecommunications equipment program	\$253,600
Fund administration/carrier audits	\$536,600

* Annual budget effective March 1, 2023

Lifeline/ACP keep Kansas families connected

Thanks to the Lifeline program, nearly 30,000 Kansans have access to telephone service allowing them to access healthcare, find jobs, stay in touch with family and call for help in an emergency. Those who qualify, based on income or participation in other assistance programs, receive up to \$17.02 per month in combined federal and state assistance. The state portion of the benefit comes from the Kansas Universal Service Fund (KUSF), administered by the KCC.

Anyone who qualifies for Lifeline also qualifies for the FCC's Affordable Connectivity Program (ACP). Participants receive a service discount of up to \$30 per month for broadband service and a one-time device discount of up to \$100. More information on Lifeline and ACP is available on the [KCC website](#).

Focus on education and enforcement drives safety

The role of the KCC Transportation Division is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection. Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The staff works closely with the Kansas Highway Patrol and the Federal Motor Carrier Safety Administration to reduce crashes involving motor carriers through promotion of safety education.

Agencies team up to make Kansas roads safer

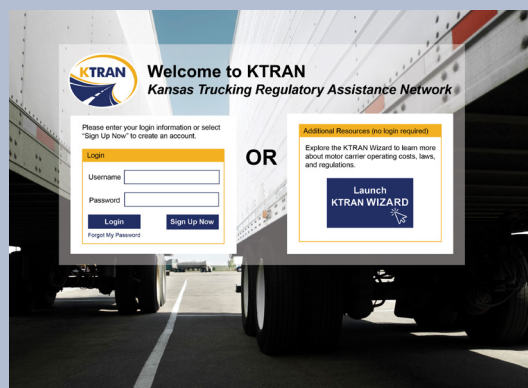

The combined efforts of four state agencies are making it safer to travel Kansas roads. The KCC Transportation Division reports that nearly 99% of the state's motor carriers met Unified Carrier Registration (UCR) requirements for 2022. The national average is currently 88.95%.

Kansas has been the top performer in UCR registrations among 41 participating states since the program's inception in 2007. It is a team effort. The Kansas Highway Patrol (KHP), the Kansas Department of Revenue (KDOR), and Kansas Department of Transportation (KDOT) partner with the KCC to ensure compliance and promote safety. KHP identifies UCR violations and documents it on Driver Vehicle Examination Reports during roadside inspections. KHP ranks 7th in the nation in enforcement efficiency of UCR violations, according to a new report. For 2024, KDOR will verify UCR compliance for interstate companies with Kansas Commercial registration prior to issuing credentials.

The UCR fees collected fund safety education and motor carrier enforcement efforts. Those efforts are paying off. Statistics show Kansas-based motor carriers were involved in fewer crashes from 2020-2022 than the national average and the average of similarly situated Midwest states.

KTRAN - Kansas Trucking Regulatory Assistance Network

KTRAN, an online tool launched by the KCC in 2017, benefits the industry and regulators alike. Motor carriers have the ability to view and manage their operating authority, driver waiver and UCR registration 24/7. They also receive messages, emails and timely alerts. Regulators and law enforcement have access to the database to help ensure safety compliance leading to safer roadways for the motoring public.

Safety & Compliance

Safety seminars prepare drivers for success on the road ahead

Educating motor carriers about potential hazards they may encounter, as well as teaching ways to mitigate risk and stay up-to-date on compliance requirements, makes travel in Kansas safer for everyone.

The KCC conducts free educational safety seminars every week. The classes are designed for help new motor carriers get off to a good start and to educate out of compliance motor carriers, about current rules and regulations. The classes are held virtually, which provides easy access from any location. Motor Carriers are notified of seminar dates at the time they apply for KCC authority. Information is also available on the KCC website and is included in various transportation association newsletters and websites.

Local assistance is never far away

Motor carriers in rural areas don't have to look far for assistance. The KCC employs a team of Special Investigators (SIs) located in assigned regions throughout the state. The SIs are involved in teaching at educational safety seminars, doing roadside inspections, and offering local assistance to motor carriers in their area. That assistance may range from answering questions in the field to conducting individual "refresher" safety programs when requested by a motor carrier.

Investigators are located in the following cities: Concordia, Colby, Garden City, Hutchinson, Kansas City, Parsons, Lawrence, La Crosse, Paola, Topeka and Wichita. Contact information for each location can be found [here](#).

For detailed information on motor carriers, access the KCC Legislative reports at:

<https://kcc.ks.gov/commission-activity/reports-to-the-legislature/2024>

% Commercial Motor Vehicles Involved in Crashes

	CY2020	CY2021	CY2022
Midwest	2.32	2.60	2.44
Kansas	2.19	2.26	1.96
Iowa	2.53	2.89	2.64
Illinois	2.80	3.24	3.11
Indiana	2.31	2.60	2.50
Michigan	2.86	3.21	3.14
Minnesota	1.65	1.91	1.96

Public Affairs and Consumer Protection (PACP)

The KCC Office of Public Affairs and Consumer Protection (PACP) supports the core mission of the agency by educating and protecting the general public on regulatory issues. PACP staff assists Kansas utility customers when they have questions or need help in resolving a service or billing issue with a regulated utility. In addition, the staff provides information about assistance programs and encourages community involvement and input through public hearings and comment sessions on matters important to Kansans.

Community outreach plays an important role

Public input is an important part of the regulatory process. PACP plans and promotes public hearings and comment periods on issues important to Kansas ratepayers, giving them a forum to share their opinions and get more information. Rate change requests from utilities are the most common matters discussed at public hearings. However, public meetings are also held on some types of transmission line siting projects.

Commissioners listened as members of the public shared their thoughts on a proposed route for a new transmission line during a public hearing at Lola High School on March 2, 2023.

Public Hearings may be held in-person, virtually (offering members of the public an opportunity to be an active participant from home) or a combination offering both options. For those that prefer to watch without participating, livestreaming and recordings are available for online viewing on the [KCC YouTube channel](#).

In addition to public hearings, the Commission offers many convenient ways for the Kansans to submit a public comment on rate cases and other dockets with comment periods – online, email, via letter or a phone call to the Public Affairs office.

Identifying needs and offering help

PACP staff is instrumental in making Kansans aware of programs and services available to help them. Explaining the protections offered by the Cold Weather Rule, phone and internet discounts offered by the Lifeline program, and making referrals to public assistance agencies are just a few examples.

STAY WARM. STAY CONNECTED.

Cold Weather Rule | November 1 – March 31

The **Cold Weather Rule** is designed to keep your utilities connected during the winter months, even when you're unable to pay your bill in full. Contact your utility company to see if you qualify to make payment arrangements under the Cold Weather Rule.

Lifeline

Lifeline connects eligible low-income families and individuals to the services they need to live, learn, earn and participate fully in their communities. Federal and state discounts of up to **\$17.02** per month on phone or internet services are available.*

Advocating for Kansas Customers

Consumers from all parts of the state turn to the KCC for help with utility issues. Our Public Affairs staff answers consumer questions, investigates complaints, and works to reduce the amount of time it takes to resolve disputes between the customer and the utility. Nearly 80% of complaints worked are resolved in one day.

Utilities Overview

The Utilities Division is responsible for administering the laws and regulations applicable to jurisdictional electric, natural gas, telephone, and water utilities. The Utilities Division is comprised of four sections that are responsible for providing recommendations and advice to the Commission to promote and ensure sufficient, efficient, and safe utility services at reasonable and non-discriminatory rates to consumers.

The four sections within the Utilities Division are Accounting and Financial Analysis, Economics and Rates, Energy Operations and Pipeline Safety, and Telecommunications. These sections are responsible for the following:

1. The Accounting and Financial Analysis section is responsible for investigating, analyzing and making recommendations to the Commission on accounting and financial issues relating to the electric, natural gas, telecommunication, and water industries. These issues include the development of a revenue requirement for rate cases and KUSF audits as well as yearly surcharge filings. The section is also involved in Federal Energy Regulatory Commission (FERC) cases and participating in Southwest Power Pool work groups.
2. The Economic Policy and Rates section is responsible for investigating and making recommendations on economic issues relating to the natural gas, electric, and telecommunications industries to the Commission as well as the Kansas Legislature and other state agencies. In rate cases, this section is also responsible for evaluating the class cost of service and developing a rate design.
3. The Energy Operations and Pipeline Safety section provides technical expertise relating to electric utility operations, reliability, safety, electric transmission siting, and electric and gas consumer service, as well as analyzing requested changes to natural gas and electric certificates. The section has primary responsibility to ensure safe operation of all gas utilities through enforcement of federal and state pipeline safety regulations. The section also has the responsibility to ensure the safe operation of electric utilities under the provisions of K.S.A. 66-101h.
4. The Telecommunications section is responsible for researching, investigating, analyzing, and making recommendations on courses of action for all telecommunications matters that come before the Commission. This section is also involved in Federal Communications Commission cases and participating on NARUC subcommittees and Federal-State Joint Boards.

Major Issues for FY2023

REGIONALLY COMPETITIVE ELECTRIC RATES

- During the 2021 Legislative session, several Kansas energy stakeholders (Kansas Industrial Consumers Group, Kansans for Lower Electric Rates, Citizens' Utility Ratepayer Board, Kansas Municipal Utilities, Kansas Electric Power Cooperative, and Evergy) were able to collaborate and agree on a process to monitor Kansas' electric rates for regional competitiveness. This agreement was reached on March 11, 2021, and called for Staff to present a report to the Senate Utilities Committee during the first few weeks of the 2022 through 2024 Legislative Sessions. The states of Kansas, Colorado, Missouri, Oklahoma, Arkansas, Iowa, Minnesota, North Dakota, South Dakota, and Texas were agreed to be the peer group by which regional rate competitiveness would be measured using agreed-upon metrics. The following information was to be reported:

- All of the data will be sourced from the Energy Information Administration (EIA). Specifically, Tables 6, 7, and 8—released around October of every year for the previous year's data.

- The regional electricity rate comparison would consist of the following: average residential, industrial, and commercial electricity rate for each Investor Owned Utility operating in these states, as reported by the EIA.

- The average monthly electric bill for residential customers for each Investor Owned Utility operating in these states, as reported by the EIA.

- The statewide average electricity rate for cooperative utilities in each of the states, presented for residential, commercial, and industrial customers as reported by the EIA.

- The statewide average electricity rate for municipal utilities in each of the states, presented for residential, commercial, and industrial customers are reported by the EIA.

- The statewide average electricity rate for all consumers across all utility types for each state.

- Last year's report was presented on March 8, 2023, to the Senate Utilities Committee and can be viewed here: <https://www.youtube.com/watch?v=u8alQs4FckQ>

- The presentation materials from last year's report can be found here: <https://www.kcc.ks.gov/images/PDFs/presentations-and-legislative-testimony/March%208%202023%20Senate%20Utilities%20Presentation%20Rates%20and%20Ratemaking.pdf>

• Staff stands ready to provide a presentation to the Legislature to provide an update on Kansas's regional rate competitiveness if desired, but here are some highlights from this year's report:

- Over the last five years, Kansas electricity rates increased in total by 6.97%, which ranks No. 40 out of 50 states during this time for the highest growth in electricity prices (No. 1 being the highest growth in prices).

- This growth in rates is slower than Arkansas (27.36%), Oklahoma (24.23%), Texas (19.77%), Colorado

(17.23%), Minnesota (16.11%), and Iowa (7.29%). Kansas electric rates grew faster than South Dakota (4.68%), Missouri (3.30%), and North Dakota (-5.45%).

- In 2022, average electricity rates in Kansas grew 9.52% compared to 2021. This ranks 24th out of 50 states for the largest increases in prices.

- Kansas electricity rates are now 7.23% lower than the national average (compared to 1.8% higher than national average in 2018).

- Kansas electricity rates have fallen from 15th highest in the Country in 2018 to 20th highest in 2021 to 24th highest in 2022.

- The Average Peer State rate from 2018 to 2022 grew by 12.72%, less than the U.S. Average of 17.38%. Average Kansas rates grew by 6.97% during this period.

- The Average Peer State rates from 2021 to 2022 grew by 6.77%. Average Kansas rates grew 9.55% last year.

• The Commission supports the shared goal of improving the regional competitiveness of Kansas' electric rates over time, where our legal authority allows. While the State has made great progress in improving regional rate competitiveness in the last four years, the Commission will continue to look for ways to make Kansas' electric rates more competitive, while ensuring that Kansans continue to have access to safe, reliable electric service.

ELEVATED CAPITAL INVESTMENT

• In recent years the momentum to decarbonize the electric generation sector in the United States has accelerated dramatically, with 41 Edison Electric Institute members having adopted a net-zero carbon emissions target by 2050 or sooner. This movement has been driven by both environmental concerns about greenhouse gasses emitted by fossil-fuel generation sources as well as the significant decline in the all-in cost of energy production from renewable generation sources. In addition, many

major banks, investment firms, and rating agencies have adopted policies designed to limit their exposure to risk associated with utilities that have coal-fired generation. This movement has the potential to drive significant capital investment to replace existing generation assets much sooner than the current net-zero carbon emissions target date of 2050. The timing of any retirement of existing generation, what generation technology will be used to replace any retired assets, and the ultimate rate impact of these decisions is undetermined at this time. These decisions, when made, are expected to be evaluated in Integrated Resource Planning (IRP) Dockets or Predetermination proceedings filed with the Commission pursuant to K.S.A. 66-1239.

• Another issue becoming prevalent in the electric utility industry is hardening, and in some case replacing, the aging distribution network of electric utilities to improve both reliability and resiliency and to set the stage for what many view is the coming surge in electric vehicle adoption. The aging distribution network of the Kansas-jurisdictional electric utilities is an issue that has long been discussed at the Commission, and this issue is likely to be a major driver of additional capital investment in Kansas in years to come.

• The Southwest Power Pool continues to approve new transmission facilities to enhance reliability of the transmission system. The potential new investments in transmission assets are capital intensive and will continue to place upward pressure on utility rates to the extent corresponding reductions in fuel and purchased power do not offset these increases.

• Investor-owned natural gas distribution utilities in Kansas are facing aging infrastructure, some of which is constructed of materials that are considered to be obsolete or that present a safety risk. This has led to these gas utilities placing an increased emphasis on accelerating the rate of replacement of aging infrastructure. This effort has also increased capital expenditures levels and led to more frequent general rate cases.

Senate Bill 279 took effect January 1, 2019, and amended K.S.A. 66-2202, 66-2203, and 66-2204. This bill expanded the definition of eligible capital investments that are recoverable through the Gas System Reliability Surcharge (GSRS) and doubled the size limitations previously in effect for the GSRS. With these revisions, gas utilities in the state will be able to file for Commission approval of an annual cost recovery mechanism to recover up to \$.80 per month, per residential customer, in new revenues each year. This surcharge may recover up to 20% of a company's currently approved base revenue level. The surcharge may only be in effect for five years (with an additional year extension available upon Commission approval) until a rate case must be filed in order for the utility to regain eligibility to file for a new GSRS surcharge.

- Telecommunications companies are continuing to invest in new technologies, primarily to enhance broadband services. The investment in broadband services is generally driven by the FCC's National Broadband Plan, which has a goal of supporting the provision of broadband communications in areas that would be unserved or underserved without such support. However, the continued investment in new technologies should not increase the size of the KUSF. The 2013 Kansas Legislature passed House Bill 2201, which modified K.S.A. 66-2008. K.S.A. 66-2008, as revised, caps the KUSF at \$30 million for rate of return regulated carriers, caps support for price cap regulated carriers, eliminates KUSF support for electing carriers, and phased out KUSF support for competitive eligible telecommunications carriers.

- Several risk factors have arisen over the last several years that have the potential to disrupt the ability of the electric utility industry in Kansas to provide continuous, reliable power to customers. These issues are present throughout the Southwest Power Pool (SPP) and to varying degrees, nationwide. A non-exhaustive list of these factors is as follows:

- The pace of transition away from fossil-fueled baseload generation,

towards intermittent renewable resources;

- Substantial growth in peak electricity demand, as well as electrification for heating and transportation generally; and
- Increasingly severe weather events.

These risks have been highlighted in recent National Electric Reliability Corporation (NERC) publications, including the 2022 Long Term Reliability Assessment, found here:

https://www.nerc.com/pa/RAPA/ra/Reliability%20Assessments%20DL/NERC_LTRA_2022.pdf

The NERC 2023 Summer Reliability Assessment can be found here:

https://www.nerc.com/pa/RAPA/ra/Reliability%20Assessments%20DL/NERC_SRA_2023.pdf

The Commission has been actively monitoring this issue, and has devoted substantial time and resources to address these resource adequacy challenges both at the KCC and the SPP. As one example, Chairperson French established the Resource and Energy Adequacy Leadership (REAL) team at the SPP in January 2023. The link for this organizational group can be found here: <https://spp.org/stakeholder-groups-list/organizational-groups/regional-state-committee/resource-and-energy-adequacy-leadership-team/>

The purpose of the REAL team is as follows:

The REAL team shall assess SPP's current resource adequacy construct and anticipated challenges resulting from resource mix changes, extreme weather impacts, increased demand and evolving consumer behaviors. REAL shall provide guidance, prioritization, and policy recommendations needed to increase assurance that energy can be continuously and cost-effectively provided within the SPP Balancing Authority Area (BAA). The team shall address applicable recommendations from the Future Grid Strategy Advisory

Group and initiatives identified in the SPP Resource Adequacy roadmap.

The REAL team is actively working to address these resource adequacy challenges, and is pursuing the following objectives:

- Adding a winter season resource adequacy requirement;
- Adding a requirement for utilities to maintain a level of ramping capability;
- Revising the accreditation methods for both renewables and traditional resources;
- Strengthening the requirements for firm fuel access and delivery;
- Improve generator outage coordination policies;
- Evaluating reforms to the generator interconnection process; and
- Developing metrics to better measure and value loss of electric load events.

In addition, the KCC has performed a series of workshops to explore these issues in a public setting. These workshops have allowed industry experts to present their views and to answer questions from the Commissioners and Commission Staff. A link to this series of workshops can be found here: <https://www.kcc.ks.gov/resource-adequacy-work-study-series>

Electric

OVERVIEW

The KCC regulates nine large (annual operating revenue greater than \$10 million) electric utilities. A list of the large electric utilities and a brief overview of the major activities for FY2023 are noted below. A summary of each major docket associated with the companies follows this narrative section along with a listing of all other electric dockets. Also included in this narrative section is a discussion of the Federal Energy Regulatory Commission (FERC) activity and transmission issues that the Utilities Division spent a significant amount of time on during FY2023.

LARGE ELECTRIC UTILITY COMPANIES

(Annual operating revenue greater than \$10M)

Empire District Electric Company

Evergy Metro (formerly Kansas City Power & Light Company)

Southern Pioneer Electric Company

Sunflower Electric Power

Corporation (Limited per K.S.A. 66-104d)

Evergy Kansas Central (formerly Westar Energy Inc.)

Wheatland Electric Cooperative, Inc.

Prairie Wind Transmission, LLC (Transmission Only)

Midwest Energy, Inc. (Limited per K.S.A. 66-104d)

ITC Great Plains, LLC (Transmission Only)

There was one major rate case filed in FY2023, however this rate case encompassed setting rates for two of the largest electric utilities in the State simultaneously. On April 25, 2023, Evergy, Inc. filed a rate case for Evergy Kansas Central, Inc., (formerly Westar Energy) and Evergy Kansas Metro (formerly Kansas City Power and Light Company). Evergy's rate case requested a \$278.9 million increase in base rate revenues for EKC, or \$204.2 million (9.77%) net of other surcharge reductions. For EKM, Evergy requested an increase of \$25.1 million, or \$14.2 million net of surcharge reductions (1.95%). The Parties to this Docket submitted a Unanimous Settlement Agreement agreeing to a base rate increase of \$148.8 million for EKC, which equates to a net impact of \$74 million (+3.54%) after the rebasing of the RECA and PTS, and a base rate reduction of \$22 million, which equates to a net rate decrease of \$32.9 million (-4.53%) after the rebasing of the PTS, for EKM. The Settlement Agreement is pending review by the Commission, with a decision due by December 21, 2023.

The Commission also ruled on the final Winter Storm Uri cost recovery Docket

during FY2023, which involved Liberty Empire. Liberty Empire filed its financial plan to mitigate the rate impact of its Kansas customers on November 29, 2022. Empire requested to recover these costs, plus carrying charges at 8.81%, over a thirteen-year period. The resulting rate impact to Kansas customers would have been \$7.32/month. On March 31, 2023, the Parties to the Docket filed a Unanimous Settlement Agreement with the Commission that called for a lower carrying cost rate of 5.71%, over a 13-year period, which resulted in a lower bill impact for residential customers. The anticipated cost was calculated at \$5.73 for an average residential customer over this period.

Lastly, there was a major Docket filed during FY2023 involving NextEra Transmission Southwest LLC (NEET-SW), Docket No. 23-NETE-585-STG. This involved a request for a line siting permit to construct 93 miles of 345kV transmission in the State of Kansas, stretching from a substation near Wolf Creek Nuclear Power plant in Coffee County to the Blackberry Substation in Jasper County, Missouri, which is less than one mile over the state line.

The Commission previously determined in Docket No. 22-NETE-419-COC that the transmission line was necessary based on studies completed by the SPP that demonstrated a local reliability need, as well as regional economic benefits in the form of reduced wholesale energy costs and transmission congestion from the facility. Based on the evidence presented by all parties that participated in the Docket, the Commission approved a settlement agreement that concluded the proposed project was necessary and beneficial to the State of Kansas.

FEDERAL ISSUES

The KCC intervened in several electric matters at the FERC during FY2023.

FERC Rulemaking Dockets:

- RM22-14: FERC Order No. 2023 (Order 2023) Generator Interconnection Agreements:

FERC issued its final Notice of Public Rulemaking (NOPR) regarding improvements in Generator Interconnection procedures on July 27, 2023. The final rule incorporated several areas of reforms that were open for public comment in its Notice of Public Rulemaking Docket No. RM 22-14 in 2022. The primary reforms in Order 2023 include:

- A shift from a serial first come, first served study process to a first-ready, first-served where transmission providers perform interconnection studies for a large number of projects, rather than separate studies for each individual interconnection request. Multiple RTOs/ISOs have or are in the process of shifting to such a cluster process.
- Greater transparency and public information on available interconnection capacity by location (such as a heatmap) to reduce the uncertainty faced by interconnection customers.
- Interconnection customer payment of commercial readiness deposits that increase as the interconnection process proceeds, and are based on network upgrade costs in later stages.
- Penalties for withdrawal from the queue that increase in amount as projects proceed through the queue process.
- Elimination of the "reasonable efforts standard" for the completion of studies with transmission providers subject to penalties when studies are not completed on time, ranging from \$1,000 to \$2,500 per day depending upon the type of study.
- Standardization of the affected system study agreement to minimize disputes and delays in such studies, which examine the impact of proposed interconnection requests on neighboring transmission systems and are often the cause of interconnection delays.
- Allowing more than one generating

facility to co-locate on a shared site and provide access to the use of surplus interconnection.

- At the request of the interconnection customer, require transmission providers to use operating assumptions in the studies that reflect the proposed charging behavior of electric storage resources (such as whether it will charge during times of peak load).

- Require transmission providers to evaluate a specified list of alternative transmission technologies in the interconnection studies, including advanced conductoring, and to explain the results of this evaluation.

- As stated in the Order, Transmission operator's compliance filings were required within 90 days of publication.

SPP Stakeholder Process

The KCC has participated in SPP's stakeholder processes concerning its compliance filing as it worked through various workgroups at SPP. SPP and other transmission providers filed Petition for reviews in the United States Court of Appeals. SPP's Petition for Review was filed in the United States Court of Appeals for the Eighth Circuit and requested an extension for its compliance filing past the 90 day publication window its compliance filing. SPP anticipates filing its compliance filing in early December of 2023, with an anticipated effective date of January 1, 2025. The KCC will continue to work through the SPP stakeholder process regarding its compliance with the Order and monitor the appellate process.

- RM18-9 – FERC Order No. 2222 (Order 2222) Notice of Final Rulemaking in Order 2222 on Distributed Energy Resources (DER) in April of 2021. DER are any resources located on the distribution system or behind the meter. DER is a broad definition that can include decentralized, modular, and more flexible technologies. These systems provide energy, capacity and other ancillary services.

Order 2222 was issued on September

17, 2020, and it removed barriers to the participation of DER aggregations in the capacity, energy, and ancillary service markets operated by Regional Transmission Organizations (e.g. the Southwest Power Pool or SPP). RTO/ISO's must amend their tariffs to allow DER aggregators to participate in their markets. RTO's have until spring 2022 to implement the changes required in Order 2222. The Commission has intervened in this docket at FERC and submitted comments, largely focusing on the need to respect principles of cooperative federalism and state jurisdiction. Staff actively participated in the stakeholder process at SPP.

SPP Stakeholder Process

Based on stakeholder feedback, SPP issued its Compliance filing seeking certain tariff modifications to comply with Order 2222 for FERC's approval in ER22-1697 in April of 2022. FERC requested additional data from SPP and intervening parties have continued to submit responses and answers to the filing throughout 2023.

Currently, there is one company, Voltus, in Kansas operating as a DER. Voltus issued Comments regarding SPP's Dual Participation Rule on December 13, 2022. On March 23, 2023, Voltus issued an Answer to American Electric Power Service Corporation's response related to SPP's Dual Participation rule filed on January 20, 2023.

As of October 30, 2023, SPP is awaiting FERC's approval of its Compliance filing.

FERC Dockets involving Kansas-Jurisdictional Utilities in FY2023:

- EL21-18, ER22-2084 – KEPCo filed a formal challenge and complaint against Evergy asserting certain costs that Evergy recovers through its Generation Formula Rate from KEPCo are unjust and unreasonable. In particular, KEPCo identified Evergy's recovery of amortized costs of previously unapproved regulatory assets and cancelled investments and accounting treatment for unfunded reserves. The KCC filed a doc-less intervention on December 2, 2020.

The KCC Staff is engaged in settlement discussions with KEPCo, Evergy, and Trial Staff on the unfunded reserves issue. The KCC did not take a position on the cost-recovery issues that were within the scope of settlement judge procedure.

The docket is currently on two tracks. On the settlement track, FERC issued an order on August 15, 2022, accepting an uncontested stipulation regarding accounting treatment of unfunded reserves.

- On the litigation track, FERC issued an order on October 3, 2022, (i) directing Evergy to refund costs recovered for unapproved regulatory assets, and (ii) affirming Evergy's recovery, over KEPCo's objection, of costs for canceled projects. Next steps are unclear as FERC already issued a rehearing order, which would mean KEPCo and Evergy are free to seek judicial review. But the October 3, 2022 order resolved KEPCo's motion to compel Evergy to comply with the rehearing order. Following a series of filings by KEPCo & Evergy on rehearing requests and FERC's denial, Evergy refiled its Q4 Form 1 Report on November 23, 2022 to comply with FERC's October 3, 2023. Then, Evergy filed a Petition for Review filed in the United States Court of Appeals for the District of Columbia Circuit on February 7, 2023. The Appellate Court's decision remains outstanding. EL22-20 – KEPCo's December 10, 2021, Formal Challenge and Section 206 Complaint regarding Evergy's 2022 generation formula rate, particularly its calculation of Variable O&M expense, treatment of costs associated with the Jeffrey Energy Center, and treatment of SPP charge types. The KCC filed a doc-less notice of intervention on January 10, 2022. The KCC Staff is engaged in formal and informal settlement discussions with KEPCo and Evergy.

Both KEPCo and Evergy sought rehearing of various aspects of FERC's May 31, 2022 hearing order. In an Order issued on October 6, 2022, FERC agreed with KEPCo that the refund date should have been the earlier date established in

the Evergy's implementation protocols instead of the late date of the filing of the Challenge/Complaint¹. FERC also provided Evergy its requested clarifications or dismissed its concerns as premature.

After several technical and settlement conferences, KEPCo filed a Notice of Withdrawal of its Formal Challenge and Complaint on March 20, 2023. On April 6, 2023, the Settlement Judge terminated the proceeding.

- ER22-1657, ER23-1762, ER23-1764, ER 23-1820 - Following the disallowance of amortized costs of unapproved regulatory assets in EL21-18, Evergy filed this Section 205 application to obtain approval of multiple regulatory assets. The KCC filed a doc-less notice of intervention on May 6, 2022. It has not taken a position on the merits.

In an October 3, 2022 order, FERC accepted the filing subject to hearing procedures. It held those procedures in abeyance pending the outcome of settlement judge procedures.

After, several settlement conferences were scheduled without resolve an impasse was declared and FERC terminated Settlement Judge Procedures and approved a Procedural Schedule and Hearing rules, set for early 2024. Recently, Trial Staff and the KCC submitted a joint settlement offer to Evergy Central and KEPCo to resolve the issue prior to litigation. The offer remains outstanding.

- ER22-1205 – KEPCo's March 3, 2022, Formal Challenge to Evergy's calculation of capital structure in its generation formula rate. The KCC filed a notice of intervention and comments on April 21, 2022 that (i) agreed with KEPCo that Evergy improperly double counted some amounts from 2018 to 2022, but (ii) asked FERC to consider unique circumstances of the 1992 KPL/KGE merger and allow Evergy to include KGE's retained

earnings in its calculation.

FERC issued a deficiency letter on July 29, 2022, seeking additional information from Evergy regarding the issues the KCC addressed in its ER22-1205 comments. Evergy responded on August 29, 2022. FERC issued its Order on December 21, 2022.

In the Order, FERC ruled that Evergy had incorrectly calculated its equity component of its rate of return and requested Evergy revise its return calculation to accurately calculate the component for recovery in the 2021 true-up and the 2023 projected rate year. Evergy issued its compliance filing in January of 2023, revising its 2023 Annual transmission revenue requirement by \$24.2 million, which consisted of a refund of \$15.76 million for the Annual True-up of its 2020 rate year/2022 Projection and \$9.9 million adjustment to its 2021 True-up.

- ER22-1500 – SPP's March 30, 2022, Section 205 application, on behalf of Sunflower, to update the depreciation rates included in the transmission formula rate SPP recovers for Sunflower. The KCC filed a doc-less notice of intervention on April 20, 2022 and has not taken a position on the merits.

FERC set the matter for hearing in an August 8, 2022, order but held the hearing in abeyance pending the outcome of settlement judge procedures. Judge Hessler will convene the next settlement conference on November 29, 2022.

The KCC attended several settlement conferences in 2023 on this matter, and Sunflower, the KCC and Trial Staff, along with other intervening parties submitted a Joint Offer of Settlement on April 25, 2023, which FERC approved on June 21, 2023.

- EL23-44: Following FERC's Order in the ER22-1205 Docket, KEPCo, the Kansas Municipal Energy Agency, and Kansas Power Pool issued an additional

Section 206 filing concerning Evergy's calculation of its capital structure for its Transmission Formula Rate and Generation Formula Rate for rate periods in 2018 and 2019. The KCC filed Notice of Intervention and Comments concluded that Evergy's calculation of equity capitalization violated the Generation and Transmission Formula Rates; however, the KCC does not necessarily agree with the degree of relief requested by the Kansas customers. The KCC cited other known violations for two additional errors be remedied that were not identified by the Kansas customers. Following the KCC comments, the Kansas customers and Evergy Central submitted a number of responses and answers to the issues raised by the KCC and other party. This issue remains outstanding at FERC.

- ER23-928 – Liberty Empire's Request for Waiver of SPP Planning Reserve Requirements Attachment V, Section 3.9 (ii) of Southwest Power Pool's (SPP) Open Access Transmission Tariff (OATT). Liberty Empire's Riverton Unit 10 incurred an unplanned outage due to a fire on February 8, 2021, and replacement parts were unavailable. Liberty Empire conducted a state-mandated Integrated Resource Plan and filed the plan on April 1, 2022. Liberty Empire's 2022 IRP showed it would be better served to replace the Riverton Unit 10, with a new more reliable internal combustion engine or similar technology at the same location.

Liberty Empire's waiver request concerns the pertinent part, Section 3.9.1(ii) of Attachment V of SPP's OATT, which requires that requests to replace an Existing Generating Facility be submitted to SPP within a year of the date the Existing Generating Facility was determined to be in forced outage. Under that requirement, Liberty Empire's request to replace Riverton Unit 10 was due to SPP by February 8, 2022. Liberty

¹ Because FERC did not act on KEPCo's rehearing request within the time prescribed by the Federal Power Act, KEPCo filed a protective petition for review with the D.C. Circuit on September 28, 2022. D.C. Circuit Case No. 22-1254. The October 6, 2022 order should render that petition moot.

Empire did not meet that requirement. Given the time needed to develop Liberty Empire's integrated resource plan and complete the administrative procedures through which that plan is reviewed, the decision to replace Riverton Unit 10 was made after February 8, 2022.

Liberty Empire expects increasing demands from the increase in the SPP PRM requirement, the increased frequency and severity of extreme weather events, and in response to the resource accreditation requirements of SPP's recently approved Performance Based Accreditation ("PBA") process. If the one-year notice provision in Section 3.9.1(ii) of Attachment V bars Empire from replacing Riverton Unit 10, Empire's ability to meet these increasing demands is threatened. Stated succinctly, granting the Petition is necessary to ensure Empire can meet its obligation to serve Kansas customers.

The KCC filed a Notice of intervention and Comments in Support of Liberty Empire's Waiver Request on February 26, 2023. On March 29, 2023, FERC issued its Order denying Liberty Empire's waiver request, stating the requirement in GIP section 3.9.1(ii) to submit a generating facility replacement request up to one year after an existing generating facility is determined to be in forced outage (i.e., by February 8, 2022) is retroactive in nature and is prohibited by the filed rate doctrine. On April 28, 2023, Liberty Empire requested a rehearing of the Order issued on March 29, 2023, which FERC denied by operation of law on May 30, 2023. FERC issued an Order on July 12, 2023, addressing the rehearing request, but maintained its denial for the request for waiver due to the retroactive nature of the request and prohibited by the filed rate doctrine.

SOUTHWEST POWER POOL

The Southwest Power Pool (SPP) was approved as a Regional Transmission Organization (RTO) by the Federal Energy Regulatory Commission (FERC) in 2004 and is, therefore, required to ensure reliable supplies of

wholesale power, adequate transmission infrastructure, and competitive wholesale pricing of electricity. SPP is a non-profit corporation organized under the laws of the State of Arkansas and regulated by the FERC.

SPP is also a regulated public utility in Kansas, having obtained from the Commission a limited Certificate of Convenience and Authority to manage and coordinate use of certain transmission facilities and to develop an energy imbalance market. Simultaneously, the Commission authorized the existing electric public utilities in Kansas to transfer functional control of transmission facilities to and participate in an SPP energy imbalance market.

When SPP became an RTO, it had 131 employees and 48 members including 28 (58% of membership) investor-owned utilities, municipal systems, generation and transmission cooperatives and state authorities who served retail loads in parts of eight states (Arkansas, Kansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma, and Texas). Three Nebraska public power utilities became members of SPP in 2008. On October 1, 2015, SPP membership expanded to include the Integrated Transmission System consisting of a portion of the Western Area Power Administration, Basin Electric Cooperative and the Heartland Consumers Power District. This integration, while contested by the KCC at FERC because of cost allocation concerns, added 5,000 MW of peak demand and 7,600 MW of generating capacity to SPP's system. In 2019, SPP launched the first of its Western Energy Services, Western Reliability Coordination, followed by operating the Western Resource Adequacy Program for the Western Power Pool in 2020 and adding the Western Energy Imbalance Services Market in 2021 thereby expanding its service territory to encompass parts of 23 states or provinces. SPP currently has around 700 employees and 111 members directly or indirectly responsible for serving 19 million people in the 17 states that

exclude the Western Energy Imbalance Services Market, 552,000-square-mile region, including more than 70,000 miles of high-voltage transmission lines. By FERC approved tariff, SPP's administrative costs are recovered from load throughout the 15 state region, at a rate not to exceed \$.465 (cents) per MWh.

Commission interaction with the SPP and participation in RTO matters is authorized by K.S.A. 74-633 and K.S.A. 66-106. The SPP organization has created approximately thirty primary working groups/committees, as well as multiple subordinate task forces. The Commission is represented by one KCC Commissioner on the Regional State Committee (RSC), which consists of one regulator or other state representative from each of the load-serving states in the SPP. The Cost Allocation Working Group reports to the RSC and is composed of one voting staff member from each of the states, along with other state staff participants. The RSC fulfills an advisory role in SPP and does not "approve" any transmission projects. Its participation in the SPP process is mostly limited to providing collective state regulatory agency input and participation, as stated in the RSC By-Laws. However, the RSC does have authority over specific areas within SPP, including cost allocation methodologies and resource adequacy policies. For example, the RSC designed the original cost allocation methodology for committing retail ratepayer funds for construction of new transmission projects and has revised the methodology from time-to-time. The RSC has no responsibility in approving transmission projects or their associated costs. Approval of specific transmission projects and their associated costs are ultimately approved for construction by the SPP Board of Directors. Thus, the KCC has no direct oversight through its SPP involvement over the amount of spending for Kansas-specific or regional transmission projects, which makes it imperative that the Commission be represented in a liaison capacity on multiple SPP stakeholder committees and task forces.

The Kansas RSC member represented states' interests as a member of the Strategic and Creative Re-engineering of Integrated Planning Team (SCRIPT). The scope of activities for SCRIPT includes, in part, improvements on SPP's transmission planning and study processes, in order to: (1) Develop more optimal transmission planning solutions that meet a broader set of customer needs; (2) Synergize analysis so that beneficiaries and cost-causers can be identified in a holistic and uniform fashion; (3) Improve planning efficiency, effectiveness, and timeliness; (4) Reduce the number of transmission planning model sets; and (5) Reduce reliance on customer-requested, queue-driven studies. On September 24, 2021, the SCRIPT team approved its report and sent it to the SPP Board of Directors for review and approval. The SCRIPT report included 35 recommendations and 11 sub-recommendations for business practices, policies, and tariff revisions, which will consolidate planning process development and improve planning processes. The SPP Board approved the SCRIPT recommendations at its October 2021 meeting.

Kansas also participated directly in SPP's Improved Resource Availability Task Force (IRATF). The IRATF was formed as a result of SPP's 2021 February Winter Weather Event Report. The Winter Weather Report identified four Tier 1 recommendations for immediate action that were assigned to the IRATF. The Tier 1 recommendations fall under fuel assurance and resource planning and availability. For fuel assurance, the report identified; (1) the development of policies that enhance fuel assurance to improve the availability and reliability of generation in the SPP region, and (2) the evaluation and, as applicable, advocacy for improvements in gas industry policies, including use of gas price cap mechanisms, needed to assure gas supply is readily and affordably available during extreme events. For resource planning and availability, the report identified; (1) perform initial and ongoing assessments of minimum reliability attributes

needed from SPP's resource mix, and (2) improve or develop policies, which may include required performance of seasonal resource adequacy assessments, development of accreditation criteria, incorporation of minimum reliability attribute requirements, and utilization of market-based incentives that ensure sufficient resources will be available during normal and extreme conditions. The IRATF's work is nearing completion and the IRATF is expected to wind down by the end of 2023.

In early 2022, the SPP Board of Directors finalized the Future Grid Strategy Advisory Group (FGSAG) to oversee periodic assessments of the future state of the SPP grid, identify gaps between those future state projections and current trajectories, and increase organizational awareness of value-added opportunities to shape the future grid. The FGSAG advises the organization of future-grid capabilities needed to assure continued reliable and affordable grid operations.

In March 2022, SPP and the Mid-Continent Independent System Operator (MISO) released the results of their collaborative study that originated in 2020. Referred to as the Joint Targeted Interconnection Queue (JTIQ) study, its purpose was to identify transmission projects required to address the significant transmission limitations restricting the opportunity to interconnect new generating resources near the MISO-SPP seam. The study initially identified a seven-project JTIQ Portfolio with a planning level estimated cost of \$1.65 billion. In addition to substantial reliability benefits, economic analysis conducted by the SPP and MISO show customers can anticipate an Adjusted Production Cost (APC) benefit of \$724 million in the MISO footprint and \$247 million in the SPP region. When two of the projects were later determined to be eligible for MISO's long-range transmission plan funding and removed from the JTIQ portfolio, the estimated cost dropped to \$1.06 billion with APC benefits for MISO and SPP valued at 55.7 million and 132.9 million, respectively. The JTIQ proposal received

approval in robust stakeholder processes in both SPP and MISO, including the SPP RSC and its advisory Cost Allocation Working Group. Both SPP and MISO are developing tariff language to implement the JTIQ proposal. In May 2023, through the Minnesota Department of Commerce, SPP and MISO made application to the Department of Energy's Grid Resilience and Innovative Partnership Program (GRIP) for federal funding to support the JTIQ projects. On October 18, 2023, DOE awarded \$464 million in GRIP funding to the JTIQ projects.

The Kansas RSC member was instrumental in creating the Resource Energy and Adequacy Leadership (REAL) Team, an RSC subgroup composed of SPP stakeholders, board members, RSC and CAWG members. The purpose of the REAL Team is to assess SPP's current resource adequacy construct and to anticipate challenges resulting from resource mix changes, extreme weather impacts, increased demand, and evolving consumer behaviors. REAL Team's charge is also to provide guidance, prioritization, and policy recommendations needed to increase assurance that sufficient energy to meet load requirements can be continuously and cost-effectively provided within the SPP Balancing Authority Area (BAA). The team is also to address applicable recommendations from the Future Grid Strategy Advisory Group and initiatives identified in the SPP Resource Adequacy roadmap. The REAL Team began in March 2023 and is targeted to complete its work by the end of 2024.

TRANSMISSION PLANNING AND CONSTRUCTION

Since its inception as an RTO, the SPP has added more than \$8.3 billion in new transmission projects. The total ATRR for region-wide transmission projects is \$533 million as of October 2023. This represents annual capital cost recovery, operation and maintenance (O&M), and other transmission related expenses for regional projects that are in-service. These revenue requirements are recovered

through FERC-approved Transmission Formula Rates (TFR), FERC-approved stated rates, or, in some cases, state approved TFRs. The current annual cost to Kansas ratepayers is approximately 16.5% of the annual transmission revenue requirement for the region, or \$88 million. The amount of expected transmission investment is currently expected to grow by approximately \$1.9 billion for the entire SPP footprint in the next three years as new SPP-approved projects come in to service. These projects are expected to come into service during the years 2024 through 2026.

Grain Belt Express

Clean Line Energy Partners (Clean Line) was certificated as a public utility by the Commission in December 2011. Clean Line subsequently filed a line siting application for the Grain Belt Express Clean Line Project and this project was approved by the Commission on November 7, 2013. On November 9, 2018, Clean Line entered into a purchase agreement to sell the Grain Belt Express assets to Invenergy Transmission LLC. The assets primarily consist of a proposed ± 600 kilo-volt (kV), high voltage direct current (HVDC) transmission line along with associated facilities capable of delivering 5,000 megawatts (MW) of power from Kansas to load centers east of Kansas. The project will originate in western Kansas near Sunflower's Spearville substation and traverse east across the state into Missouri where it will interconnect in the MISO RTO market. From there, the line will continue into Indiana and Illinois where it will interconnect with the PJM RTO market. This project will be funded through the sales of transmission capacity to wholesale customers (referred to as merchant transmission) and, therefore, will not be funded by Kansas retail ratepayers through regional SPP rates.

On December 28, 2018, Invenergy Transmission LLC and Clean Line filed and Application seeking approval of Invenergy purchasing the Kansas assets of Clean Line. On June 18, 2019, issued

an order approving the transaction with certain conditions. The Kansas docket approving the siting of the proposed transmission line required the Grain Belt Express to begin construction in Kansas by November of 2018. In an October 4, 2018, Order issued in Docket 13-GBEE-803-MIS (13-803 Docket), the Commission extended the sunset term of the siting approval to March 1, 2019, conditioned upon Grain Belt submitting evidence of its financial, managerial and technical ability to complete the Project. Some of the conditions contained in the settlement agreement that was approved as part of the sale of the Grain Belt assets to Invenergy are related to the sunset provisions contained in the 13-803 Docket. On September 26, 2019, the Commission replaced the 13-803 sunset provisions with requirements for Invenergy to meet specific deadlines to obtain easements in Kansas for the new line. Failure to meet the deadlines will subject Invenergy to financial penalties.

On July 26, 2022, Grain Belt Express filed an application with the Illinois Commerce Commission (ICC) for an Order (1) granting Grain Belt Express a Certificate of Public Convenience and Necessity (CPCN) to, directly or through one or more affiliates or third-party contractors, construct, operate and maintain a high voltage direct current electric service transmission line and related facilities to be known as the Grain Belt Express transmission line and to conduct a transmission public utility business in connection therewith; (2) authorizing Grain Belt Express, to construct the high voltage direct current electric service transmission line and related facilities; and (3) granting Grain Belt Express certain other relief in connection with its operations in Docket No. 22-0499.

On March 8, 2023, the ICC issued a Final Order granting Grain Belt Express' request subject to certain conditions outlined in Sections IV.E., IV.D.1 and Appendix B and Section VII.A. of the Order.

On August 24, 2022, Grain Belt Express

filed to amend its existing certificate of public convenience and necessity with the Missouri Public Service Commission (MPSC) (Docket No. EA-2023-0017), in order to reflect an updated project configuration and to seek approval to construct the project in two phases. On October 12, 2023, the MPSC issued a Report and Order granting the request, subject to conditions set forth in the Order.

Natural Gas

OVERVIEW

The KCC regulates three large (annual operating revenue greater than \$10 million) natural gas distribution utilities. A list of the large gas distribution utilities and a brief overview of the major activities for FY2023 are noted below. A summary of each major docket associated with the companies follow this narrative section along with a listing of all other natural gas dockets. In addition, included in this narrative section is a discussion of the Federal issues that the Utilities Division Staff spent a significant amount of time on during FY2023.

LARGE GAS UTILITY COMPANIES

ATMOS Energy Corporation

Black Hills/Kansas Gas Utility Co.

Kansas Gas Service, a Division of ONEOK, Inc.

During FY2023 there was one rate case filed involving a major natural gas company.

On September 9, 2022, Atmos filed Docket No. 23-ATMG-359-RTS, seeking a net revenue requirement increase of \$8.3 million. Atmos cited the following factors as drivers of the rate case: (1) capital investment since the previous rate case; (2) need for Atmos to improve its allowed return on its invested capital; (3) new depreciation rates; (4) Operation and Maintenance expense increases; (5) two part rate design with an increased monthly facility and volumetric charges; (6) implement a Voluntary Smart Choice Carbon Offset tariff; and (7) request for an expansion of the budget for the current

System Integrity Program Tariff approved in the previous rate case.

On February 21, 2023, the parties to this Docket presented a settlement agreement calling for a net revenue requirement increase of \$2.2 million. The Parties also agreed to several changes to Atmos' transportation tariffs, stemming from the lessons learned during the Winter Storm Uri general investigations. The first change was to require new customers electing to take transportation service to either have a peak monthly delivery of 1,500 MMBtu, or an annual delivery of 5,000 MMBtu. The Parties agreed to require all transportation customers, with the exception of small schools, to install Electronic Flow Measurement (EFM) devices. This EFM equipment was required to be installed by November 1, 2024, or customers had to be converted to sales service.

The Commission issued an Order approving the Settlement Agreement on May 9, 2023.

In addition, on March 3, 2022, Kansas Gas Service (KGS) filed Docket No. 23-KGSG-719-TAR to evaluate and change several aspects of its natural gas transportation tariffs. These changes to the transportation tariffs resulted from the lessons learned as a result of the Commission general investigations into Winter Storm Uri. Several natural gas marketers that are active in the natural gas transportation market in Kansas intervened in the case, as well as Sunflower Electric Power Cooperative (Sunflower), Atmos Energy, and Kansas Municipal Gas Agency (KMGA).

On September 22, 2023, the Parties all filed a Unanimous Settlement Agreement with the Commission. The Agreement called for several important revisions and improvements to KGS's transportation tariffs, including a mechanism to compensate gas marketers and others (like Sunflower and KMGA) for instances in which they deliver more natural gas to the KGS system than they use, during periods of extremely high demand coupled with very high gas prices. This mechanism makes it possible for shippers on the KGS system to be compensated for taking

actions which improve the reliability of the natural gas or electric systems in Kansas, either by supplying more gas when it is sorely needed, or by consuming less.

The Agreement also called for lowering the maximum penalty that can be assessed during events like Winter Storm Uri. The Agreement calls for changes to the way these penalties are calculated, from the greater of a less significant dollar amount per MMBtu (\$5 to \$20) or a multiple of the Gas Daily Index, to the lesser of a much more significant dollar amount per MMBtu (\$15 to \$100), plus the underlying Gas Daily Index, or a multiple of the Gas Daily Index. This allows any potential penalties to not be so draconian as to cause severe distress on the Kansas Economy, while at the same time ensuring that they convey the intended punitive effect in order to incent compliance with KGS's critical directives during times of system stress, such as an Operational Flow Order or Period of Curtailment.

Additionally, the Agreement called for all transportation customers, with the exception of School customers and Irrigation customers using less than 3,000/Mcf/year, to install EFM equipment by January 15, 2027, or be converted to Sales Service. For Schools using more than 3,000 Mcf/year, KGS agreed to pay for the EFM installation for these customers, with KGS recovering its actual costs of conversion plus a carrying charge at the approved rate of return used for the Gas Safety Reliability Surcharge.

Lastly, the Agreement called for revising the Cash Out price that KGS pays transportation customers, or that transportation customers pay KGS, in the event of imbalances at the end of the billing month. These changes improved the incentive that transportation customers have to stay in balance during the month, and by the end of the month, which lowers the likelihood of subsidization between the sales and transportation customer classes.

This Docket remains under review by the Commission, with a final order due by November 27, 2023.

FEDERAL ISSUES

The Commission Staff monitors the rate and tariff activities of several interstate pipelines that serve Kansas local distribution companies, towns, and other large volume gas users. Chief among these is Southern Star Central, which transports 60% to 70% of all natural gas consumed annually in Kansas. Other interstate gas pipelines such as Kansas Pipeline Company, Cheyenne Plains Gas Transmission, Panhandle Eastern Pipeline, Tallgrass Interstate Gas Pipeline, and Northern Natural Gas are also monitored.

In addition to monitoring rate and tariff issues, the KCC intervenes in a variety of other filings by interstate gas transmission companies including: annual fuel and lost and unaccounted for gas filings (FL&U), construction and abandonment filings, tariff change filings, gas quality specifications filings, and storage dockets. The KCC also participates rulemaking and policy dockets that affect the cost of gas transportation.

During FY2023, the KCC intervened in the following Natural Gas Dockets at FERC:

- RP23-398 – Southern Star Capital Cost Recovery Mechanism (CRM) Surcharge filing: In compliance with the Settlement Agreement in Southern Star Rate Case proceeding in FERC Docket No. RP21-778, Southern Star filed its first year annual modernization CRM surcharge rate in FERC Docket RP23-398 to recover its investment in modernization projects that were completed and placed into service during 2022. During 2022, Southern Star "Eligible Capital Costs" totaled \$89.8 million. The CRM limits Southern Star's rate recovery to \$88 million for 2022, and applied the \$1.8 million excess of the project cap was treated as capital maintenance costs pursuant to the tariff provisions. Southern Star's project investment was assigned directly (when possible) or functionalized, resulting in \$45.68 million in transportation projects assigned to the production area,

\$37.23 million of projects assigned to the transportation market area, and \$5.09 million of projects assigned to storage. The CRM Surcharge rates were based on the billing determinants for the maximum daily transport quantity (MDTQ) of usage for transportation rates and maximum daily withdrawal quantity (MDWQ) for storage rates, resulting in a surcharge of \$0.109 per MDTQ for the transportation production area, \$0.0072 per MDTQ for the transportation market area, and \$0.020 per MDWQ for storage. The KCC continues to audit and participate in the project review process with Southern Star.

- **RP22-1033 – Northern Natural Gas Rate Case** – On June 16, 2022, Northern Natural Gas provided notice of customer meeting to discuss its Section 4 rate case filing, which was filed on July 1, 2022. Northern's last Section 4 rate case was filed July 1, 2019 in FERC Docket RP19-1353 and was settled on September 28, 2020. The Stipulation and Agreement in the RP19-1353 rate case included a 28% increase in Northern's rates and included a rate moratorium that ended June 30, 2022.

In its filing, Northern stated its rate case is driven by an investment of \$1.6 billion in pipeline modernization and maintenance capital that is not in rates, adding approximately \$1.1 billion to rate base or a 37% increase from its last rate case. Northern's rate case includes a cost of service of \$1.34 billion or an increase of \$477.9 million, which equates to a 55.6% increase over its existing cost of service of \$860 million. Northern's requested rate of return is 10.61%, which includes an ROE of 14.31% and a capital structure is 36.4% debt and 63.6% equity.

On July 13, 2022, the KCC submitted its Notice of Intervention, Protest, and Request for the Maximum Suspension period available under the Natural Gas Act for the RP22-1033 rate proceeding. The KCC Staff actively participated in the review of Northern's rate case filing and attended a number of settlement negotiations in early 2023.

On June 23, 2023, Northern submitted

a Stipulation and Agreement (S&A) that included a black box settlement that provided stated transportation and storage rates. The increase in Northern's transportation and storage reservation rates include: a 32.5% increase in the reservation rates for transportation in the Market Area, a 20.5% increase in the reservation rates for transportation in the Field Area, and a 13% increase in the reservation and commodity rates for Storage. Based on the KCC calculation of settlement rates, the S&A provided Northern with a cost of service of approximately \$1.01 billion, which equates to approximately a \$150 million increase over its previously approved revenue requirement of \$860 million. The KCC's cost of service calculation included a return on equity of 11.5%, a cost of debt of 4.15% and Northern's actual capital structure consisting of 63.39% equity and 36.39% debt. The KCC would note that Northern's return on equity and capital structure was in line with FERC's decision included in Opinion No. 885 and Order on Panhandle Eastern's most recently litigated return on equity of 11.25% and capital structure (63% equity and 37% debt) issued in December 22, 2022. The KCC is listed as a Settling Party indicating the Commission's non-opposition to the filed S&A. While other parties to the S&A have all indicated their support for or non-opposition to the settlement, Trial Staff and the Canadian Association of Petroleum Producers have filed Comments in Support of the Agreement, without any comments filed by parties objecting to the terms of the settlement. As of July 24, 2023, FERC has yet to issue an Order approving the S&A in the RP22-1033 Docket.

Natural Gas Pipeline Safety

OVERVIEW

Pipeline safety personnel continue to conduct onsite inspections of intrastate natural gas facilities. The inspections monitor the gas systems for any areas of non-compliance with pipeline safety regulations. A typical audit will stress compliance with the operator's

management of the integrity of the pipeline delivery system including such topics as review of emergency response plans, odorization requirements, cathodic protection, leak surveys, and operator qualification requirements. In addition, engineers and pipeline safety inspectors investigate any incident suspected of being caused by natural gas and report these to the Commission. Any recommendations of Staff regarding prevention of potential incidents are included in the report and considered by the Commission. Statistics that provide a snapshot of the pipeline safety personnel's inspection activity, as well as an overview of the regulated gas infrastructure in Kansas, can be found in the pipeline safety section of this report.

Pipeline safety personnel also investigate violations of the Kansas Underground Utilities Damage Prevention Act (KUUDPA). Investigators work with excavators and utility operators to assure compliance with provisions of the Act such as requesting locates prior to digging and locating facilities within 48 hours of being notified of pending excavation work. To enhance our KUUDPA enforcement efforts, KCC receives two federal grants that provide funding for two inspector positions for the calendar year. For the calendar year of 2022, the Commission acted upon 25 filings in which fines were levied to 23 excavators for failure to notify utilities prior to excavating over buried facilities and to 4 utility operators for failure to provide timely or accurate locates. For the 25 cases, a total of \$12,500 in fines was levied.

For one of Kansas largest natural gas operators, a show cause order was issued for 158 one call violations that occurred in calendar years 2020, 2021, and 2022 for 158 violations of KUUDPA. The Commission approved a settlement agreement between KGS and Staff to direct a penalty totaling \$158,000 for educational grants to institutions which offer heavy equipment operator training programs. This grant program will be administered by Commission Staff and will provide training on safe

excavation practices when working near underground facilities with any type of excavation equipment.

Kansas experienced no natural gas incidents in FY2023.

Liquid Pipeline Common Carriers

OVERVIEW

Although there are relatively few intrastate pipeline common carriers in Kansas, the Commission is responsible for the economic regulation of this sector. The majority of Staff's work in this area is the review of tariff and rate filings in an effort to ensure efficiency, public interest, and balanced benefit to Kansas common carriers and shippers. Staff is responsible for the economic regulation, including but not limited to: processing tariff and rate filings; analyzing tariffs for compliance; monitoring complaints; processing and monitoring certificate filings due to sales, purchases, mergers and acquisitions, divestitures, service cessations and abandonment; and monitoring operations for unforeseeable events and capacity constraints. Additionally, Staff tracks all intrastate revenue reported from each pipeline company. Staff processed 15 intrastate pipeline common carrier dockets during FY2023. The intrastate liquid pipeline companies regulated by the KCC are noted below. There were no major dockets in FY2023 for liquid pipelines. A listing of all other liquid pipeline dockets follow this narrative section.

LARGE LIQUID PIPELINE UTILITIES (\$10M or more in annual intrastate revenues)

Magellan Pipeline Company, LP

SMALL LIQUID PIPELINE UTILITIES (\$10M or less in annual intrastate revenues)

Jayhawk Pipeline (owned by NCRA)

Kaw Pipeline Company

Mid-America Pipeline Company, a

subsidiary of Enterprise Products Partners, LP

NuStar Pipeline Operating Partnership, LP

ONEOK NGL Pipeline, LLC

ONEOK North Systems

Plains Pipeline, LP

Telecommunications

OVERVIEW

The KCC regulates four primary types of telecommunications carriers with varying degrees of regulation: Incumbent Local Exchange Carriers (ILECs); Electing Carriers; Competitive Local Exchange Carriers (CLECs); and Interexchange Carriers (IXCs) (also known as long-distance carriers). These telecommunications carriers serve a customer base ranging from as few as one customer to over 250,000 customers. The large telecommunications carriers regulated by the KCC are noted below. A summary of each major docket associated with the telecommunications carriers follow this narrative section along with a listing of all other telecommunications dockets.

LARGE TELECOMMUNICATIONS CARRIERS

Kansas Fiber Network, LLC

IdeaTek Telecom, LLC

Cox Kansas Telecom, LLC

Southwestern Bell Telephone Company d/b/a AT&T Kansas

United Telephone Companies of Kansas, Inc. d/b/a Brightspeed (formerly CenturyLink)

Including the five large telecommunications utilities listed above, the Commission has certificated 36 incumbent local exchange carriers (ILECs)², 123 CLECs, and 193 IXCs.

The KCC continues its effort in fulfilling its obligation to protect

the rights and privileges of Kansas consumers in balance with the interests of the telecommunication carriers. The evolution of competition in providing local and long distance telecommunications has resulted, in some instances, in greater choice of available services at a variety of rates with a wider array of providers, packages, and bundles from which to choose. Technology developments have also continued to play a key role in the evolution of the telecommunications industry.

The KCC Staff is responsible for economic regulation, including but not limited to: processing incumbent local exchange carrier tariff filings and switched access rate filings; analyzing tariffs for compliance with KCC rules and regulations; administering consumer and carrier complaints; processing certificate filings, service cessations, name changes, and sales and acquisitions involving rural ILECs; reviewing carrier-to-carrier interconnection agreements and providing mediation when necessary; ensuring quality services of the incumbent local exchange carriers; overseeing the Kansas Universal Service Fund (KUSF); auditing rate-of-return regulated ILECs; processing video service applications; and processing eligible telecommunications carriers filings.

KANSAS UNIVERSAL SERVICE FUND

The KUSF was established by the Commission in 1996, as required by the Kansas Telecommunications Act. The KUSF is in its twenty-seventh year of providing support to local telephone service providers to assist in making universal service available in high-cost areas of the state, to provide dual-party relay service and telecommunications equipment for persons with disabilities, and to provide assistance to those with lower incomes through the Lifeline program. Effective March 1, 2023, the annual KUSF funding requirement is approximately \$38.3 million and the

² In 2011, Tri-County Telephone Association, Inc. purchased Council Grove Telephone Company, Docket Nos.11-CGTT-370-CCS and 11-TRCT-371-COC, April 28, 2011.

carrier assessment rate is 11.37%. The KUSF provides approximately \$37.1 million in high-cost support, \$174,800 for low-income subscribers, \$241,900 for telecommunications relay service, \$253,600 for the telecommunications equipment program, and \$536,600 for the fund administration and carrier audits.

The Commission began audits of all ILECs receiving KUSF support in 2000. The Commission has completed the initial audits for all ILECs and continues to monitor and initiate new audits when warranted based on an annual review of financial metrics. All of the rural ILECs have elected rate-of-return regulation; therefore, the audits provide an opportunity for the Commission to determine whether or not the KUSF support is cost-based for each rural ILEC.

On June 2, 2022, Columbus Communications Services, LLC (Columbus) filed an Application requesting \$474,950 of annual KUSF support. On June 23, 2022, the Commission issued a Procedural Schedule Order. On October 6, 2022, Commission Staff's Direct Testimony supported Columbus' receipt of \$403,007 of annual KUSF support, prior to any pro-rating of KUSF support. On October 25, 2023, Staff and Columbus filed a settlement agreement requesting Columbus' annual KUSF be set at \$373,344. On December 29, 2022, the Commission issued an order approving the settlement agreement.

K.S.A. 66-2008(e)(3) caps the annual KUSF support payable to the rural ILECs at \$30 million. When the Commission approves a change to a rural ILEC's KUSF support, the amount is prior to any pro-rata calculations Staff makes to determine each rural ILEC's share of the \$30 million support cap. Staff files its pro-rata KUSF support calculation for the rural ILECs in the annual KUSF docket to ensure the rural ILECs can review those calculations. The Commission issues an order setting the rural ILECs' pro-rated KUSF support. This process occurs whenever a change in a rural

ILEC's KUSF support is approved.

On May 14, 2021, a coalition of Rural Local Exchange Carriers (RLECs) appealed the Commission's Orders implementing legislatively mandated pro-rata reductions to the Rural Local Exchange Carriers' (RLECs) Kansas Universal Service Fund (KUSF) subsidies for exceeding the \$30 million statutory cap on annual KUSF payments to the RLECs. Following Oral Argument, on April 29, 2022, the District Court of Shawnee County issued its Memorandum Decision and Order, denying the RLECs' Petition for Judicial Review. On May 22, 2022, the RLECs filed their notice of appeal to the Court of Appeals. In the RLECs' docketing statement filed July 22, 2022, they claim, "In 2013, the legislature, without explanation, broke its promise and instituted a \$30,000,000 cap on the amount of cumulative high cost support to be paid to RLECs."

On October 11, 2022, the RLECs filed their Brief with the Court of Appeals, reiterating their arguments that a legislatively imposed statutory cap is an illegal takings under the 5th Amendment of U.S. Constitution and violates other statutory provisions, and thus should be repealed. The RLECs are essentially challenging the legislature's authority to impose any constraints on the annual Kansas Universal Service Fund (KUSF) subsidies they receive. The Commission's Brief was due November 10, 2022, and the RLECs would then have 14 days to file a reply brief. The Court of Appeals ultimately denied the RLECs petition and left the KUSF cap intact. The RLEC's did not seek a review by the Kansas Supreme Court.

FEDERAL ISSUES

Congress determined that broadband is no longer a luxury but a necessity for full participation in our economy and society – for all Americans. For that reason, the FCC adopted comprehensive reforms of its Universal Service Fund (USF) and Intercarrier Compensation (ICC) systems to accelerate broadband build-out to the approximately 23 million Americans (as of December 31, 2013) who lacked access

to infrastructure capable of providing 10/1 Megabits per second (Mbps) fixed broadband. This reform will expand the benefits of high-speed Internet to millions of consumers in every part of the county by transforming the existing USF into a new Connect America Fund (CAF) focused on broadband. The broad goal is to support the provision of broadband communications in areas that would be unserved without such support or that depend on universal service support for the maintenance of existing broadband service. The FCC has initiated numerous proceedings aimed at implementing its broadband goals.

As part of its reform efforts, the FCC offered over \$1.675 billion annually, for six calendar years (2015-2020), model-based CAF support to price cap carriers nationwide to fund the deployment of voice and broadband-capable services of at least 10/1 (Mbps) in the eligible areas. CenturyLink accepted \$16.5 million to provide broadband to 29,018 eligible households in Kansas, and AT&T accepted \$18.9 million to provide broadband to 35,375 eligible households in Kansas. Carriers were required to meet specific deployment milestones set by the FCC, including deployment to 100 percent of the supported locations in each state by December 31, 2020, with the FCC authorizing carriers to extend the deadline until December 31, 2021, as a result of the Covid-19 Pandemic. Compliance shall be determined based on the total number of supported locations in a state.

Taking further steps to expand rural broadband deployment, in March of 2016, the FCC approved modernization and reform of its universal service program supporting the nation's rate-of-return carriers by providing approximately \$20 billion in support over ten years, to modernize the universal service program for rate-of-return areas include enabling rate-of-return providers to meet consumer demand for stand-alone broadband by providing support for stand-alone broadband. The reforms include better targeting of support to communities that need it the most.

The FCC further allowed carriers to voluntarily transition from legacy rate-of-return support to model-based support, similar to CAF Phase II, for rate-of-return carriers (also known as Alternative Connect America Cost Model or ACAM). Kansas rate-of-return carriers: Haviland Telephone Company; JBN Telephone Company; Moundridge Telephone Company; S&A Telephone Company; Zenda Telephone Company; and Totah Communications elected to transition from legacy USF support to ACAM support, starting in 2017. Carriers that voluntarily elected to transition to A-CAM support must deploy service providing 10 Mbps/1 Mbps to all funded locations, with faster 25 Mbps/3 Mbps service required in areas of higher population density. Carriers are required to meet specific deployment milestones required by the FCC. Because the amount of federal high-cost support a carrier receives is included in the calculation of high-cost KUSF support received by a rate-of-return regulated carrier, changes in federal support may affect the KUSF - although the KUSF support for rate-of-return carriers remains subject to the \$30 million cap.

In December 2019, the FCC offered additional funding to rate-of-return carriers that receive A-CAM support if a carrier expanded the availability of 25/3 Mbps broadband, while deploying at least 10/1 Mbps to new locations in its service area. The FCC also provided an opportunity for rate-of-return carriers that did not elect to transition to A-CAM support in 2016 to transition to A-CAM II model-based support in return for

specifically tailored obligations to deploy 25/3 Mbps broadband. H&B Communications; LaHarpe Telephone Co., Inc.; MoKan Dial Inc.; Moundridge Telephone Co.; Rural Telephone Service Company; and Twin Valley Telephone, Inc. elected A-CAM II support. The FCC further authorized additional support for those carriers that elect to remain on legacy rate-of-return support in exchange to build-out 25/3 Mbps broadband.

In August 2019, the FCC proposed Auction 904, a reverse auction, to build on the Connect America Fund Phase II (CAF II) auction and bring broadband service to Americans living in unserved areas. The Rural Digital Opportunity Fund (RDOF) is the FCC's next step in bridging the digital divide to efficiently fund the deployment of broadband networks in rural America. Through a two-phase reverse auction mechanism, the FCC will direct up to \$20.4 billion over ten years to finance up to gigabit speed broadband networks in unserved rural areas, connecting millions of American homes and businesses to digital opportunity.

The RDOF Phase I auction (up to \$16.0 B) opened on October 29, 2020, and targeted over six million homes and businesses in census blocks that are entirely unserved by voice and broadband with speeds of at least 25/3 Mbps. On December 7, 2020, the FCC announced the Auction 904 winning bidders, awarding \$9.23 billion of the budgeted \$16 billion for the ten-year period to 180 companies to deploy voice and broadband services to 5,295,771 locations in 61,766 census blocks in 49 states and one territory. Twelve

companies, were awarded a total of \$62.1 million to deploy service to 46,827 Kansas locations. The Commission granted ETC designation to ten of the companies and two of the companies forfeited their awards. Five Kansas companies began to receive RDOF support in 2021 and, by September 2022, three additional Kansas companies, for a total of eight companies, were receiving RDOF I support.

Water

OVERVIEW

The Kansas Corporation Commission (KCC) regulates four water companies, none of which fall into the large utility category. These water companies serve a customer base ranging from as few as 60 to as many as 1,850. Customers served by these companies typically live in a suburban area approximately two to ten miles outside the city. The water supplied varies from city water supplied by a nearby town to ground water supplied by the company's own water wells. The water companies regulated by the KCC are noted below. There is one ongoing docket associated with these companies.

WATER COMPANIES

Barton Hills Water District

Delmer Towns d.b.a. Towns Riverview

Green Acres Mobile Home Park, LLC

Suburban Water, Inc.

Financial Information and Other Metrics

OVERVIEW

The KCC sets rates for electric, natural gas, telecommunications, and water utilities on a rate base/rate of return basis for public or private utilities or a Times Interest Earned (TIER)/Debt Service Coverage Ratio (DSC) basis for cooperatives. For the electric, natural gas, and rural local exchange companies, the amount of capital investment, fuel and purchased power expense, total revenues, and total expenses are measured in billions of dollars. Following this overview section, more details are provided regarding financial information and other metrics for all the KCC jurisdictional utility industries on a consolidated and individual industry basis.

GAS, ELECTRIC, AND RURAL LOCAL EXCHANGE COMPANIES
TOTAL GROSS PLANT | 2018–2022

GAS, ELECTRIC, AND RURAL LOCAL EXCHANGE COMPANIES
TOTAL REVENUES AND EXPENSES | 2020–2022

Electric Utilities

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis. Empire District Electric and Evergy Kansas Metro have operations in multiple states. The values represented in the following charts relate only to the Kansas operations of those two entities.

ELECTRIC COMPANIES STATEWIDE GROSS PLANT | 2018–2022

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility’s rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

ELECTRIC COMPANIES GROSS PLANT, BY COMPANY | 2022

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, two entities encompass a vast majority of utility gross plant across Kansas.

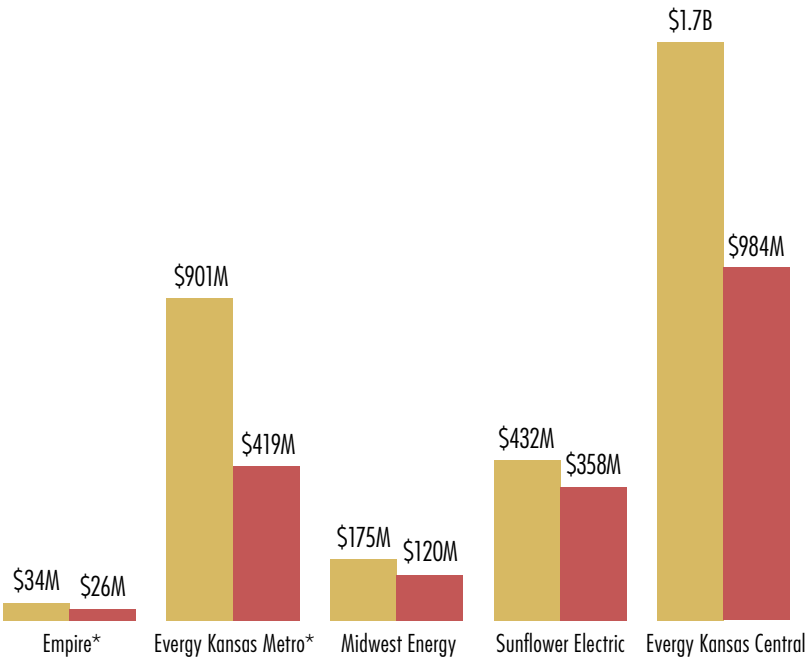

*All figures for Kansas operations only.

ELECTRIC COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2022

This chart compares each utility’s annualized revenues and expenses. The difference between the two represents the gross margin of each company. Worth noting is the difference in gross margins between the investor-owned utilities and the cooperatives. Embedded in that difference is the dividend cost that rewards and helps ensure continued shareholder investment.

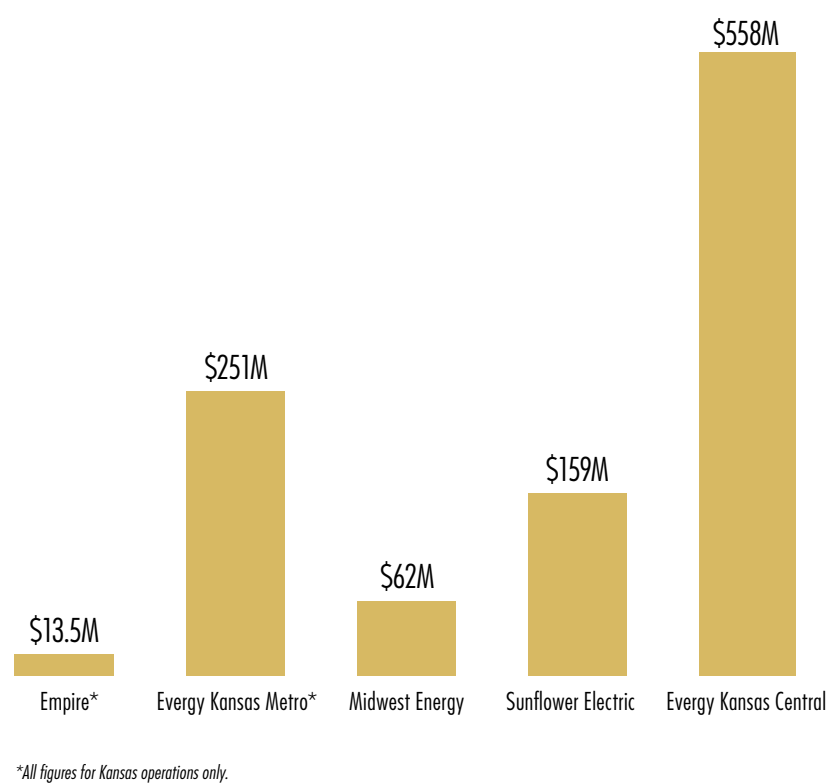

- Total Revenues
- Total Expenses

*All figures for Kansas operations only.

ELECTRIC COMPANIES GENERATING AND PURCHASED POWER COSTS, BY COMPANY | 2022

This chart takes the expense portion from each utility on the previous table and carves out the cost of generation and purchased power. As can be seen by comparing the two tables, generation and purchased power represent only about half the total cost of providing safe, reliable, and efficient electric service.

ELECTRIC COMPANIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY19-FY23

RESIDENTIAL ELECTRIC BILL COMPARISON | JULY 2022 - JUNE 2023

The following chart represents a comparison of monthly bills based on average residential consumption of 939 kWh.

	Company**	Customer Charge	Energy Charge	ECA**	Environmental Cost Recovery	Energy Efficiency Rider	Trans. Delivery Charge	Property Tax Surcharge	Tax Change Rider	Total Bill Without Tax	Cost Per KWH	Utility Bill as a % of National Avg. Bill	Utility Bill as a % of Kansas Wt. Avg. Generation Planning Survey

The Commission continues to monitor the generation capacity and reliability of Kansas electric utilities. Staff members annually review generation and load forecasts of Kansas electric utilities to ascertain whether there is adequate electric supply to meet the needs of Kansas electric consumers. All Kansas electricity suppliers are subject to the oversight of the Southwest Power Pool (SPP). Under the authority vested in it by the Federal Energy Regulatory Commission, the SPP is responsible to ensure a reliable supply of power in Kansas. Recent action taken by SPP has established the need for the Planning Reserve Margin (PRM)¹ to be increased from 12% to 15% by the summer of

2023. In conjunction with the increased PRM, SPP has agreed to modify the method of accrediting generation capacity to more accurately reflect the performance of each generator. This modification will be phased in over the next five years. Currently, accredited supply and PRM are based on the nameplate capacity of the generator and the summer peaking load of the system. Appendix C of the 2023 Electric Supply and Demand Report contains excerpts of a recent report provided by SPP² to its Regional State Committee³ that provides more information on proposed accreditation techniques and the recent modification of the PRM.

Based on its review, staff determined that, at this time, forecasted electric generation capacity and planning to meet future changes in system load in the State of Kansas appears sufficient given current load and generation forecasts planned. Although utilities in the chart do indicate deficiencies in the future, planned generation capacity additions can be made that will satisfy future planning responsibility. The chart on the following page describes the generation capacity situation major utilities in Kansas face going forward.

1 Planning Reserve Margin equals the difference in Deliverable or Prospective Resources and Net Internal Demand, divided by Net Internal Demand. Planning reserve margin is designed to measure the amount of generation capacity available to meet expected demand in planning horizon. Coupled with probabilistic analysis, calculated planning reserve margins have been an industry standard used by planners for decades as a relative indication of adequacy. See <https://www.nerc.com/pa/RAPA/ri/Pages/PlanningReserveMargin.aspx>.

2 See Southwest Power Pool Regional State Committee Summary of Motions and Action Items, July 25, 2022.

3 The SPP Regional State Committee provides collective state regulatory agency input on matters of regional importance related to the development and operation of bulk electric transmission. The SPP RSC is comprised of retail regulatory commissioners from agencies in Arkansas, Iowa, Kansas, Louisiana, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota and Texas.

Large Electric Rate Cases

EVERGY, INC. (EVERGY METRO, INC., EVERGY KANSAS CENTRAL, INC. AND EVERGY SOUTH, INC.)

Docket number 23-EKCE-775-RTS
Docket type Electric
Date filed 25 Apr 2023
Action date 21 Nov 2023
Commission action Approved

In the Matter of the Joint Application of Evergy Kansas Central, Inc., Evergy Kansas South, Inc. and Evergy Metro, Inc. for Approval to Make Certain Changes in their Charges for Electric Service.

On April 25, 2023, Evergy Kansas Central, Inc. and Evergy Kansas South, Inc. (collectively referred to as Evergy Kansas Central or EKC) and Evergy Metro, Inc. (Evergy Kansas Metro or EKM) (together with EKC referred to as Evergy) filed a Joint Application requesting authorization to make certain changes to EKC's and EKM's charges for electric service. Evergy's Application indicated a gross revenue deficiency of \$278,970,655 for EKC and \$25,072,678 for EKM, based upon normalized operating results for the 12-months ending September 30, 2022, as adjusted for known and measurable changes through June 30, 2023. After rebasing the amounts currently collected from customers through the Retail Energy Cost Adjustment (RECA) and the Property Tax Surcharge (PTS) the net impact of the requested revenue requirement increase was \$204.2 million (+9.77%) for EKC and \$14.2 million (+1.95%) for EKM.

There were six primary drivers behind the EKC rate case application. These primary contributors to its requested revenue increase included: (1) a significant increase in the level of physical plant investment since EKC's 2018 rate case; (2) EKC's proposed increase in the overall cost of capital from 7.0573% to 7.4189%; (3) an increase in depreciation expense largely attributable to the magnitude of EKC's investment in physical assets subject to depreciation, the adjustment of depreciable lives (and, thus depreciation rates) of existing generating assets to reflect the lives included in Evergy's annual Integrated Resource Plan (IRP), and the inclusion of the costs of dismantling retired plants; (4) the allocation of common use billings to EKC; (5) the expiration of the Company Owned Life Insurance (COLI)

program; and (6) the loss of revenues from the expiration of three wholesale contracts that have terminated since EKC's last rate case. EKC also made several other proposals regarding its capital structure, the request of recovery for an Accounting Authority Order (AAO) related to COVID-19, resource adequacy (specifically, the inclusion of the 8% portion of Jeffrey Energy Center (JEC) and Persimmon Creek Wind Farm in rates), and the continuation of the Critical Infrastructure Protection (CIPS)/Cybersecurity Tracker.

There were three primary drivers behind EKM filing the rate case. These primary contributors to its requested revenue increase included: (1) an increase in the level of physical plant investment since EKM's 2018 rate case; (2) EKM's requested increase in the overall cost of capital from 7.0728% to 7.4282%; and (3) depreciation expense associated with new plant and the inclusion of dismantlement costs. Similar to EKC, EKM also made several other proposals regarding its capital structure, recovery of the AAO related to COVID-19, and continuation of its CIPS/Cybersecurity Tracker, as well as proposed changes to its jurisdictional allocators and the establishment of a storm reserve.

On August 29, 2023, the parties involved in the docket filed their direct testimony. Specifically, Staff filed its direct testimony, including schedules and exhibits, supporting a recommended base rate revenue requirement increase of \$109,524,553 for EKC and a base rate revenue requirement decrease of \$42,274,032 for EKM. After recognition of the offsetting effects of rebasing the RECA and PTS, the net impact to customers of Staff's revenue requirement recommendation is a net increase of \$34.7 million (+1.66%) for EKC and a net decrease of \$53.2 million (-7.32%) for EKM. Staff also recommended changes to Evergy's requested distribution of revenue between the customer classes, or Class Cost of Service (CCOS), and other policy, rate design and tariff recommendations. The Citizens' Utility Ratepayers Board (CURB), Kansas Industrial Consumers Group (KIC), and the United States Department of Defense (DOD) also filed revenue requirement, CCOS and rate

design testimony. The results of the base rate revenue requirement recommendations filed by these intervenors included an increase of \$166.3 million (net \$91.5 million) for EKC and a decrease of \$23.9 million (net (\$34.8 million) for EKM as recommended by CURB; an increase of \$199.2 million (net \$124.4 million) for EKC and a decrease of \$9.0 million (net (\$19.9 million) for EKM as recommended by KIC; and an increase of \$234.1 million (net \$159.3 million) for EKC and an increase of \$6.4 million (net (\$4.5 million) as recommended by the DOD. On September 5, 2023, KIC filed cross-answering testimony updating its revenue requirement recommendations to an increase of \$160.4 million (net \$85.6 million) for EKC and a decrease of \$18.5 million (net (\$29.4 million) for EKM. Other intervenors also filed direct and cross-answering testimony primarily addressing CCOS and rate design issues.

On September 18, 2023, Evergy filed rebuttal testimony responding to the direct and cross-answering testimony that was filed by the parties. Beginning on September 21, 2023, the Parties met collectively to discuss the possible settlement of contested issues in this matter. Settlement discussions were ongoing through the week of September 25, 2023, until a final Settlement was reached. After negotiations, the parties agreed unanimously to a revenue requirement increase of \$148.8 million (+11.75%), which equates to a net impact of \$74 million (+3.54%) after the rebasing of the RECA and PTS, for EKC and a revenue requirement decrease of \$22 million (-3.89%), which equates to a net decrease of \$32.9 million (-4.53%) after the rebasing of the PTS, for EKM.

On September 29, 2023, the Parties filed a Joint Motion for Approval of Unanimous Settlement Agreement (Settlement Agreement), supporting the agreed-upon revenue changes for EKC and EKM and also containing other provisions in the settlement that addressed all other disputed issues present in the case. Subsequently, on October 9, 2023, the Commission held a hearing on the Settlement Agreement.

The Commission issued an Order Approving Unanimous Settlement

Agreement on November 21, 2023.

Major Dockets | ELECTRIC UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Electric Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

EVERGY, INC. (EVERGY METRO, INC., EVERGY KANSAS CENTRAL, INC. AND EVERGY SOUTH, INC.)

<i>Docket number</i>	22-EKME-254-TAR
<i>Docket type</i>	Electric
<i>Date filed</i>	12 Dec 2021
<i>Action date</i>	01 Sep 2023
<i>Commission action</i>	Approved

In the Matter of the Application of Evergy Kansas Metro, Inc., Evergy Kansas South, Inc. and Evergy Kansas Central, Inc. for Approval of its Demand-Side Management Portfolio Pursuant to the Energy Efficiency Investment Act (KEEIA), K.S.A. 66-1283.

On December 17, 2021, pursuant to the Kansas Energy Efficiency Investment Act (“KEEIA”), K.S.A. 66-1283, Evergy filed an Application in this matter seeking approval of its proposed Demand-Side Management (“DSM”) Portfolio. The Application can be found here: <https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202112171559495228.pdf?Id=69506e27-27c0-430c-ac57-3d590100c6d3>

On May 18, 2022, Evergy filed corrections to the Evergy KEEIA 2023-2026 Demand-Side Management Portfolio Report (“Report”) filed with its Application. The term “Application” as used herein refers to the December 17, 2021, Application as corrected on May 18, 2022. The corrected Application can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202205181043104473.pdf?Id=34a8e8f5-5abc-4457-ac83-6803ab38b87c>

On August 9-10, 2022, the Commission held an evidentiary hearing on Evergy’s Application in this docket at which the respective positions of the parties were presented, including a non-unanimous partial settlement agreement on financial recovery (Staff opposed the financial recovery settlement) and a non-unanimous partial settlement agreement on demand-side management programs (Staff was a signatory to the demand-side management programs settlement), both of which were

filed August 1, 2022 (“Initial S&As”).

On August 23, 2022, Evergy filed a Motion to Stay Docket, which was revised on August 26, 2022. In the Motion, Evergy requested a Stay of proceedings to allow parties an opportunity to continue working together to reach a broader resolution of the issues involved in the docket than what was presented by the two non-unanimous settlement agreements. Evergy’s Motion to Stay Docket can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202208231135312869.pdf?Id=66eaece8-5fe5-4a12-b40f-c540f3ad1121>

On September 15, 2022, Evergy filed an update report advising the Commission that discussions were on-going, and although a new settlement agreement had not yet been reached, the discussions were constructive. As such, Evergy requested the Stay be continued until September 29, 2022, to allow the parties to continue their efforts, and that a revised would be filed by that date or, alternatively, another update would be filed. The Update Report on Post-Hearing Discussions can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202209151140134506.pdf?Id=1d4ab8aa-2dca-4a88-ad76-230221d10a6e>

On September 29, 2022, Staff filed a motion requesting the Stay be extended until October 28, 2022, explaining that Staff and Evergy had identified terms that would allow Staff to join a settlement on financial recovery and they were ready to reach out to the other parties for input and discussion. Staff stated that the parties would file a revised settlement, or, in the alternative, another update to the Commission on or before October 28, 2022. The Second Update Report on Post-Hearing Discussions can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202209291619527003.pdf?Id=abb18972-d30f-43a8-8b3a-d47a1e0b3f26>

On October 28, 2022, Evergy filed a Motion for a One Day Extension for filing the Update. Evergy’s request was granted by Order issued October 31, 2022. Evergy’s Motion for Extension of Time can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202210281625255271.pdf?Id=542e2cle-5f0b-4de4-88db-3a306da9b5a8>

On October 31, 2022, Staff filed a motion to extend the stay until November 1, 2022, and on November 1, 2022, Staff filed a motion requesting an extension of the stay until November 15, 2022. On November 8, 2022, the Commission issued an order granting an extension of the stay until November 15, 2022. Staff’s Motion to Extend Stay can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202210311641296394.pdf?Id=ecf6eff0-a487-40e2-a6cd-2325cf610694>

As a result of the post-hearing discussions, the Joint Movants, which included Staff, reached a nonunanimous settlement agreement on programs and financial recovery mechanisms (“Alternative S&A”).

On November 15, 2022, the parties filed a Joint Motion and a Joint Update setting out the agreed upon process for completion of this docket. That process allows Staff and Evergy to file the Alternative S&A for the Commission to consider as an alternative to the Initial S&As that are still pending before the Commission. The Initial S&As remain effective and continue to be supported by the signatories to those agreements as a reasonable option for consideration by the Commission, as well. The Joint Motion for Consideration of Alternative Settlement Agreement can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202211151433313544.pdf?Id=da8dbccc-50d4-43a7-b964-53b35eeef442>

The Joint Update Report and Proposed

Procedural Schedule can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202211151432383236.pdf?Id=bce049c7-3841-4339-8af2-1ae5bb9c28a4>

On November 11, 2022, Staff and Evergy filed testimony in support of the Alternative S&A.

Evergy's testimony can be found here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=fc10e781-97f6-4576-b66d-69ff05add92b>

Evergy's reply brief can be found here:

<http://estar.kcc.ks.gov/estar/ViewFile.aspx?Id=708997e0-dded-477b-81c6-fc08f0293ec2>

On September 1, 2023, the Commission approved the Initial Program Settlement and Initial Financial Settlement, with modifications and conditions set forth in the Order. One such condition was that there be no direct ratepayer funding for fuel switching measures. In addition, Evergy was directed to collaborate with Staff and file an updated timeline for implementation.

A Dissent argued that adopting the Alternative Settlement would provide a far more cost effective and manageable result for ratepayers than the Initial S&As.

The Order and Dissenting Opinion can be found at:

EMPIRE DISTRICT ELECTRIC COMPANY

<i>Docket number</i>	21-EPDE-330-GIE
<i>Docket type</i>	Electric
<i>Date filed</i>	09 Mar 2021
<i>Action date</i>	01 Jun 2023
<i>Commission action</i>	Approved

In the Matter of the Investigation into Empire District Company d/b/a Liberty Regarding the February 2021 Winter Weather Events, as Contemplated by Docket No. 21-GIMX-303-MIS.

This Docket was opened on March 9, 2021 as a result of Staff's request in Docket No. 21-GIMX-303-MIS for the Commission to open separate company-specific investigations into each utility's response to the February 2021 Winter Storm Uri, as well as how the storm affected each utility from an operational and financial perspective. Each utility was required to file a compliance filing in its Docket detailing the extent of the costs incurred during the storm, and presenting a plan to minimize the financial effects of the storm

for customers.

On November 29, 2022, Liberty-Empire filed its plan to mitigate the financial effects of Winter Storm Uri on its Kansas customers. Liberty-Empire reported that it incurred \$10.81 million in additional costs on behalf of its customers, to purchase natural gas and Southwest Power Pool (SPP) Integrated Marketplace (IM) load costs that was necessary in order to continue service to its customers and provide life-saving electricity service during this extreme cold weather event. Empire also asked for carrying costs of \$1.83 million, calculated at 8.8107%, for a total cost of \$12.64 million. To mitigate the financial harm to its customers, Liberty requested recovery of these amounts over a 13-year period. The impact of Liberty's request would be approximately \$7.32/month for an average residential customer.

After discovery and extensive negotiations, all Parties to the Docket filed a Unanimous Settlement Agreement with the Commission on March 31, 2023. The Agreement called for customers to pay for the extraordinary costs over a 13-year period beginning June 1, 2023. The carrying cost agreed to was a 5.71% rate. The resulting rate impact for an average residential customer during this period is approximately \$5.73 a month.

The Commission conducted an evidentiary hearing on the Settlement on April 13, 2023, to question witnesses on the reasonableness of the Agreement.

The Commission issued an Order approving the Agreement on June 1, 2023, which can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20230601104131.pdf?Id=65185978-65be-4424-ab30-733231a7c273>

EVERGY, INC. (EVERGY METRO, INC., EVERGY KANSAS CENTRAL, INC. AND EVERGY SOUTH, INC.)

<i>Docket number</i>	23-EKCE-588-TAR
<i>Docket type</i>	Electric
<i>Date filed</i>	26 Jan 2023
<i>Action date</i>	24 Oct 2023
<i>Commission action</i>	Approved

In the Matter of the Joint Application of Evergy Kansas Central, Inc., Evergy Kansas South, Inc., and Evergy Metro, Inc. for Approval of Tariff Changes Related to Wholesale Demand Response Participation.

On January 25, 2023, Evergy filed its Application with the KCC requesting

approval of tariff changes that would establish the structure and parameters under which Evergy retail customers could participate in wholesale demand response activities in the Southwest Power Pool (SPP) Integrated Marketplace (IM). Evergy requested these tariff changes to address challenges with Demand Response (DR) resource registrations and Demand Response Aggregator (DRA) activities in its service territory and the lack of a clear and transparent process to effectuate retail customer consent in existing Kansas tariffs. The Application can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202301251626081594.pdf?Id=9883b0e4-4446-4d5c-91aa-a2a31dd542f5>

On May 9, 2023, Staff filed a Report and Recommendation in the Docket, which can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202305091307235690.pdf?Id=a53f1d87-1de6-4c67-b657-c08ebb845851>

On July 7, 2023, intervenors had the opportunity to respond to Staff's Report and Recommendation. CURB, Empire, Southern Pioneer, Sunflower, Sierra Club and Vote Solar all filed written comments expressing their opinions regarding Evergy's proposal and Staff's Report and Recommendation. Voltus filed the testimony of three witnesses and a declaration from its Chief Regulatory Officer addressing Evergy's filing and Staff's Report and Recommendation.

On July 21, 2023, Evergy filed the rebuttal testimony of two witnesses and written responsive comments addressing the various legal issues raised by the parties, as well as a motion to strike the declaration filed by Voltus.

On August 10th, 2023, all Parties but Sierra Club and Vote Solar filed a non-unanimous settlement agreement with the Commission, which can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202308100958547072.pdf?Id=294bef32-f879-401d-ad91-c2e1d08bdae0>

The Settlement Agreement called for revisions to Evergy's original application. The revisions would require Evergy customers to acknowledge the roles and responsibilities of the customer, Evergy, and any demand response aggregator being used by the customer in the provision of demand response aggregation services into the SPP IM. The Agreement also called

for the customer to provide certain market registration and operating information to Evergy on a quarterly basis. Voltus, the only operating demand response aggregator in Kansas currently, was a signatory to Agreement and agreed to work with Evergy on a commercially reasonable basis to coordinate on reliability and operating issues as they arose. Voltus also agreed to help its customers compile and submit the required market registration and operating information in order to comply with the requirements of the Agreement and the Tariff revisions.

On October 24, 2023, the Commission issued an Order approving the Settlement Agreement, finding it to be just and reasonable and in the public interest. The Order can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20231024112432.pdf?Id=46452a97-1842-47c7-9fa7-10542f967b5c>

Dockets

LARGE ELECTRIC UTILITIES (revenues of more than \$10M)

The Commission acted upon the following dockets filed by Large Electric Utilities from July 1, 2022 to June 30, 2023. These filings involved companies with operating revenues of more than \$10,000,000.

EVERGY KANSAS CENTRAL, INC

Docket number 19-WSEE-441-GIE
Docket type Electric
Date filed 30 Apr 2019
Action date 13 Sep 2022
Commission action Approved

In the Matter of the General Investigation into the Operations of Westar Energy, Inc. Regarding an Accident that Occurred Due to a Steam Release at the Jeffrey Energy Center on June 3, 2018, in St. Mary's Kansas.

EMPIRE DISTRICT ELECTRIC COMPANY

Docket number 21-EPDE-198-ACA
Docket type Electric
Date filed 01 Dec 2020
Action date 13 Oct 2022
Commission action Approved

In the Matter of the Application of The Empire District Electric Company for Approval of its Annual Energy Cost Adjustment ("ACA") Filing.

Financials

The following are selected Gross Plant, Revenue, and Expense charts and tables including updated information beyond the close of the fiscal year, where available. Some charts depict information available only on a calendar-year basis.

GAS COMPANIES STATEWIDE GROSS PLANT | 2018–2022

Gross Plant is the sum total value of utility assets and property as well as the fixed cost of the generation and provision of service on which the Utility’s rate of return is applied in accordance with rules set by the KCC. This chart displays the aggregate total gross plant of all regulated public utilities in Kansas for the past five years.

GAS COMPANIES GROSS PLANT, BY COMPANY | 2022

This chart takes the statewide aggregate gross plant figure from the preceding table and divides it among the major regulated utilities. As can be seen from the data, one entity encompasses a vast majority of utility gross plant across Kansas.

GAS COMPANIES REVENUES AND EXPENSES, BY COMPANY | 2022

This chart compares each utility’s annualized revenues and expenses and the difference between the two represents the gross margin of each company.

■ Total Revenues
■ Total Expenses

GAS COMPANIES PURCHASED GAS COSTS, BY COMPANY | 2022

This chart takes the expense portion from each utility on the previous table and carves out the cost of purchased gas.

TOTAL PURCHASED GAS (GAS UTILITIES) AND TOTAL PURCHASED FUEL FOR GENERATION (ELECTRIC UTILITIES) | 2021 - 2022

This chart shows the total natural gas purchased for utility use for the last two years. Each column bar is broken down into blue and yellow portions. The blue represents gas purchased by the gas utilities for regulated delivery to their retail and wholesale customers. The yellow represents natural gas “fuel” purchased by electric utilities for natural gas-fired generation of electricity. Whereas the bulk of retail gas use (blue) is for winter heating, utility gas fuel use is predominantly during peak electric usage summer months where baseload nuclear and coal generation have already been dispatched and the remaining load must be served by gas-fired generation.

GAS UTILITIES WITH REVENUES OF OVER \$10M | RATE CASE RESULTS | FY19–FY23

■ Requested
■ Granted
■ Refunds and/or Rate Reductions

RESIDENTIAL GAS BILL COMPARISON | JULY 2022 - JUNE 2023

The following chart represents a comparison of monthly bills based on average residential consumption of 6.100 Mcf.

Company**	Customer Charge	Delivery Charge	Cost of Gas	Hedge Factor	GSRS per Meter/Month	Property Tax	Total Bill Without Tax	Cost Per MCF	Utility Bill as a % of National Avg. ATMOS ENERGY CORPORATION

Docket number 23-ATMG-359-RTS
Docket type Gas
Date filed 09 Sep 2022
Action date 09 May 2023
Commission action Approved

In the Matter of the Application of Atmos Energy Corporation for Adjustment of its Natural Gas Rates in the State of Kansas.

On September 9, 2022, Atmos Energy (Atmos) filed an Application to make changes in its rates and charges for natural gas service. Atmos requested a net revenue increase of \$8.3 million. Atmos cited the following factors as drivers of the rate increase : (1) capital investment since previous rate case; (2) need for Atmos to improve its allowed return on its invested capital; (3) new depreciation rates; (4) Operation and Maintenance expense increases; (5) two part rate design with an increased monthly facility and volumetric charges; (6) implement a Voluntary Smart Choice Carbon Offset tariff; and (7) request an expansion of the budget for the current System Integrity Program Tariff approved in the previous rate case.

On January 17, 2023, the parties filed Direct Testimony. In its Direct Testimony, Staff recommended a net revenue increase of \$1.98 million. Staff also recommended changes to Atmos' requested expansion of the System Integrity Program, Schedule 2 tariff changes, and Atmos' voluntary Smart Choice Carbon Offset program. CURB recommended a net revenue increase of \$1.7 million. Both parties addressed various tariff and rate design issues.

A settlement was filed on February 21, 2023. All parties agreed to a net revenue increase of \$2.2 million. Parties further agreed on Staff's depreciation rates, a carrying charge of 8.7% for the GSRS and SIP, withdrawing Atmos' request to expand the SIP, various tariff issues, and approval of Atmos' Smart Choice Carbon Offset Rider on a pilot basis.

The Parties also agreed to several changes to Atmos' transportation tariffs, stemming from the lessons learned during the Winter Storm Uri general investigations. The first change was to require new customers electing to take Transportation Service to either have a peak monthly delivery

of 1,500 MMBtu, or an annual delivery of 5,000 MMBtu. The Parties agreed to require all Transportation Customers, with the exception of small schools, to install Electronic Flow Measurement (EFM) devices. This EFM equipment was required to be installed by November 1, 2024, or customers had to be converted to Sales service.

The Commission issued an Order Approving Settlement Agreement on May 9, 2023.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20230509150926.pdf?Id=16f9d09a-f697-4cc9-ab1f-95c1ca028915>

Major Dockets | GAS UTILITIES

KANSAS GAS SERVICE

Docket number 23-KGSG-719-TAR
Docket type Multi-Utility
Date filed 31 Mar 2023
Action date N/A
Commission action Not Final

In the Matter of the Application of Kansas Gas Service, a Division of ONE Gas, Inc. for Approval of Revisions to Certain Tariffs Controlling Transportation Service.

This Docket was opened on March 3, 2022, as a result of the lessons learned in the aftermath of Winter Storm Uri, and the general investigations that ensued.

On March 31, 2023, KGS filed an Application seeking several revisions to its transportation tariffs, seeking to improve or revise the tariffs to account for the lessons learned after Winter Storm Uri. The Application can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202303311646264889.pdf?Id=7f764c37-84df-42ca-9a9c-7f45a63c814d>

Several natural gas marketers that are active in the natural gas transportation market in Kansas intervened in the case, as well as Sunflower Electric Power Cooperative (Sunflower), Atmos Energy, and Kansas Municipal Gas Agency (KMGA).

On September 22, 2023, the Parties all filed a Unanimous Settlement Agreement with the Commission. The Agreement can be found here:

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/S202309221454415728.pdf?Id=33a2269f-c72f-46e9-99b0-7df2788e535f>

The Agreement called for several important revisions and improvements to KGS's transportation tariffs, including a mechanism to compensate gas marketers and others (like Sunflower and KMGA) for instances in which they deliver more natural gas to the KGS system than they use, during periods of extremely high demand coupled with very high gas prices. This mechanism makes it possible for shippers on the KGS system to be compensated for taking actions which improve the reliability of the natural gas or electric systems in Kansas, either by

supplying more gas when it is sorely needed, or by consuming less.

The Agreement also called for lowering the maximum penalty that can be assessed during events like Winter Storm Uri. The Agreement calls for changes to the way these penalties are calculated, from the greater of a less significant dollar amount per MMBtu (\$5 to \$20) or a multiple of the Gas Daily Index, to the lesser of a much more significant dollar amount per MMBtu (\$15 to \$100), plus the underlying Gas Daily Index, or a multiple of the Gas Daily Index.

This allows any potential penalties to not be so draconian as to cause severe distress on the Kansas Economy, while at the same time ensuring that they convey the intended punitive effect in order to incent compliance with KGS's critical directives during times of system stress, such as an Operational Flow Order or Period of Curtailment.

Additionally, the Agreement called for all transportation customers, with the exception of School customers and Irrigation customers using less than 3,000/Mcf/year, to install EFM equipment by January 15, 2027, or be converted to Sales Service. For Schools using more than 3,000 Mcf/year, KGS agreed to pay for the EFM installation for these customers, with KGS recovering its actual costs of conversion plus a carrying charge at the approved rate of return used for the Gas Safety Reliability Surcharge.

Lastly, the Agreement called for revising the Cash Out price that KGS pays transportation customers, or that transportation customers pay KGS, in the event of delivery imbalances at the end of the billing month. These changes improved the incentive that transportation customers have to stay in balance by the end of the month, which lowers the likelihood of subsidization between the sales and transportation customer classes.

This Docket remains under review by the Commission.

Dockets | LARGE GAS UTILITIES (revenues greater than \$10M)

The Commission acted upon the following dockets filed by Large Gas Utilities from July 1, 2022 to June 30, 2023. These filings involved companies with operating revenues of more than \$10,000,000.

KANSAS GAS SERVICE, A DIVISION OF ONE GAS, INC.

Docket number 21-KGSG-286-COM
Docket type Gas
Date filed 03 Feb 2021
Action date 26 Aug 2021
Commission action Denied

In the Matter of the Complaint Against Kansas Gas by Bruce Vaughan.

ATMOS ENERGY CORPORATION

Docket number 21-ATMG-333-GIG
Docket type Gas
Date filed 09 Mar 2021
Action date 24 Mar 2022
Commission action Approved

In the Matter of the Investigation into Atmos Energy Corporation Regarding the February 2021 Winter Weather Events, as Contemplated by Docket No. 21-GIMX-303-MIS.

BLACK HILLS/KANSAS GAS UTILITY COMPANY, LLC

PERCENTAGE OF CONNECTIONS BY DOWNSTREAM SPEED | AS OF 06/30/2021

Kansas' downstream speed metrics are comparable to the nation as a whole.

TELECOMMUNICATION UTILITIES RECEIVING KUSF SUPPORT | FY19–FY23

NUMBER OF KUSF TELECOMMUNICATION FILINGS | FY19–FY23

KUSF FUNDING OBLIGATIONS | 3/1/23 - 2/29/24

Major Dockets | LARGE TELECOM UTILITIES

Pursuant to K.S.A. 66-117b, the following is a review with narrative of all dockets for Large Telecom Utilities (those with \$10,000,000 or more annual revenue in the preceding calendar year) which caused changes to “rule or regulation or practice pertaining to the service or rates of a public utility or common carrier approved by the state corporation commission during the preceding fiscal year.”

GENERAL INVESTIGATION

Docket number 20-GIMT-387-GIT
Docket type Telecom
Date filed 12 Mar 2020
Action date 07 Apr 2022
Commission action Order Issued

In the Matter of a General Investigation into the Interconnection, Porting, Evolving Technology, and the Impacts on Consumer Choices in Kansas.

The KCC opened this proceeding for the purpose of determining local exchange carriers’ obligations to interconnect, port numbers, complete calls, and other obligations they may have in consideration of evolving technologies, including Voice over Internet Protocol (VoIP), and the impact on consumer choices.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20200312103926.pdf?Id=05af2158-2569-43f3-8ab9-9cf7578c48f8>

On March 23, 2021, the Commission issued an Order determining all carriers must port numbers and complete calls pursuant to FCC rules and finding the Commission does not have jurisdiction over VoIP interconnection.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20210323102959.pdf?Id=199ec6bd-03c1-4a18-953c-c3d082bdb1f9>

On April 7, 2021 the Rural Local Exchange Carriers (RLECs) submitted a Petition for Clarification on Commission Jurisdiction. On May 11th, 2021, the Commission issued an Order clarifying that Telecommunication carriers, including local exchange carriers, are obligated to provide number porting to interconnected VoIP providers, without unreasonable delay or unreasonable procedures that have the effect of denying or delaying porting.

[https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387 Order on Motion for Clarification \(Final\).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3](https://estar.kcc.ks.gov/estar/ViewFile.aspx/20-387 Order on Motion for Clarification (Final).pdf?Id=94f23a29-e7cf-4f92-b5f9-4862085d72e3)

Issues regarding interconnection between

the RLECs and other providers and, specifically, interconnected Voice over Internet Protocol (VoIP) providers continue, resulting in consumer choice being impacted. The Commission will continue to address issues, including the costs of interconnection, as necessary.

GENERAL INVESTIGATION

Docket number 22-GIMT-142-GIT
Docket type Telecom
Date filed 28 Sep 2021
Action date 25 Jan 2022
Commission action Order Issued

In the Matter of An Investigation to Determine the Affordable Local Service Rates for Rate-of-Return Regulated Carriers and the Annual Assessment Rate for the Twenty-Sixth Year of the Kansas Universal Service Fund, Effective March 1, 2022.

This proceeding was opened on September 28, 2020, to determine the affordable residential and single-line business local service rates for the rural local exchange carriers and the appropriate assessment rate for the twenty-sixth year of the KUSF.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/22-GIMT-142-GIT Order.pdf?Id=47534ab4-8660-42f6-9761-fbcf31eff4e8>

The KCC issued an Order on January 25, 2022, in which it adopted a KUSF assessment rate of 11.44 percent for March 1, 2022, to February 28, 2023. The Commission also found that the \$30 million cap, per K.S.A. 66-2008(e)(3), would remain in effect for the Fiscal Year pending an ultimate decision by the Court.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/20220125104223.pdf?Id=be2d28ab-753a-4e51-a0a4-4999e5f8f7b0>

GENERAL INVESTIGATION

Docket number 22-GIMT-549-GIT
Docket type Telecom
Date filed 16 Jun 2022
Action date 29 Jun 2023

Commission action *Order Issued*

In the Matter of a General Investigation into the Adjustment of Intrastate Switched Access Charges for Rural Telephone Companies in Compliance with K.S.A. 66-2005(e) and Federal Communications Commission Reforms Effective August 12, 2022.

The KCC opened this proceeding on June 16, 2022, for the purposes of determining the rural exchange Carriers’ (RLECs) intrastate switched access rate adjustments necessary to maintain parity with interstate rates, determine each RLEC’s calculated net intrastate access revenue increase or reduction, as well as the corresponding adjustment to each RLEC’s annual KUSF support.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/22-GIMT-549-GIT Order Opening Docket.pdf?Id=919c03ab-170d-4eee-9db6-fab6b4c7c490>

The KCC issued an Order on October 11, 2022, in which it adopted the Intrastate Originating Switched Access Rates and the KUSF adjustment for each RLEC, resulting in a total annual reduction in the KUSF of \$8,889.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/22-GIMT-549-GIT.pdf?Id=62c1e132-e7b1-45a5-af8b-aab5ccdd1794>

The KCC issued an Order on May 16, 2023, in which it adopted the Revised intrastate Access Tariffs due to Southern Kansas Telephone Company notification of exiting the National Exchange Carrier Association interstate access pool and tariff, effective July 2023. The net impact to the RLEC’s annual KUSF support is a reduction of \$1,646 instead of the \$8,889 reduction approved by the Commission in the Access Adjustment Order. Therefore, the total annual reduction in the KUSF is now \$7,112.

<https://estar.kcc.ks.gov/estar/ViewFile.aspx/22-GIMT-549-GIT.pdf?Id=8904ae78-262e-4b44-86cd-977078c16510>

The KCC issued an Order on June 29, 2023, for the purposes of approving the revised intrastate access tariffs filed by Blue Valley Tele-Communications, Columbus Communications Services, LLC, and LaHarpe Telephone Company, Inc., effective July 1, 2023.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/22-GIMT-549-GIT_Order.pdf?Id=d2cc1297-d007-449e-96af-ca039f4c4943

GENERAL INVESTIGATION

<i>Docket number</i>	23-GIMT-644-GIT
<i>Docket type</i>	Telecom
<i>Date filed</i>	21 Mar 2023
<i>Action date</i>	21 Sep 2023
<i>Commission action</i>	Order Issued

In the Matter of Certification of Compliance with Section 254(e) of the Federal Telecommunications Act of 1996 and Certification of Appropriate Use of Kansas

Universal Service Fund Support.

The Commission opened this proceeding on March 21, 2023, for purposes of collecting data from eligible telecommunications carriers (ETCs) in Kansas. The ETCs were to file the data by July 1, 2023. The data is used to determine whether the KCC will certify to the Federal Communications Commission (FCC) and the Universal Service Administrative Company (USAC) that ETCs are using federal universal service funds only for the provision, maintenance and upgrading of facilities and services for which the support is intended. The data is also used to determine whether ETCs in Kansas utilized their KUSF monies appropriately.

https://estar.kcc.ks.gov/estar/ViewFile.aspx/23-GIMT-644-GIT_Order_Opening_Docket.pdf?Id=6c9aef6a-9238-4a9b-bef4-fla6eb96ef86

The KCC issued an Order on September 21, 2023, in which it determined that KCC staff shall submit letters to the FCC and USAC to certify that the carriers listed have certified that their federal universal service fund support was used in 2022 and will be used in 2024 only for the provision, maintenance, and upgrading of facilities and services for which support was intended. The Order also penalized nine ETCs for late and incomplete filings. Letters, dated September 15, 2023, were submitted to the FCC and USAC.

The role of the Transportation Division of the Kansas Corporation Commission (KCC) is to ensure appropriate and effective regulatory oversight of motor carriers, with the goal of protecting the public interest and promoting safety through comprehensive planning, licensing, education, and inspection to the extent not preempted by federal law.

Executive Summary

The Transportation Division provides comprehensive support to all Kansas based motor carriers operating commercial motor vehicles in the state of Kansas. The Division provides informational services to motor carriers in Kansas through its statewide live safety seminar program and its Special Investigator stationed throughout the state. The Division is responsible for establishing the regulations that apply to motor carriers through both state statutes and administrative regulations, ensuring that businesses, drivers and vehicles meet the appropriate economic and safety regulations to ensure the safety of the motoring public. Through collaborations with state and federal agencies as well as industry stakeholders the Division helps direct enforcement of those same rules and regulations. As our report shows, the results of those efforts have been largely successful.

Core Functions

As the lead agency that regulates motor carriers and businesses that operate commercial motor vehicles in the state, the performance measures identified in this report are a product of the Division's four Core Functions:

1. Administrative Regulations and Statutory Requirements;
2. Education and Compliance Programs;
3. Kansas Trucking Regulatory Assistance Network (KTRAN);
4. Unified Carrier Registration (UCR) Program;

The Core Functions are designed to maintain continuity, educate the industry we serve while protecting the motoring public. Our ability to communicate with our industry partners is what sets us apart. In pursuit of our goals, the Division strives to be professional, adaptable, and committed to customer service and safety. In order to be most effective, the Division has developed strong working relationships with state, federal and local authorities, as well as the regulated community.

Administrative and Statutory Obligations

The development and implementation of motor carrier regulations and adoption of federal motor carrier safety regulations is a core function of the Division. Periodic updates to the Kansas motor carrier regulations are required by 49 C.F.R.

Part 350. If updates are not made it could result in monetary consequences for our state's motor carrier safety enforcement, affecting multiple state agencies and grants. Because updating the motor carrier regulations effects multiple agencies, the Division meets with representatives from the Kansas Highway Patrol (KHP) to annually review the motor carrier regulations (K.A.R. 82-4-1 et. seq.), and draft proposed updates, amendments, additions and/or deletions.

The KCC completes its review and drafts proposed regulations which then go through a review process with the Division of Budget, Department of Administration and the Attorney General's office. Developing a regulation strategy that meets federal regulations and is calibrated for Kansas based carriers, helps set a level of regulation that takes into account the types of carriers operating in Kansas and how enforcement of the applicable regulations best apply. Setting unrealistic expectations without evaluating the realities facing Kansas based carriers, would hinder program goals and negatively affect performance measures.

The Division takes on an important role in maintaining the KCC's motor

carrier statutes to ensure the Division has authority to complete its core functions and minimize any unnecessary and outdated regulatory burden on the motor carrier industry. The Division proposes periodic changes to the statutes to ensure they are applicable in the current motor carrier industry context and conform to changes made to the Federal Motor Carrier Safety Administrations rules and policies. These changes include repealing statutes that no longer apply and modifying language to better describe the reality of the motor carrier industry today.

In 2023, the Division did not sponsor any legislation. The Division did provide technical assistance for the wording of HB 2160.

Education Program

The education program is the foundation for both the economic and safety programs of the Division. It is necessary to establish an effective and efficient infrastructure that focuses on sound safety training and enforcement programs aimed at identifying and minimizing unsafe conditions potentially harmful to the motor carrier and the traveling public. The virtual education program was developed for all new and existing public and private motor carriers in Kansas. The Division traditionally averages more than 1,000 attendees annually.

The virtual classes have been very popular with the industry and have benefited staff by saving them time and the expense of traveling to the different training locations.

The seminars are designed to inform and educate new carriers, and out of compliance motor carriers, about current rules and regulations. Motor carriers are notified of seminar dates at the time they apply for KCC authority. Safety seminar information is also located on the KCC website. The Division sends e-mails and invitations to each Kansas-based motor carrier that applies for and receives, a new USDOT number.

The Division has put an emphasis on serving rural motor carriers and ensured that those in our rural areas do not have

far to go to attend a class. Additionally, rural motor carriers have access to the KCC Investigators assigned to regions all over the state. Our investigators serve as a local resource to carriers that can respond to specific questions that come up in the field.

HUMAN TRAFFICKING AWARENESS TRAINING ADDED TO EDUCATION PROGRAM

The KCC has partnered with the Attorney General's Office, Kansas Highway Patrol (KHP), Kansas Motor Carriers Association (KMCA) and Truckers Against Trafficking (TAT) to include training in identifying and reporting suspected human trafficking as part of the motor carrier safety seminars. The training is part of a focus aimed at reducing human trafficking by enlisting the help of motor carriers to report suspicious activity they encounter as they travel the nation's highways. The training began in February of 2016 and since that time more than 6,000 motor carrier representatives have participated in Kansas have received the training.

Kansas Trucking Regulatory Assistance Network (KTRAN)

One of KTRAN's functions is to welcome New Registrants with each passing week. The system allows motor carriers and businesses to apply and renew their intrastate authorities and directs all interstate motor carriers wanting to renew their current or previous years UCR to the National Registration System (NRS) for renewals and adjustments. The project serves to enhance the Kansas E-Credentialing capability by establishing an interactive process where carriers walk through a logical set of questions to determine what authorities, forms and processes need to be followed to meet the carrier's needs. The project is an intelligent, interactive front-end to the TruckingKS.org portal, creating a more efficient business process for carriers and state motor carrier personnel.

Additionally, KTRAN serves to further integrate information about Kansas motor carriers, commercial vehicles and commercial drivers. For example,

roadside enforcement has access to Commission authority, Intrastate Out-of-Service Orders and Driver Waiver information through Kansas Commercial Vehicle Information Exchange Window (CVIEW) query windows utilizing a new system-to-system interface built as part of this project. Further, KCC officials are automatically notified of PRISM OOS status changes as well as having a real-time interface to KSCVIEW for PRISM checking of carriers and vehicles prior to issuing KCC authorities. Today, more than 10,000 motor carriers have active KTRAN accounts.

KTRAN is one of the many programs developed through the Kansas Commercial Vehicle Information Systems and Networks (CVISN) program. In Kansas, the Department of Revenue (KDOR) is the lead agency for the CVISN program. Other agencies involved in the Kansas Expanded CVISN Program Plan are the KCC, KHP and KDOT. They have a longstanding relationship and have partnered on numerous projects. The CVISN team shares a strategic vision which includes providing unparalleled customer service; safety compliance education; and effective, balanced enforcement of our state motor carrier rules and regulations.

Federal Unified Carrier Registration (UCR) Program

The UCR Program has not been impacted by the COVID-19 Pandemic. The UCR functionalities are web based and allow the customers access from their home or office.

The UCR is a federal registration program managed by the Division, under which a commercial vehicle registrant operating in interstate commerce pays annual renewal fees. The UCR replaced the Single State Registration (SSR) in 2007. The program annually generates

\$4,344,290.00 of which \$1.3 million is transferred to the Kansas Highway Patrol for use as a match for their Motor Carrier Safety Assistance Program (MCSAP) or motor carrier safety related programs.

The Division also annually transfers approximately \$1,000,000 dollars to the

Kansas Department of Transportation's Highway Fund. The remaining funds are used to fund the Administration of the UCR program and the Division's Educations and Compliance Programs.

Each entity subject to UCR is required to register and pay the fee annually through the National Registration System (NRS). The fees imposed on motor carriers and freight forwarders businesses that operate motor vehicles are graduated through a system of brackets or tiers, based on the number of vehicles they have operated; brokers and leasing companies, which operate no vehicles themselves, pay a fee at the level that applies to the smallest motor carriers. No UCR credential is issued to a UCR registrant; enforcement is accomplished through online data checks and various types of audit.

UCR defines a commercial motor vehicle (CMV) as: a self-propelled vehicle used on the highways in commerce principally to transport passengers or cargo, if the vehicle:

- Has a gross vehicle weight rating or gross vehicle weight of at least 10,001 pounds, whichever is greater, or
- when connected to trailing equipment has a gross combination weight rating or gross combination weight of at least 10,001 pounds, whichever is greater, or
- Carries placarded amounts of hazardous materials, regardless of the vehicle's weight, or
- Is designed to carry more than 10 passengers, including the driver.

In Kansas, the oversight of non-payment of UCR fees began January 1, 2009, and is conducted through KHP compliance verification through roadside inspections and at the Ports of Entry, the KDOR verifies UCR compliance prior to issuing commercial plates and the KCC Transportation Division verifies UCR compliance through Compliance Reviews and audits on interstate motor carriers.

Under federal law, the Board of Directors of the Unified Carrier Registration Plan ("Board") is required to recommend to the United States Department of Transportation (USDOT), the level of fees to be assessed

KTRAN MOTOR CARRIER STATISTICS

FY2023 KTRAN Statistics	
Intrastate motor carriers holding KCC authority	916
Vehicles registered to intrastate motor carriers	4,481
Intra/interstate motor carriers holding KCC authority	5,816
New intrastate Public/For-hire applications granted	385
New Private authority applications granted	80
Fees collected from new applicants and renewals	\$165,974.00

6-20	\$351.00	\$242.00
21-100	\$1,224.00	\$844.00
101-1,000	\$5,835.00	\$4,024.00
More than 1,000	\$56,977.00	\$39,289.00

in each agreement year. Each December, the Board meets to review the amount of fees collected in the previous calendar year and recommends the six fee brackets for the upcoming registration year either be adjusted or maintained to the USDOT. The USDOT reviews the UCR Boards recommendation and either approves or adjusts the next year's registration fees. The Board recognizes that the recommended adjustments require action in a final rule by the Department and the Federal Motor Carrier Safety Administration (FMCSA).

The Division's KTRAN program directs motor carriers wanting to renew their current or previous years UCR to the NRS for renewal and adjustments. Transportation Staff are able to remind motor carriers of their UCR renewal obligations through the NRS and KTRAN

portals.

The charts on the following page demonstrate the success of the Transportation Division's UCR compliance efforts. For the last two years, Kansas has been the top jurisdiction in the Midwest and North America based on the number of Kansas carriers compliant with the UCR registration requirements.

Agriculture Commercial Driver's License (CDL) Reciprocity Agreements

Currently, Kansas has active Reciprocity Agreements with our counterparts in Missouri, Nebraska, and Oklahoma, which permit Kansas farmers to operate their commercial driver's license (CDL) class commercial motor vehicles (CMV) in interstate commerce within 150 air-miles of the farmers place of operation without the necessity of obtaining a CDL under certain conditions. A farmer benefits under this exemption when operating a farm registered vehicle with a valid driver's license in the farmer's home state. The vehicle must be registered as a farm vehicle and be controlled and operated by a farmer for the exclusive purpose of transporting agricultural products, farm machinery, and/or farm supplies to or from the farmer's farm. The federal statutory provisions in the Moving Ahead for Progress in the Twenty-First Century (MAP-21) legislation, were self-executing and took effect on October 1, 2012. This exemption eliminates the need for our CDL Reciprocity Agreements for the purpose of safety regulations; however, farm vehicle drivers still need the agreements for the Hazardous Materials exemptions. We continue to work on a similar agreement with representatives from Colorado.

Due to MAP-21, our CDL Reciprocity Agreements are more important now than ever. Currently, if farmers transport Hazardous Materials in interstate commerce they are not allowed to use the MAP-21 exemptions. These agreements allow a farm vehicle driver to operate up to a 150 air-mile radius from the farm in interstate commerce without requiring a commercial driver's license (CDL) and without registering in a Substance and Alcohol Testing program.

Safety Compliance Program

State law requires the KCC to verify that each new motor carrier is in compliance with the Commission's safety rules and regulations within 18 months of granting

UCR COMPLIANCE

UCR Compliance for CY2022 in the Midwest Region			
Jurisdiction	Registered Carriers	Not Compliant	Percent Compliant
Nebraska	8,339	818	91.07%
Missouri	12,890	1,446	89.91%
Ohio	19,132	2,336	89.12%

the motor carrier Commission operating authority. To advance the Division's established mission, Transportation Staff conducts both comprehensive and focused off-site investigations and audits on new and existing motor carriers, taking appropriate action upon discovering unsafe conditions. The Transportation Division also works closely with the Kansas Highway Patrol (KHP) and the Federal Motor Carrier Safety Administration (FMCSA) to reduce accidents involving motor carriers through promotion of safety education to the motor carrier industry and oversight of State and Federal regulations.

In FY2023, the Division conducted 216 Compliance Reviews and Complaints resulting in civil assessment penalties against 144 motor carriers for violations of the Divisions safety and operating authority rules and regulations. The charts on this page summarize the violations identified during this fiscal year.

Fine amounts collected by the Division are deposited directly into the State General Fund.

The KCC, KHP, KDOR and FMCSA share responsibilities in the oversight of both the state and federal motor carrier safety and economic rules and regulations. This partnership has proven to be extremely efficient and effective in contacting more carriers and drivers and in identifying high risk carriers and drivers. As a result, it is possible for the FMCSA and state oversight agencies to apply a wider range of interventions aimed at correcting high risk behavior.

These efforts have been rewarded with a measurable reduction in the number of carriers operating in an unsafe manner as well as an improved rate of compliance among Kansas carriers when compared to states in the surrounding region. The following charts, compiled from data provided by the FMCSA, demonstrate a couple of the metrics we use to measure the effectiveness of our safety education classes and enforcement mechanisms.

Unsatisfactory and Conditional Rated Motor

Carriers for CY2022

The Safety Management Systems (SMS) provides a calendar year (CY) snapshot of the 10 Midwest States domiciled Motor Carriers (MCs) operating in interstate commerce. This data compares Kansas based MC conditional and unsatisfactory rated CR data to the surrounding Midwest MCs data. The chart below illustrates the number of "conditional carriers" and "unsatisfactory carriers" found in the past CY. Conditional carriers are those who do not have adequate safety management controls in place to ensure compliance with the safety fitness standards of the FMCSA. Unsatisfactory carriers are those who have been found to have committed violations of applicable regulations after a compliance review, have a proposed unsatisfactory or have been rated unsatisfactory by the FMCSA. The Transportation Division has 10 Special Investigators that perform both comprehensive and off-site compliance reviews on Kansas based intrastate and interstate motor carriers. The

FY2023 Penalty Order Summary
144 Penalties Issued
\$422,900 in Fines Assessed
\$333,650 Collected
\$89,250 Outstanding or in Collections

results for the ten states comparison on the following page demonstrate Kansas has the lowest percentage of compliance reviews with a "conditional/unsatisfactory" outcome for the CY2022, which emphasizes the effectiveness of our Education and Outreach Programs.

Commercial Motor Vehicles (CMVs) Crash Data Comparison for CYs 2020, 2021 and 2022

The clearest indicator of the effectiveness of the Division's safety efforts is the crash data of the state of Kansas compared to other Midwest states and the nationwide

FY2023 VIOLATIONS

Motor Carrier Violations Identified in FY2023		
Violations Issued	49 CFR Part	Description of Violation
10	172	Hazardous Materials
0	383	Commercial Driver's License
1,742	395	Records of Duty Violations
3	180	Cargo Tank Violations
371	396	Maintenance Violations
1	107	Hazardous Materials
432	382	Substance/Alcohol Violations
4	387	Insurance Violations
624	391	Driver Qualification Violations
0	380	Special Training Requirements
390	390	General Violations
823	392	Rules of the Road Violations
Total: 4,099		

average. The Motor Carrier Management Information Systems (MCMIS) provides a snapshot of all crashes from US-domiciled motor carriers (MC) operating in both intrastate and interstate commerce. This direct comparison demonstrates the Division's effectiveness in reducing crashes compared to similarly situated states as well as the national average. The results for the ten states demonstrate Kansas has the 2nd lowest percentage of CMVs and Carriers involved in crashes outcome over the past three CYs.

For safety, A CMV means any self-propelled or towed motor vehicle used on a highway in intra/interstate commerce to transport passengers or property when the vehicle:

- (1) Has a gross vehicle weight rating or gross combination weight rating, or gross vehicle weight or gross combination weight, of 4,536 kg (10,001 pounds) or more, whichever is greater; or
- (2) Is designed or used to transport more than 8 passengers (including the driver) for compensation; or
- (3) Is designed or used to transport more

than 15 passengers, including the driver, and is not used to transport passengers for compensation; or

- (4) Is used in transporting placardable quantities of hazardous materials.

Civil Assessment Program Update

The KCC and KHP partnered to enhance the Kansas Safety Compliance Program with the goal of reducing the number of injury/fatality accidents involving Commercial Motor Vehicles. The Civil Assessment Program was designed and implemented for the purpose of distinguishing the responsibilities of drivers from those of the motor carriers under the Federal Motor Carrier Safety Regulations' (FMCSRs) "Out-Of-Service" violations. Out-Of-Service (OOS) violations are violations designated as serious by the Commercial Vehicle Safety Alliance (CVSA), and require that a driver or vehicle be removed from service until the violations are corrected. CVSA is a non-profit organization consisting of federal and state regulatory agencies, motor carrier

industry, and representatives dedicated to improving motor carrier safety.

OBJECTIVE

The effectiveness of the roadside inspection program is based on information provided by the FMCSA Analysis and Information (A&I) database. The data is based on roadside inspections from both Kansas and foreign based motor carriers. The State of Kansas roadside inspections OOS rate compared to the national OOS for CY2022.

During this period the KS OOS rate for drivers was 6.16% compared to the national driver OOS rate of 7.04%. Kansas vehicle inspections continue to experience a lower OOS rate of 14.72 % compared to the national vehicle OOS rate of 22.24% for CY2022. The hazardous materials (HM) OOS rate for KS is slightly higher at 6.30% compared to the national HM OOS rate of 4.05%.

STRATEGIES

The program focuses on the safety of the driver, equipment and the traveling public. The KCC and KHP work together on enforcement and education

PERCENTAGE OF VEHICLES INVOLVED IN CRASHES

Percentage of Commercial Motor Vehicles Involved in Crashes CY2020-CY2022			
	CY2020	CY2021	CY2022
Midwest	2.32	2.60	2.44
KS	2.19	2.26	1.96
IA	2.53	2.89	2.64
IL	2.80	3.24	3.11
IN	2.31	2.60	2.50
MI	2.86	3.21	3.14
MN	1.65	1.91	1.96
MO	2.49	2.68	2.55
OH	2.08	2.37	2.03
WI	2.12	2.39	2.31
NE	2.47	2.46	2.19

regarding OOS violations of the FMCSRs discovered during roadside inspections. The KCC will only issue one civil penalty for each OOS violation category. For example, if the truck-tractor of a combination vehicle is placed OOS for brakes and the trailer is also placed OOS for brakes, the company will be documented for both OOS violations, but only fined for one. The KHP and KCC will allow the civil assessment to be waived for OOS violations that are outside the obvious normal method of company operations. The KHP Trooper or local enforcement officer will have the ability to provide information to recommend that no civil assessment be issued. If the carrier has demonstrated, at the roadside inspection, that the violation was 1) potentially unavoidable; 2) the carrier has processes in place to prevent the violation; and 3) the carrier clearly has the means to correct the violation, the Trooper/Officer may recommend no civil assessment be issued. In all cases, the field decision may be superseded after the inspection is reviewed.

Conclusion

The Transportation Division has undertaken significant efforts to enhance the oversight responsibilities within its purview and has made significant improvements in motor carrier safety and economic regulation.

The Transportation Division continues to explore ways to enhance and refine its role, to the benefit of the motor carrier industry and the Kansas public.

FY2023 CIVIL ASSESSMENT SUMMARY AND FINES

FY2023 Civil Assessment Summary (Violations)

FY2023 Civil Fines*

*The outstanding civil fines are sent to the State and National Setoff programs for collections. The fine amounts collected by the Division are deposited directly into the State General Fund.

UNSATISFACTORY & CONDITIONAL RATED MOTOR CARRIERS FOR CY2022

Conditional/Unsatisfactory Rated Carriers for CY2022 in the Midwest Region				
State	Reviews	Proposed Conditional	Proposed Unsatisfactory	Conditional/Unsatisfactory Rating
Nebraska	42	18	14	76%
Missouri	83	38	11	58%
Ohio	290	140	59	68%
Illinois	138	81	35	83%

Michigan	120	51	19	58%
Minnesota	78	26	22	61%
Kansas	143	27	8	25%*

Source: FMCSA

*Kansas had the lowest rate of conditional and unsatisfactory reviews of any Midwest state.

Dockets | TRANSPORTATION

Motor carriers

The Commission acted upon the following Transportation filings from July 1, 2022 to June 30, 2023. These filings pertained to rates, operating authority, and safety-related matters for motor carriers.

MOTOR CARRIERS

Docket number 14-TRAM-400-OOS
Docket type Transportation
Date filed 04 Mar 2014
Action date 25 Apr 2023
Commission action Reinstated

In the Matter of the Emergency Suspension of Operating Authority of Jacob and Maria Peters, d/b/a J & M Transport of Plains, Kansas, for Failure to Comply With New Entrant Safety Requirements as Required by Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 19-TRAM-424-PEN
Docket type Transportation
Date filed 30 Apr 2019
Action date 16 Feb 2023
Commission action Reinstated

In the Matter of the Investigation of Crystal's Livestock Express, L.L.C. of Pittsburg, Kansas, Regarding the Violation(s) of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

KHP MOTOR CARRIER VIOLATIONS

Docket number 20-GIMM-211-KHP
Docket type Transportation
Date filed 14 Jul 2022
Action date 14 Jul 2022
Commission action Granted

In the Matter of the Investigation of Danny G. Lambeth, d/b/a Truck Wholesale of Wellington, Kansas, Pursuant to the Kansas Highway Patrol Issuance of a Notice of Violation for Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 20-TRAM-502-OOS
Docket type Transportation
Date filed 09 Jun 2020
Action date 10 Jan 2023
Commission action Reinstated

In the Matter of the Emergency Suspension of Operating Authority of BG Xpress LLC of Kansas City, Kansas, for Failure to Comply With Federal New Entrant Safety Requirements as Required by the Kansas Motor Carrier Safety Statutes, Rules and Regulations.

MOTOR CARRIERS

Docket number 22-TRAM-265-OOS
Docket type Transportation
Date filed 04 Jan 2022
Action date 16 Mar 2023
Commission action Reinstated

In the Matter of the Investigation of David Crystal, of Pittsburg, Kansas, Regarding the Violation of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 22-TRAM-278-OOS
Docket type Transportation
Date filed 06 Jan 2022
Action date 01 Nov 2022
Commission action Reinstated

In the Matter of the Investigation of Solis Underground Construction LLC, of Kansas City, Kansas, Regarding the Violation of the Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

Docket number 22-TRAM-438-PEN
Docket type Transportation
Date filed 22 Mar 2022
Action date 18 Oct 2022
Commission action Suspended

In the Matter of the Investigation of Norton LLC, of Wichita, Kansas, Regarding the Violation(s) of the Kansas Motor Carrier Safety Statutes, Rules and Regulations and the Commission's Authority to Impose Penalties, Sanctions and/or the Revocation of Motor Carrier Authority.

MOTOR CARRIERS

There were no wind dockets this fiscal year.

Consumer Complaints

The Commission's Office of Public Affairs and Consumer Protection (PACP) assists Kansas utility customers when they have questions or need help in resolving an issue with a regulated utility. In FY2023, the staff handled 1,544 complaints and helped return more than \$95,000 to consumers in disputed charges. PACP staff worked with ratepayers from all across the state to get answers and resolutions. The following charts illustrate the statewide assistance offered and the types of complaints received by industry type as well as category.

TOTAL COMPLAINTS BY COUNTY | FY23

Consumers from across the state contacted the KCC for assistance in resolving utility complaints. The largest number of consumer complaints came from counties with the highest populations (Sedgwick, Johnson and Shawnee).

TOTAL COMPLAINTS BY INDUSTRY | FY23

COMPLAINTS	
Electric	575
Gas	440
Other	289
Telecommunications*	236
Water	4
TOTAL COMPLAINTS	1,544

ADJUSTMENTS	
Electric	\$75,186.91
Telecommunications*	\$13,936.14
Gas	\$4,209.91
Other	\$2,198.06
Water	\$0.00
**TOTAL ADJUSTMENTS	\$95,531.02

* This includes service IDs (CLEC, LEC, IXC, VOIP, PAGER, CELL, OSP, ETC, CABLE).

** Disputed amounts that KCC investigators helped return to Kansas consumers.

TOTAL COMPLAINTS BY CATEGORY | ALL INDUSTRIES COMBINED

CONSUMER COMPLAINTS BY CATEGORY | ELECTRIC

CONSUMER COMPLAINTS BY CATEGORY | GAS

CONSUMER COMPLAINTS BY CATEGORY | TELECOMMUNICATIONS*

* This includes service IDs (CLEC, LEC, IXC, VOIP, PAGER, CELL, OSP, ETC, CABLE)

CONSUMER COMPLAINTS BY CATEGORY | WATER

CONSUMER COMPLAINTS BY CATEGORY | OTHER

TOTAL CONSUMER COMPLAINTS BY MONTH | FY23

In FY2023, complaints trended upward during periods of higher heating and cooling bills due to seasonal weather changes. Complaints generally tapered off on November 1 due to fewer disconnections and expanded payment options during the Cold Weather Rule.

TOTAL CONSUMER COMPLAINTS | FY18 - FY23

Consumer complaints remained stable from 2018 through 2020, then jumped by nearly 300 due to controlled electric outages due to supply issues and high costs during Winter Storm Uri. The numbers returned to previous levels in 2022 and declined farther in 2023.
